<b>Date of Decision:</b>		<b>Details of Decision:</b>				
<u>0116/24</u> /TPA	Ap: Mrs Wwendth  Ap: The Old Rectory 29, Tinkle Street Grimoldby Lincolnshire LN11 8SW Ag:	01/11/2024	The Old Rectory, 29, Tinkle Street, Grimoldby, Lincolnshire	22-Nov-2024	27/12/2024	C
	Summary of Proposed Work	A6 - Several Ash, Beech, Elm, Oak, Scots Pine, Sycamore And Willow Trees In A.006 - G002 on plan (English Elm) reduce to 4m stem as standing habitat stem due north. T003 on plan (Beech) raise lower branch over the footpath to provide 3m clearance and target prune around amenity wire for 0.5m clearance from footpath, road, street light and amenity wire. T004 on plan (Sycamore) crown lift to 3m over footpath and target prune around amenity wire for a clearance of 0.5m for clearance of footpath, overhead wires and road. T010 on plan (Flowering Cherry) remove tree to near ground level due to multiple cavities, decay and leaning towards neighbouring patio area, to avoid damage to neighbouring property. T015 on plan (Sycamore) reduce height by 1-1.5 m to 16m, and reduce lateral branch due north by 1.5m. Due south branches; reduction of 3m to reduce sail risk and reshape. Tree spread is currently 12m, suggesting a reduction to 7.5m in total. Remove deadwood exceeding 40mm diameter and tidy previous pruning stubs to B. S. T021 on plan (Sycamore) reduce to allow 1.5m clearance from property roof line to avoid damage to residential property.

Summary of Proposed Work	T2 - Ash - Reduce main branch overhanging the bungalow roof to the north-east by 2m, reshaping to suitable secondary shoots, ensuring the overhang is clear of the building line and closer to the line of the upper canopy profile. Reduce the adjacent branch extending north above the drive by 2m, reshaping as above. Reduce and reshape the single branch overhanging the highway in line with the upper canopy profile. Lift the west side of the crown to remove minor branches beginning to encroach towards the kerb to give 5.5m clearance above the highway.

Summary of Proposed Work

G3 - Ash, Beech, Elder, Elm, Fir & Willow - T0602 (Cherry) large forked limb; reduce lateral spread from 8m to approx. 5m over the footpath, to suitable secondary growth points. T0603 (Sycamore) remove major dead wood over 40mm in diameter and remove diseased and duplicating branches from the crown. Crown reduce by approx. 1-1.5m to reduce lateral spread of the tree and reshape to suitable growth points. Tree will be reduced from approx. 11m to 9.5m. T0604 (Sycamore) clean out dead, diseased and duplicating branches from the crown. Crown reduce by approx. 1m to reduce lateral spread of the tree and reshape to suitable secondary growth points, reducing its height from 11.5m to 10.5m. T0605 (Sycamore) clean out dead wood exceeding 40mm, diseased and duplicating branches and reduce crown by approx. 1m to reduce lateral spread of the tree and reshape to suitable secondary growth points, reducing its height from 11.5m to 10.5m and crown lifting over highway to 5.2m. T0606 (Sycamore) fell; tree is now completely dead. T0607 (Sycamore) fell; tree is in decline with a dead crown and is hindering neighbouring trees. Tree serves no aesthetic or habitat value, remove to help the surrounding, more mature trees. T0608 (Sycamore) reduce lateral spread and reshape the crown by 1.5 - 2m to suitable secondary growth points. Tree is currently approx. 12m, reduce to 10m. T0609 (Cherry) tree has a severe cavity and dead heart wood at 1m from the ground. Remove the tree before failure, grind out the stump and replace with similar species over the next 12 months. T0611 (Cherry) fell; tree has been garrotted by tree tie and serves no immediate value to the surrounding trees. T0612 (Cherry) crown reduce and reshape by approx. 1.5m to suitable pruning points. Currently at a height of approx. 10m, reduce to 8.5m in height. T0613 (Common Lime) reduce the crown by approx. 2.5m to secondary pruning points from 10m to 8m and crown lift to 3.2m. T0614 (Sycamore) reduce the crown by 1m to suitable secondary growth from 10m to 8.5-9m and crown lift to 3.2m, removing major dead wood exceeding 40mm. T0615 (Cherry) reduce lateral spread into carpark by 1.5 - 2m and reshape to secondary pruning points, crown lift to 4.2m. T0616 (Indian Chestnut) reduce sail and lateral spread over carpark by 2 - 2.5m to secondary pruning points and crown lift to 4.2m. T0617 (Sycamore) reduce lateral spread by 1 - 1.5m to secondary growth, reducing height from 11m to 9.5m. T0619 (Sycamore) reduce the crown lightly by approx. 0.5 - 1m to secondary pruning points from 9m to 8m and crown lift over car park 4.2m. T0623 (Sycamore) remove major deadwood exceeding 40mm and crown lift to 4.2m. T0624 (Sycamore) remove major deadwood exceeding 40mm and crown lift to 4.2m. T0626 (Cherry) remove large lateral damaged limb over carpark and reduce crown by approx. 1m to secondary growth points, from 7 m to 6m. T0627 (Whitebeam) fell; severe decay and rot at the base.

Summary of Proposed Work                      T22 - Sycamore - 1. Clean out basal suckers, ivy, dead wood and abrading branches. 2. Reduce the crown height by approx. 8m, from a current height of 22m, finishing at appropriate lateral branches. 3. Reduce the lateral crown spread by 4-5m in branch length around the entire canopy, ensuring the lower epicormic branches are reduced to match. Current spread in metres, N9, S8, E9 and W7. 4. Reshape all retained growths to suitable secondary or tertiary shoots or growth points to retain an acceptable appearance.

Summary of Proposed Work T2 - Ash - To remove limbs growing towards and overhanging bungalow.

**Conditions:**

Work shall be limited to a reduction in the radius of the crown by means of shortening of branches, which are less than 10cm diameter, to achieve a crown radius of no less than 4.0m when measured from the outer edge of the stem to the outer edge of canopy.

Reason - To define the extent of work permitted ensuring potentially harmful effects of the pruning are minimised.

Condition  
 Within 12 months of the tree being felled, a Salix alba 'Chermesina' (or other species agreed in writing beforehand with the Local Planning Authority) must be planted. This must be in the same or similar location as the felled tree. When planted the circumference of the trunk of the new tree, measured at 150 centimetres above ground level must be 12-14 centimetres.

Reason  
 To ensure replacement planting is undertaken in the interests of continued amenity and contribution to the character of the local landscape.

Condition  
 When planted the tree must be adequately staked, tied, protected and maintained for a period of five years. During that period all losses must be made good.

Reason  
 To help the tree become established in the landscape and to ensure any failure is replaced.

Ag:

Summary of Proposed Work A6 - Area Of Pine Trees - (Pine tree at western end of the group) In the uneven areas, carefully break up and remove the tarmac surface to enable excavation (using hand tools only) to expose the surface roots so they can be cut cleanly using a handsaw and removed and disposed of accordingly. Where the roots are larger/closer to the trunk and it is not appropriate to remove the roots, the ground/tarmac level shall be raised and gradually graded to give a more even surface level.

**Conditions:**

An arboriculturalist needs to present whilst works is being carried out.

23-Sep-14	Appeal Reference: APP/TPO/D2510/4201/FL. Forestry Commissioners have given notice of their proposal to grant consent for fell operations in respect of protected trees at the site. Due to the ELDC objection to this proposal the matter has been referred to the Secretary of state.					
<b>Date of Decision:</b> 20-Aug-15	<b>Details of Decision:</b> The Secretary of State granted consent for the work as proposed, subject to the following conditions: 1) This consent authorises coppicing of existing vegetation on a maximum of 50% of the entire W1 area, broadly in the areas hatched blue on the submitted plan dated February 25th 2014. 2) Following this initial coppicing, the cut and uncut areas shall be the subject of a comprehensive survey within a period of 5 years from the date of the last coppicing action. The purpose of the survey will be to demonstrate the efficacy of the coppicing method of management in relation to vegetation management appropriate to its neighbouring uses and slope stabilisation. 3) No further coppicing work shall take place until the survey, referred to in condition 1, has been submitted to the local planning authority, for consideration, in support of any application for further works within area W1.

1No. replacement tree shall be established to the satisfaction of the Local Planning Authority (LPA). The tree, to be a Hornbeam (Carpinus betulus) or Birch (Betula pendula), of 'standard' form and at least 1.5 metres in height, shall be planted within 2 metres of the siting of the original tree, not later than the end of December 2014, or planted of such other size, species, location or period as may be agreed in writing by the LPA. If, within a period of five years from the date of planting, the tree is removed, uprooted, or destroyed or dies, replacement planting of the same size and species shall be planted at the same place, or in accordance with any variation for which the LPA give their written consent.

Summary of Proposed Work A1 - Several Beech, Cedar, Chestnut, Copper Beech, Elm, Gaen, Holly, Lime, Oak, Scots Pine, Silver Birch, Sycamore, Wellingtonia, And Yew - Works to trees 103,106-107, 109-110, 120-121, 127, 130-131, 135-136, 138-140, 143, 148, 157, 160 & 163-164 as listed on the tree schedule.

**Conditions:**

Two replacement trees shall be established to the satisfaction of the Local Planning Authority (LPA). The trees, to be Oak (Quercus robur), or Beech (Fagus sylvatica) of 'standard' form and at least 2 metres in height, shall be planted where space allows, on the road frontage, with a suggested position shown on the attached photo. Planting should be undertaken no later than the end of December 2014, or planted of such other size, species, location or period as may be agreed in writing by the LPA. If, within a period of five years from the date of planting, the tree is removed, uprooted, or destroyed or dies, another tree of the same size and species shall be planted at the same place, or in accordance with any variation for which the LPA give their written consent.

Summary of Proposed Work T26 - Chestnut - Remove tree.

**Conditions:**

One replacement tree shall be established to the satisfaction of the Local Planning Authority (LPA). The tree, to be an English Oak (*Quercus robur*), Sweet Chestnut (*Castanea sativa*) or Lime (*Tilia x europaea*) of 'standard' form and at least 1.5 metres in height, shall be planted within 2 metres of the siting of the original tree, not later than the end of December 2013, or planted of such other size, species, location or period as may be agreed in writing by the LPA. If, within a period of five years from the date of planting, the tree is removed, uprooted, or destroyed or dies, another tree of the same size and species shall be planted at the same place, or in accordance with any variation for which the LPA give their written consent.
