

# Energy saving advice direct to your door

Our programme provides home energy advice and information on energy efficiency improvements right to the heart of our rural communities.

Have you been impacted by the rise in energy costs? Would your home benefit from being a little warmer? Are you unsure on what you can do to improve this? Our knowledgeable team can help.

## What we do

The Home Energy Advice and Retrofit Team (HEART) are looking to support residents who may otherwise struggle to access help and advice by offering in-person support on their doorsteps to help tackle fuel poverty, live more comfortably in their homes and reduce their utility costs.

## Benefits

- Reduce fuel poverty
- Improve health and wellbeing
- Reduce carbon emissions
- Support vulnerable residents
- Improve property EPC ratings

## When are we next here?

The programme has been made possible thanks to a funding award from the Department for Energy Security and Net Zero.
