

## Appendix 1 – Site Assessment

### BINBROOK

Site Reference Number: BIN021						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has strong boundary features of mature hedgerows, some of this may be removed to provide an access onto North Halls so there may be some loss.	<b>X</b>	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape to a degree but this can be mitigated against by a landscaping scheme and retention of boundary features, also the site will be viewed against a backdrop of the village so will help reduce the impact. It will not impact on the townscape or historic environment.	<b>O</b>	Medium	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in flood zone 1 so no impact	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	<b>X</b>	Medium	Local	Permanent	Long

of the best agricultural land and greenfield sites.	it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	If access can be achieved for the site it is linked to the core of the village which is in easy walking distance.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	If access can be achieved for the site it is linked to the core of the village	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking.	✓	Low	Local	Permanent	Long
Summary : The site is located in a sustainable place within easy walking distance to the services and facilities in the village. There may be some loss of biodiversity by the loss of hedging for the creation of an access to the site. The site does not impact on heritage assets and any impact on the wider landscape could be mitigated against by a landscaping scheme.						

**Site Reference Number: BIN303**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is relatively open on the edge of the village, a landscaping scheme could enhance the biodiversity of the site	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape and impact on views into and out of the village and wider views of the countryside and the AONB. It will not impact on the townscape or historic environment.	XX	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in flood zone 1 so no impact	0	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	0	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 2 agricultural land.	X	Medium	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	If access can be achieved for the site it is linked to the core of the village which is in easy walking distance.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	If access can be achieved for the site it is linked to the core of the village	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking.	✓	Low	Local	Permanent	Long
Summary: The site is located in a sustainable place within easy walking distance to the services and facilities in the village. The site does not impact on heritage assets but does impact on the wider landscape including views into and out of the village and wider views of the countryside and the AONB.						

**Site Reference Number: BIN305**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has strong boundary features of mature hedgerows, their retention would protect the existing quality and distinctiveness of the site	<b>O</b>	Low	Local	None	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape to a degree but this can be mitigated against by a landscaping scheme and retention of boundary features. It will not impact on the townscape or historic environment.	<b>O</b>	Medium	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in flood zone 1 so no impact	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land.	<b>X</b>	Medium	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	If access can be achieved for the site through BIN021 it is linked to the core of the village which is in easy walking distance.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	If access can be achieved for the site through BIN021 it is linked to the core of the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking.	✓	Low	Local	Permanent	Long
Summary : The site is located in a sustainable place within easy walking distance to the services and facilities in the village if an access could be found through site BIN021. The retention of the mature hedgerows will protect existing biodiversity. The site does not impact on heritage assets and any impact on the wider landscape could be mitigated against by a landscaping scheme.						

**Site Reference Number: BIN306**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact		Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has strong front boundary features of a hedgerow, some of this may be removed to provide an access onto Louth Road so there may be some loss, which is reflected in the negative part of the score. However, across the site runs an area of flood risk which could be used as open space or for a Suds scheme, this could enhance biodiversity on the site.	X	✓	Medium	Local	Permanent	Short
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape to a degree but this can be mitigated against by a landscaping scheme and retention of boundary features. The site will impact on the townscape and historic environment, in respect of the setting to the Conservation Area, although there will be no impact on the listed church.	X		Medium	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	O		Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is mainly situation in flood zone 1 with a band of flood zone 3 running through the site to the rear. This area could be used for open space or a Suds scheme	O		Low	Local	Permanent	Short
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	O		Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	X		Medium	Local	Permanent	Long

of the best agricultural land and greenfield sites.	it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is linked to the core of the village by a footpath, which is in easy walking distance. The area of flood risk could be used for open space or a Suds scheme both of which are a form of green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is linked to the core of the village by a footpath, there are opportunities to increase green infrastructure as part of the site.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling and there may be opportunities for additional open space within the site.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. The scheme will require a SUDs scheme which will reduce the risk of flooding.	✓	Low	Local	Permanent	Long

Summary : The site is located in a sustainable place within easy walking distance to the services and facilities in the village. There is an opportunity to use the band of flood risk which runs through the site as open space or for a Suds scheme this would ensure that there was a neutral loss of biodiversity. The site will impact on the conservation area, although any impact on the wider landscape could be mitigated against by a landscaping scheme.

**Site Reference Number: BIN307**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact		Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has strong front boundary features of a hedgerow, some of this may be removed to provide an access onto High Street so there may be some loss, this is reflected in the negative part of the score. However, across the site runs an area of flood risk which could be used as open space or for a Suds scheme, this could enhance biodiversity on the site.	<b>X</b>	<b>✓</b>	Medium	Local	Permanent	Short
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site (which is in the Lincolnshire Wolds Area of Outstanding Natural Beauty) will impact on the landscape to a degree due to the topography of the site but this can be mitigated against by a landscaping scheme and retention of boundary features. The site will significantly impact on the setting of the Conservation Area.	<b>XX</b>		Medium	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>		Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is mainly situation in flood zone 1 with a band of flood zone 3 running through the site to the rear. This area could be used for open space or a Suds scheme	<b>O</b>		Low	Local	Permanent	Short

5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land.	✗	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site can be linked to the core of the village by the creation of a footpath, it is in easy walking distance. The area of flood risk could be used for open space or a Suds scheme both of which are a form of green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site can be linked to the core of the village by the creation of a footpath, there are opportunities to increase green infrastructure as part of the site.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling and there may be opportunities for additional	✓	Low	Local	Permanent	Long

	open space within the site.					
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including shops which will encourage walking. The scheme will require a SUDs scheme which will reduce the risk of flooding.	✓	Low	Local	Permanent	Long
Summary : The site is located in a sustainable place within easy walking distance to the services and facilities in the village. There is an opportunity to use the band of flood risk which runs through the site as open space or for a Suds scheme this would ensure that there was a neutral loss of biodiversity. The site will significantly impact on heritage assets, in respect of the Conservation Area. The site is within the Lincolnshire Wolds Area of Outstanding Natural Beauty, however, impact on the wider landscape could be mitigated against by a landscaping scheme.

climate change.	facilities including shops which will encourage walking.					
Summary: The site is located in a sustainable place within easy walking distance to the services and facilities in the village. The site does not impact on heritage assets but does impact on the wider landscape including views into and out of the village and wider views of the countryside and the AONB.						

## BURGH LE MARSH

<b>Site Reference Number: BLM038</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is backland, the boundary treatments are hedgerows and there is some planting within the site. There are outbuildings and caravans on the site although most of the site is rough grass. Additional landscaping could enhance the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is backland and because of this is very enclosed and would not compromise wider views of the landscape. The site does not impact on the historic environment.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and	No impact	○	Low	Local	None	None

diverse economic growth that supports communities within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a mixture of brownfield and Greenfield Grade 3 agricultural land.	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village, although there is no clear means to provide vehicular access to serve the site, there is a public right of way crossing the site that leads towards the village and out into the countryside. There is a footpath to the village centre along Station Road and Elm Crescent.	<b>?</b>	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village, there is a public right of way crossing the site that leads towards the village and out into the countryside. There is a footpath to the village centre but this site is backland and the vehicle access would have to run down the side of an existing dwelling which is set close to the corner of the adjacent road, this would not be an ideal situation and would compromise the visual and residential amenities of the existing dwelling.	<b>?</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	<b>✓</b>	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village, there is a public right of way crossing the site that leads towards the village and out into the countryside, which should be retained in any future development.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village, there is a public right of way crossing the site that leads towards the village and out into the countryside. There is a footpath to the village centre along station Road and Elm Crescent.	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk. It is close to services and facilities with a footpath along Station Road and Elm Crescent to the centre of the village. A public right of way crosses the site, also facilitating access to the village and the surrounding countryside. The site is backland and enclosed so would not compromise the wider landscape and any landscaping could enhance biodiversity. The site would not impact on the historic environment. This is a backland site and the vehicle access would have to run down the side of an existing dwelling which is set close to the corner of the adjacent road, this would not be an ideal situation and would compromise the visual and residential amenities of the existing dwelling.</p>						

<b>Site Reference Number: BLM301</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The boundary treatments of the site are hedgerows and trees, and there is a large pond on the east of the site. Any development of the site would be detrimental to the biodiversity because the pond and its surrounding grassland will contain wildlife.	X	High	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site itself is at the back of the dwellings along Doubledays Lane and is enclosed and would not significantly impact on the wider landscape. However, the land to the west, if it was developed, is quite open. There is no boundary treatment to the west, as the area identified is a line on a plan and not a field boundary, so development would be visible in views from the west and from the footpath to the south. Development would block views over the adjacent countryside. The site does not impact on the townscape or historic environment.	X	✓	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact		0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk		✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact		0	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	X		Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is 900 metres from the school and doctor's surgery and over 1km from other services and facilities in the village. There is a footpath to the village centre.		✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact		0	Low	Local	None	None

9. Support inclusive, safe and vibrant communities.	The site is 900 metres from the school and doctor's surgery and over 1km from other services and facilities in the village. There is a footpath to the village centre	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is 900 metres from the school and doctor's surgery and over 1km from other services and facilities in the village. There is a footpath to the village centre	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is 900 metres from the school and doctor's surgery and over 1km from other services and facilities in the village. There is a footpath to the village centre	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk. It is 900 metres from the school and doctor's surgery and over 1km from other services and facilities with a footpath to the centre of the village. The site to the rear of Doubledays Lane is enclosed so would not compromise the wider landscape, the part of the site to the east is more open and there would be some degradation of the landscape and the site would be prominent in views from the public footpath to the south. There is a large pond on the east of the site. Any development of the site would be detrimental to the biodiversity because the pond and its surrounding grassland will contain wildlife. The site would not impact on the historic environment.</p>						

<b>Site Reference Number: BLM302</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals)	The site is in agricultural use with good boundary treatment of mature trees and hedgerows. The site includes a large part of The Hollies Field Local Wildlife Site	X	High	Local	Permanent	Long

and geodiversity.	(LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of water bodies containing breeding populations of great crested newts. Development could result in significant negative impacts on the nature conservation value of a LWS. This assessment is support, through the June 2016 consultation, by the Local Wildlife Trust and Greater Lincolnshire Nature Partnership.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a parcel of agricultural land which slopes up slightly from Orby Road to the village, apart from the boundary treatments which go some way to screen the site from wider views it is quite open and its development would impact somewhat on the landscape. There is a public right of way that crosses the site and extends into the countryside beyond. Views from this footpath would be negatively affected.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	<b>✓</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village via Station Road which has a footpath to the village centre. Given the size of the site it would most likely have to provide some green infrastructure and or open space.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village via Station Road which has a footpath to the village centre.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village via Station Road which has a footpath to the village centre. The site would be required to provide green infrastructure which will contribute to healthy lifestyles. A public right of way crosses the site and this should be retained to facilitate access to the open countryside.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village via Station Road which has a footpath to the village centre.	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk. It is close to services and facilities with a footpath to the centre of the village. The site is in agricultural use with good boundary treatment of mature trees and hedgerows, these go some way to screen the site from impact on the wider landscape, but there will be some impact due to the topography of the site. Development on the site would be prominent in view from the public right of way that crosses the site and travels beyond the site into open countryside. The site includes a large part of The Hollies Field Local Wildlife Site (LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of waterbodies containing breeding populations of great crested newts. Development could result in significant negative impacts on the nature conservation value of a LWS. The site would not impact on the townscape or historic environment.</p>						

**Site Reference Number: BLM303**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site in agricultural use with good boundary treatment of mature trees and hedgerows. The site lies adjacent to the Hollies Field Local Wildlife Site (LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of water bodies containing breeding populations of great crested newts. Development could result in significant negative impacts on the nature conservation value of a LWS.	<b>X</b>	High	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a parcel of agricultural land detached from the main body of the village and in effect in the open countryside, it slopes up slightly from Orby Road to the village. Apart from the boundary treatments, which go some way to screen the site from wider views, it is quite open and its development would impact somewhat on the landscape. The site is close to the Conservation Area but development is unlikely to have a significant impact on its setting.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is not in flood risk	<b>✓</b>	Low	Local	None	None

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 375 metres from the majority of services and facilities in the village, so in terms of proximity, the site is accessible. However, Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways.	<b>X</b>	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 375 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open countryside. Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	<b>✓</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 375 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open	<b>X</b>	High	Local	Permanent	Long

	countryside. Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways.					
13. Positively plan for, and minimise the effects of, climate change.	The site approximately 375 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open countryside. Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways. Also, the site is adjacent to a Local Wildlife Site and will further constrain biodiversity, limiting its ability to respond to climate change.	<b>X</b>	Low	Local	Permanent	Long
Summary; The site is not in flood risk. It is approximately 375 metres from services and facilities, however, it is detached from the development of the village. Orby Road is a narrow lane with no footpaths or street lights and little prospect of creating footways. The site is in agricultural use with good boundary treatment of mature trees and hedgerows, these go some way to screen the site from impact on the wider landscape, but there will be some impact. The site lies adjacent to The Hollies Field Local Wildlife Site (LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of water bodies containing breeding populations of great crested newts. Development could result in significant negative impacts on the nature conservation value of a LWS and its ability to respond to climate change. The site would not impact on the townscape or historic environment.						

<b>Site Reference Number: BLM305</b>							
Any Assumptions:							
•							
Objectives	Likely Impact	Degree of Impact		Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	Part of the site is in arable use and is clearly regularly cropped. There are with good boundary treatments of mature trees and hedgerows which contribute to the potential for biodiversity on site and further landscaping within the site could enhance biodiversity on the site. The western part of the site has more of a parkland feel and has not been subject to intensive agriculture. It contains a scattering of trees protected by tree preservation orders. The western part	✓	<b>X</b>	Low	Local	Permanent	Long

	of the site could contain biodiversity which would be lost (this part of the site is likely to be discounted from consideration).					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a parcel of agricultural land opposite existing development and would form a natural extension to the village. It does have good boundary treatment, however these do not correspond to the boundaries of the site submitted, which has no boundary features and is open to the rest of the field and in nearby views. The distant hedges would block long distance views of and from the wider landscape, but good boundary treatment would be needed for the submitted area. The land slopes slightly downwards away from the village and development could be prominent in views from the south, however, there are strong landscape features which help to mitigate the impact in views from public arena. It would not impact on the townscape. The site is adjacent to the medieval Burgh Hall but there is now a buffer zone so it should not impact on its setting.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed	The District does not have very much brownfield land on which to develop	<b>X</b>	High	Local	Permanent	Long

land and minimise the loss of the best agricultural land and greenfield sites.	because it is predominately rural in nature; this site is Grade 3 agricultural land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village and Hall Lane has a footpath leading onto the wider footway network. The site is of a size that it could provide some green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village and Hall Lane has a footpath leading onto the wider footway network. The site is of a size that it could provide some green infrastructure	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village and Hall Lane has a footpath leading onto the wider footway network. The site is of a size that it could provide some green infrastructure	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village and Hall Lane has a footpath leading onto the wider footway network. The site is of a size that it could provide some green infrastructure	✓	Low	Local	Permanent	Long

Summary; The site is not in flood risk. It is close to services and facilities with a footpath in Hall Lane leading into the wider footway network. The site has good boundary treatment and because of this it is reasonably well screened from impact of views of the wider landscape. Part of the site is in agricultural use so landscaping could enhance biodiversity. The remainder of the site has a more parkland feel and may well be host to a variety of species which would be lost through development; this part of the site is likely to be excluded from consideration. The site would not impact on the townscape, however, it site is adjacent to Medieval Burgh Hall but there is a buffer zone so there should not be an impact on its setting or the historic environment.

**Site Reference Number: BLM307**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is in agricultural use, but not framed intensively. It has good boundary treatment of mature trees and hedgerows. There is also a watercourse along the southern edge of the site, These factors could mean that there is potential for biodiversity on the site. Landscaping within the site could enhance biodiversity on the site.	?	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a parcel of agricultural land with good boundary treatment. Development would not impact on the wider landscape because it is well screened in views from the north from the bypass and the land to the south has planning permission and will be developed eventually.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is nearly all in the orange zone (danger to most) on the EA flood hazard maps.	X	High	Local	Permanent	Long

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is quite far from services and facilities, the site to the south has planning permission but the two sites are separated by the Catchwater Drain and there are no links between the two sites shown on the planning permission, so this site has the impression of being detached from the village. Common Lane is a narrow lane with no footpaths or street lights and little prospect of creating footways.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None

Common Lane is a narrow lane with no footpaths or street lights and little prospect of creating footways. The site is in agricultural use with good boundary treatment of mature trees and hedgerows, these go some way to screen the site from impact on the wider landscape, especially to the north where there is the bypass and to the south where new development will eventually be built. The site would not impact on the townscape or historic environment.</p>						

**Site Reference Number: BLM308**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with quite an open feel to it and trees along the western and southern boundaries. As the field has not been intensively farmed, it is not known if there is any biodiversity on site. Landscaping could enhance biodiversity on the site.	<b>?</b>	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field leading out of the village, with a wide grassed verge and pavement outside running adjacent to the site. Development would not impact greatly on wider views of the landscape because along the grassed verge are mature trees blocking views, however, the site would be visible through the trees along Skegness Road. The site forms an important part of the setting of the village as you enter from the east. Also the footpath and wide verge form part of the setting of the village and interrupting them by the creation of an access and the loss of any of the trees would be detrimental to the townscape. There would be no impact on the historic environment.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is nearly all in the green and yellow zones on the EA flood hazard maps apart from a small corner in the east which is in the orange zone.	<b>✓</b>	Low	Local	Permanent	Long

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is close to services and facilities with a footpath leading back to the centre of the village.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is close to services and facilities with a footpath leading back to the centre of the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is close to services and facilities with a footpath leading back to the centre of the village.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is close to services and facilities with a footpath leading back to the centre of the village.	✓	Low	Local	Permanent	Long

Summary; The site is nearly all in the green and yellow zones on the EA flood hazard maps apart from a small corner in the east which is in the orange zone (danger for most). The site is quite open and though development would not impact greatly on wider views of the landscape because along the wide grassed verge and footpath which runs adjacent to the site are mature trees. However, the development would be visible through the trees along Skegness Road and the site does form an important part of the setting of the village as you enter from the east. Also the footpath and wide verge form part of the setting of the village and interrupting them by the creation of an access and the loss of any of the trees would be detrimental to the townscape. There would be no impact on the historic environment.

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with good boundary treatment, including that to the rear boundaries of properties which back onto the site. The site has been arable production and there may be opportunities through landscaping to enhance biodiversity on the site. Following the submission of a planning application on the frontage of the site in 2016, an ecological assessment identified that the site possessed sufficient interest to meet the criteria for a Local Wildlife Site. The application was deferred, but not on matters pertaining to biodiversity.	<b>X</b>	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with good boundary treatment, development would not impact greatly on wider views of the landscape. However, there is a public right of way crossing the site and care should be taken through the development to incorporate this in a way that retains some of its rural aspect. There would be no impact on the historic environment or townscape.	<b>O</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and	No impact	<b>O</b>	Low	Local	None	None

pollution and minimise the impacts of unavoidable losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is close to services and facilities but there is no footpath or street lighting in this part of Wildshed Lane not until you get to Linden Drive, which is not far. There is room to the creation of a footway but it would result in the loss of some boundary treatment and it is not clear if the footpath can be directly connected as it would appear to have to cross private land. There is a public right of way which crosses the site and provides a direct access to West End and thence to the centre of the village.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is close to services and facilities but there is no footpath or street lighting in this part of Wildshed Lane not until you get to Linden Drive, which is not far, there is room to the creation of a footway but it would result in the loss of some boundary treatment and it is not clear if the footpath can be directly connected as it would appear to have to cross private land. Summary; The site is not in flood risk being in the yellow and green zones on the EA flood hazard maps. It is quite far from services and facilities. Common Lane is a narrow lane with no footpaths or street lights and little prospect of creating footways. The site is a grassed field with poor boundary treatment, to the north where there is the bypass the screening blocks views of the wider landscape. The site would not impact on the townscape or historic environment.						

**Site Reference Number: BLM312**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is grassed fields with good boundary treatment along Ingoldmells Road but it is open along the main road into Burgh le Marsh. There is a watercourse along the eastern edge of the site which may have potential for biodiversity. There are also some internal hedges which could be used as a framework for biodiversity on the site and additional landscaping could enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is grassed fields with good boundary treatment, along Ingoldmells Road but it is open along the main road into Burgh le Marsh. Development would have some impact on wider views of the landscape from the main road and potentially from the bypass at the most northern part of the site. There would be no impact on the historic environment but there would be an impact on the townscape, this site formed part of Burgh Common and is a green entrance into the village and enhances the village's rural setting. Its loss would be detrimental to this setting and the character of the village. The creation of an access onto the Main Road may involve the loss of some of the mature trees which sit in the wide grassed verge running adjacent to the site, this also would be detrimental to the townscape.	X	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the	No impact	0	Low	Local	None	None

impacts of unavoidable losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The majority of the site running north to south is in the orange zone (danger for most) on the EA flood hazard maps, this has reduced the capacity of the site significantly in the Strategic Housing Land Availability Assessment.	<b>X</b>	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is close to services and facilities with a footpath connection to the centre of the village. A site of this size could provide some green infrastructure and or open space, and this may be required as part of SUDS.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is close to services and facilities with a footpath connection to the centre of the village. A site of this size could provide some green infrastructure and or open space.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities, and this may be required as part of SUDS.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is close to services and facilities with a footpath connection to the centre of the village. A site of this size could provide some green infrastructure and or open space, and this may be required as part of SUDS.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is close to services and facilities with a footpath connection to the centre of the village. A site of this size could provide some green infrastructure and or open space, and this may be required as part of SUDS.	✓	Low	Local	Permanent	Long

Summary; The majority of the site running north to south is in the orange zone (danger for most) on the EA flood hazard maps, this has reduced the capacity of the site significantly in the Strategic Housing Land Availability Assessment. The site is close to services and facilities with a footpath connection. The site is grassed fields with good boundary treatment, along Ingoldmells Road but it is open along the main road into Burgh. Development would have some impact on wider views of the landscape from the main road and potentially from parts of the bypass. There would be no impact on the historic environment but there would be an impact on the townscape, this site formed part of Burgh Common and is a green entrance into the village and enhances the villages rural setting, its loss would be detrimental to this setting and the character of the village. The creation of an access onto the Main Road may involve the loss of some of the mature trees which sit in the wide grassed verge running adjacent to the site; this also would be detrimental to the townscape.

**Site Reference Number: BLM313**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with no boundary treatment along Wildshed Lane but hedges along the other boundaries as well as the rear boundaries of properties which back onto the site. Landscaping would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a flat agricultural field with poor boundary treatment along Wildshed Lane leaving the site open to wider views of and from the landscape. The frontage of the site has planning permission already for housing, so development of the remainder of the site would not impact greatly on wider views of the landscape because this will block views. There would be no impact on the historic environment or townscape.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 400m from the school and doctor's and over 800m from other services and facilities. The access for the planning permission on the frontage exits the site opposite the footpath which starts at Linden Drive, and space has been left alongside the planning permission site to land at the rear.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe	The site is approximately 400m from the	✓	Medium	Local	Permanent	Long

and vibrant communities.	school and doctor's and over 800m from other services and facilities. The access for the planning permission on the frontage exits the site opposite the footpath which starts at Linden Drive, and space has been left alongside the planning permission site to land at the rear.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 400m from the school and doctor's and over 800m from other services and facilities. The access for the planning permission on the frontage exits the site opposite the footpath which starts at Linden Drive, and space has been left alongside the planning permission site to land at the rear.	✓	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is approximately 400m from the school and doctor's and over 800m from other services and facilities. The access for the planning permission on the frontage exits the site opposite the footpath which starts at Linden Drive, and space has been left alongside the planning permission site to land at the rear.	✓	Medium	Local	Permanent	Long
Summary; The site is outside flood risk, it has no boundary treatment along Wildshed Lane, this would impact on wider views of the landscape but planning permission has been granted on the frontage for housing thus mitigating against any impact. The site is close to services and facilities' but there is no footpath or lighting in this part of Wildshed Lane, the nearest footpath is not far and one could be created. The site would not impact on the townscape or historic environment.

There is no footpath connection or street lighting until reaching the built up part of Wainfleet Road.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	<b>✓</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy	It is close to 700m from the school and doctor's surgery and approximately 1km for other services and facilities. However, the	<b>X</b>	Medium	Local	Permanent	Long

lifestyles”	site is moving away from them as it moves into the open countryside. There is no footpath connection or street lighting until reaching the built up part of Wainfleet Road.					
13. Positively plan for, and minimise the effects of, climate change.	It is close to 700m from the school and doctor’s surgery and approximately 1km for other services and facilities. However, the site is moving away from them as it moves into the open countryside. There is no footpath connection or street lighting until reaching the built up part of Wainfleet Road.	<b>X</b>	Medium	Local	Permanent	Long
Summary; The site is not in flood risk. The site is agricultural fields with poor boundary treatment along Wainfleet Road and along the other (artificially drawn) boundaries. Development would have an impact on wider views of the landscape. There would be no impact on the historic environment but there would be an impact on the townscape, this site forms an open green entrance into the village and enhances the villages rural setting, its loss would be detrimental to this setting and the character of the village. It is reasonably close to services and facilities but the site is moving away from them as it moves into the open countryside and there is no footpath connection or street lighting until the built up part of Wainfleet Road to facilitate access.						

<b>Site Reference Number: BLM316</b>						
Any Assumptions:						
<ul style="list-style-type: none"> <li>•</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas’ biodiversity (native plants and animals) and geodiversity.	The site is a series of buildings currently being used as holiday cottages. If the buildings are to be used for permanent residential use, there is not space within the site for additional landscaping. If the owner is proposing demolition and redevelopment, some additional landscaping could be introduced, but it is unlikely to be sufficient to have an impact on biodiversity,	<b>0</b>	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is currently a series of buildings currently being uses as holiday cottages. They are of an old design appear to be converted agricultural buildings and demolition of them would impact on the street scene and townscape, replacement buildings would have to be of a similar or better quality.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site is a current holiday let business, so any change to this site would remove a economic use, albeit a small one.	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is brownfield land but there are presently holiday cottages on it and these could be converted to dwellings rather than demolition.	✓	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to 700m from the school and doctor's surgery and approximately 1km for other services and facilities. However, there is no footpath or street lighting in this part of Wainfleet Road.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to 700m from the school and doctor's surgery and approximately 1km for other services and facilities.	✓	Medium	Local	Permanent	Long

	However, there is no footpath or street lighting in this part of Wainfleet Road.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to 700m from the school and doctor's surgery and approximately 1km for other services and facilities. However, there is no footpath or street lighting in this part of Wainfleet Road.	✓	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to 700m from the school and doctor's surgery and approximately 1km for other services and facilities. However, there is no footpath or street lighting in this part of Wainfleet Road.	✓	Medium	Local	Permanent	Long
Summary: The site is outside flood risk. It is already used for holiday cottages which are nicely converted agricultural buildings. The site would not impact on wider views of the landscape but the buildings do sit well in the street scene and demolition and rebuild could have an impact on this. The site is relatively close to services and facilities but there is no footpath or lighting in this part of Wainfleet Road. The site would not impact on the historic environment.

8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is reasonably close to services and facilities. There is no footpath connection or street lighting in this part of Orby Road with no possibility of footway creation. The	<b>X</b>	Medium	Local	Permanent	Long

	two possible accesses into the site, one is on a blind bend and one goes past dwellings and would have a detrimental impact on the occupiers of those dwellings.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is reasonably close to services and facilities. There is no footpath connection or street lighting in this part of Orby Road with no possibility of footway creation.	✗	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is reasonably close to services and facilities. There is no footpath connection or street lighting in this part of Orby Road with no possibility of footway creation.	✗	Medium	Local	Permanent	Long
Summary; The site is not in flood risk. The site is enclosed by hedges and trees and would not impact on the wider landscape. It is close to services and facilities but there is no footpath or street lighting in this part of Orby Road and no possibility of footpath creation. There are two accesses to the site and both are difficult. One is on a blind bend and the other would affect the residents of adjoining houses. The site would create an inappropriate extension of the built up area into the open countryside that would be poorly related to the existing settlement pattern						

<b>Site Reference Number: BLM318</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is grassed fields with mixed boundary treatment along Station Road, which is sparse in some places and quite mature in others. There are mature trees within the site and along the southern and	?	Low	Local	Permanent	Long

	western boundaries. As the site has not been developed or intensively farmed, it may play host to a variety of species and building on the site could impact on that. Additional landscaping as part of the development could enhance biodiversity on the site but this depends on how intensively the site is developed. An ecological assessment of the site will be necessary to establish the level of biodiversity present and the impact any development of the site may have.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is grassed fields with mixed boundary treatment along Station Road, which is sparse in some places and quite mature in others. This site is only proposed for frontage development, which would block the views to the wider landscape and involve their loss by doing this. It would leave the rear of the site with its mature boundary treatment intact so protecting some of the landscape quality. However, there is a public footpath running along the rear of the wider site between this mature boundary and the area for development. The frontage development will be prominent in views from the footpath unless the rear boundaries of the properties have significant landscaping. There is no impact on the townscape or historic environment. Consultation response to the June 2016 Plan received a query from Historic England in respect of potential medieval remains in connection with the site, and this will require further investigation.	<b>?</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None

4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 600 metres from the school and doctor's surgery and over 800 metres from other services and facilities. There is a footpath on the opposite side of the road and there is room to form a footpath on the same side of the road as the site.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 600 metres from the school and doctor's surgery and over 800 metres from other services and facilities. There is a footpath on the opposite side of the road and there is room to form a footpath on the same side of the road as the site.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 600 metres from the school and doctor's surgery and over 800 metres from other services and facilities. There is a footpath. on the opposite side of the road and there is room to form a footpath on the same side of the road as the site.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is approximately 600 metres from the school and doctor's surgery and over 800 metres from other services and facilities. There is a footpath on the opposite side of the road and there is room to form a footpath on the same side of the road as the site.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is grassed fields with mixed boundary treatment along Station Road. Its untouched nature means that the potential for biodiversity is not known at this stage. This site is only proposed for frontage development, this would block the views to the wider landscape and involve their loss by doing this. It would leave the rear of the site with its mature boundary treatment intact, however, the site would be visible in view from the public footpath that runs through the rear of the site. It is close to services and facilities with a footpath on the opposite side of the road; there is also room to form a footpath on the same side of the road as the site. Consultation response to the June 2016 Plan received a query from Historic England in respect of potential medieval remains in connection with the site, and this will require further investigation.

Objectives	Likely Impact	Degree of	Likelihood	Scale	Permanence	Duration

		Impact	of Impact			
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site in agricultural use with good boundary treatment of mature trees and hedgerows. The site lies close to the Hollies Field Local Wildlife Site (LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of waterbodies containing breeding populations of great crested newts. There is a pond within the site and this could link to the water feature on adjacent sites, creating part of a network. Development could result in negative impacts on the nature conservation value of a LWS.	<b>X</b>	High	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a parcel of agricultural land detached from the main body of the village and in effect in the open countryside. There are no footways linking the site into the village and the creation of these will also impact on local character. The site slopes up slightly from Orby Road to the village. Apart from the boundary treatments, which go some way to screen the site from wider views, it is quite open and its development would impact somewhat on the landscape. The site abuts the Conservation Area boundary and development is likely to have a significant impact on its setting. There are also distant views across the site to the listed Hanson's Windmill.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	<b>✓</b>	Low	Local	None	None

5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 300 metres from the majority of services and facilities in the village, so in terms of proximity, the site is accessible. However, Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways.	<b>X</b>	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 300 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open countryside. Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	<b>✓</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 300 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open countryside. Orby Lane does not have a	<b>X</b>	High	Local	Permanent	Long

	footpath nor any street lighting with little possibility of the provision of footways.					
13. Positively plan for, and minimise the effects of, climate change.	The site approximately 300 metres from the majority of services and facilities in the village, however, it is detached from other development and is in effect in the open countryside. Orby Lane does not have a footpath nor any street lighting with little possibility of the provision of footways. Also, the site is close to a Local Wildlife Site and will further constrain biodiversity, limiting its ability to respond to climate change.	<b>X</b>	Low	Local	Permanent	Long
<p>Summary; The site is not in flood risk. It is approximately 300 metres from services and facilities; however, it is detached from the development of the village. Orby Road is a narrow lane with no footpaths or street lights and little prospect of creating footways. If footpaths were provided, these would change the rural character of Orby Lane. The site is in agricultural use with good boundary treatment of mature trees and hedgerows, these go some way to screen the site from impact on the wider landscape, but there will be some impact. The site lies close to The Hollies Field Local Wildlife Site (LWS). This site is noted for its neutral grassland habitats with ridge and furrow features and for the presence of waterbodies containing breeding populations of great crested newts. There is a pond within the site and this could link to the water feature on adjacent sites, creating part of a network. Development could result in potential negative impacts on the nature conservation value of a LWS and its ability to respond to climate change. The site abuts close to the Conservation Area boundary but and development is unlikely to have a significant impact on its setting. There are also distant views across the site to the listed Hanson's Windmill.</p>						

## CONINGSBY AND TATTERSHALL

<b>Site Reference Number: C&amp;T009</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is side garden which is partly landscaped with large hedgerow along part of the frontage and partly quite wild. There are mature trees along the northern boundary. Development of the site would have some harm on the biodiversity.	<b>X</b>	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is side garden which is enclosed by the built environment and would not impact on the wider landscape. However, the site is located next to a Grade II listed building and forms part of its setting, development of the site would impact on the setting and character of the listed building.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in flood zone 2.	<b>X</b>	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is garden land and so greenfield.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is close to services and facilities with a footpath connection to the centre.	<b>✓</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is close to services and facilities with a footpath to the centre. The site is adjacent to a Grade II listed building and therefore development on the site including the access would harm the setting and character of the listed building.	<b>X</b>	High	Local	Permanent	Long

10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which along with Coningsby is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is close to services and facilities with a footpath to the centre, including the sport's field which supports a number of activities.	✓	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	Although bringing positive aspects to minimising climate change in that the site is close to services and facilities with a footpath to the centre, the site will impact negatively on biodiversity.	○	High	Local	Permanent	Long
<p>Summary: The site is in flood zone 2. The site is side garden which is partly landscaped with large hedgerow along part of the frontage and partly quite wild with mature trees to the northern boundary. Development of the site would have some harm on the biodiversity. The site is located next to a Grade II listed building and forms part of its setting, development of the site would impact on the setting and character of the listed building, leaving it hemmed in without any garden around it. It is close to services and facilities with a footpath to the centre. The creation of an access to support development of the site would also harm the setting and character of the listed building.</p>

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	Site is a field with open boundaries. The Pingle Local Nature Reserve is close by and there are opportunities for landscaping to link to this site to improve the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a field with open boundaries, to the south is the Coningsby Industrial Estate and the north housing development. The site is quite well enclosed and would not have an impact on wider views. There is no impact on the townscape it is a natural extension to the built environment in this part of Coningsby. There is no impact on the historic environment.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	Development on this site would prevent any future expansion of the industrial estate in this direction.	X	Low	Local	None	None

6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is quite close to services and facilities and there is a footpath connection. The site will have to provide a green buffer to the adjoining industrial estate so this could provide green space.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is quite close to services and facilities and there is a footpath connection. The site will have to provide a green buffer to the adjoining industrial estate so this could provide green space. A vehicle access can be provided.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which along with Tattershall is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is quite close to services and facilities and there is a footpath connection. The site will have to provide a green buffer to the adjoining industrial estate so this could provide green space. There is a public footpath adjacent to the site which could encourage walking. The site is close to The Pingle Local Nature Reserve and is approx 1.5 km from the local sports ground which supports a number of activities.	✓	Medium	Local	Permanent	Long

13. Positively plan for, and minimise the effects of, climate change.	The site is quite close to services and facilities and there is a footpath connection. The site will have to provide a green buffer to the adjoining industrial estate so this could provide green space. The site is also close to The Pingle Local Nature Reserve so there are opportunities for landscaping and green space to create links to this for the benefit of biodiversity.	✓	Medium	Local	Permanent	Long
---	---	---	--------	-------	-----------	------

Summary: The site is not in flood risk. The site is a field with open boundaries, to the south is the Coningsby Industrial Estate and the north housing development. The site is quite well enclosed and would not have an impact on wider views. There is no impact on the townscape it is a natural extension to the built environment in this part of Coningsby. There is no impact on the historic environment. The site is quite close to services and facilities and there is a footpath connection. The site will have to provide a green buffer to the adjoining industrial estate so this could provide green space and could link to the adjacent Local Nature Reserve at The Pingle to the benefit of biodiversity. There is a public footpath adjacent to the site which could encourage walking.

**Site Reference Number: Coningsby/Tattershall Employment Land**

Any Assumptions:

- That land to the east of Coldham Road will not be available for employment as it has been put forward for housing land in the SHLAA.
- That no additional access will be obtained and the current road layout of Coldham Road Industrial Estate.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas biodiversity (native plants and animals) and geodiversity.	The land surrounding Coldham Road Industrial Estate is made up of agricultural land in arable production. These fields have little in the way of boundary treatment and are unlikely to be of significant value for biodiversity. However, the proposed area for growth extends close to the boundary of The Pingle Local Nature Reserve (LNR). The	<b>?</b>	High	Local	Permanent	Long

	LNR already co-exists with neighbouring development, as it is close to houses, however, there could still be negative impact on biodiversity on this site depending on the nature of businesses on the industrial estate.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The land surrounding Coldham Road Industrial Estate is comprised of agricultural land with little intervening hedgerows or other landscaping. The site will be visible from local housing developments. There are also two public rights of way (one to the north and one some way further south) and any extension will be highly visible from these. The current industrial estate has little in the way of landscaping, and this will be compounded by any extension.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	The site is on grade 3 agricultural land, there are no other impacts on natural resources.	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in a flood risk area	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	The site would provide increased opportunities for investment. The site will provide for new businesses, allow expansion of existing ones, and allow opportunity for networks of businesses to develop.	✓	Medium	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green	The site is located on the eastern edge of Coningsby. As an employment site, it is unlikely to provide, or be required to	<b>X</b>	Medium	Local	Permanent	Long

infrastructure including the promotion of sustainable modes of access.	provide, additional green infrastructure. The site is located approximately 1.5km from the centre of Coningsby and 2.75km from the centre of Tattershall. It is closer to a number of areas of housing. There are lit footways from the centre, and from the housing, to the industrial estate. Although there is a bus route passing close to the site, it does not pass the site at a time conducive to normal working hours.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	There is safe access to the site, being off an existing serviced industrial estate with footways and footway lighting. In providing the opportunity for additional jobs, this also helps towards creating a vibrant community.	<b>✓</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	The site makes no contribution to housing need, being an industrial development.	<b>X</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site does not contribute to healthy lifestyles. People may walk or cycle to work but this is a bi-product of the sites' location rather than a positive aim of the proposal.	<b>X</b>	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is located on the eastern edge of Coningsby. Although it is possible to walk and cycle to the site, it is some distance, especially from Tattershall, and there are no dedicated pedestrian or cycle routes. A bus route passes close to the site, however, it does not pass the site at a time conducive to normal working hours.	<b>X</b>	Low	Local	Permanent	Long

Summary: A requirement for an additional 1.5 - 3ha of employment land has been identified over the plan period. There are no options available in Coningsby or Tattershall that would enable brownfield land to come forward to fulfil this need; there being little available brownfield land. This means that the only options available to the Council will be edge of settlement locations on greenfield land. There are a number of issues that influence the choice of employment land in and around Coningsby and Tattershall. To the south west of Tattershall is an environmentally sensitive area around the castle and church and Castle Leisure Park Local Wildlife Site. To the north of Tattershall the road network is not sufficient to accommodate a lot of commercial traffic and development would start to move towards the Tattershall Carss site of Special Scientific Interest. A large area around Tattershall is in flood risk from the Rivers Bain and Witham. Although this does not preclude commercial development, development in the remaining areas around Tattershall would be breaking into open countryside and involve the creation of commercial development where this does not already exist. To the south of Coningsby is the RAF base, which precludes any development in this direction. There is little space immediately to north as housing development wraps round along Hunters Lane and the land in between Hunters Lane and High Street is quite environmentally sensitive, has the River Bain flowing through it and is in flood risk. To the west of Coningsby is the Allan Barker Recreation Ground and The Ings Local Wildlife Site. This leaves the only real direction of growth to the east. Given the factors outlined above, the most appropriate option is considered to be an extension of the existing site at Coldham Lane. Although there are negative sustainability outcomes, based on it being a greenfield site, extending into the countryside, and being location on the edge of Coningsby, this would equally apply to other options and there would be other issues, such as flood risk and biodiversity which would also score negatively for other areas. The ability for an extension of the existing industrial land to help provide synergy between businesses potentially strengthens the economic outcomes from the development. It is therefore considered that this area provides the most suitable direction of growth for further employment development.

Summary: The site partly in the green zone (low hazard) on the EA hazard maps. Large field with hedges and trees for the boundary treatment. Planting along the eastern boundary is stronger than the western one. As the western boundary faces onto the open countryside, the site would be visible in views from Low Road but so there will be an impact on the wider landscape. There is no impact on the historic environment. Though development has occurred along Field Lane, Low Road and Church Lane in this part of the village and the separate clusters of the built environment are now merging together, this site is detached from the main body of the built environment and would in effect be protruding out into the open countryside. The site is Grade 1 agricultural land. The site is moving away from services and facilities and there is no footpath connection on either side of Low Road with no room to provide one, the nearest footpath is on Low Road approx 183 metres away. Low Road is quite narrow and rural in character. A site of this size would be required to provide a range of green infrastructure but this does not overcome the issues of its accessibility to existing services and facilities in the village.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a field with hedges, a small stand of trees, where the Low Road meets the Avenue and church End, which are TPO'd, and quite an open boundary along Church End and to the rear of the site along its eastern boundary. There is also a drainage ditch that runs through the field. Landscaping would be needed as part of the development, however, the site is very small and it is unlikely to significantly improve the biodiversity.	○	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a field with hedges, a small stand of trees, where the Low Road meets the Avenue and Church End, and quite an open boundary along the Avenue and to the rear of the site along its eastern boundary. There would not be an impact on the wider landscape because views beyond the site and into it from beyond are blocked by development and trees. With regard to the townscape, development has occurred along Low Road, Church End and the Avenue in this part of the village and the separate clusters of the built environment are now merging together. There is no impact on the historic environment. Historic England questioned the impact on the grade I listed church and the moated site to the south which is a Schedule Ancient Monument. The site is screen from the church by intervening vegetation. Although the moated site is closer, it is screened by intervening vegetation and built development.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None

4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk on the EA hazard maps.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 2 agricultural land	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to services and facilities and there is a footpath side of the site on Low Road/ Church End. There is a bus stop adjacent to the site.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is reasonably close to services and facilities and there is a footpath on the side of the site on Low Road/ Church End. There is a bus stop adjacent to the site. An access can be formed either on Low Road or Church End.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide	The site is reasonably close to services and	✓	Low	Local	Permanent	Long

the facilities and infrastructure for "healthy lifestyles"	facilities, including those for sport and recreation, and there is a footpath side of the site on Low Road/ Church End. There is a bus stop adjacent to the site. An access can be formed either on Low Road or Church End					
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably close to services and facilities and there is a footpath side of the site on Low Road/ Church End. There is a bus stop adjacent to the site. An access can be formed either on Low Road or Church End.	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk on the EA hazard maps. The site is a field with hedges, a small stand of trees where the Low Road meets the Avenue and Church End, and quite an open boundary along Church End and the eastern boundary to the open countryside. There would not be an impact on the wider landscape because views beyond the site are blocked by development and trees. With regard to the townscape, development has occurred along Low Road, Church End and the Avenue in this part of the village and the separate clusters of the built environment are now merging together. Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is open at the front with a disused farm building at the rear. Originally, site FRIS317 was assessed on this site only, but it has now been extended by the landowners to cover a much deeper site beyond, to include the site of development associated with the neighbouring business. There may be opportunities to improve biodiversity in association with the drains to the east of the site.	0	Low	Local	Permanent	Long

<p>2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.</p>	<p>The site is open at the front with a disused farm building at the rear. Originally, site FRIS317 was assessed on this site only, but it has now been extended by the landowners to cover a much deeper site beyond, to include the site of development associated with the neighbouring business. Views beyond the site are blocked by development. Views back into the site would be quite distant and viewed against existing development. A public right of way runs along the southern side of the site. While the development will alter the view from this footpath, the current view is largely of commercial buildings and so the change will be neutral, or with a well designed scheme, could be improved. The site is opposite the pub and a house, which are historic buildings, though not listed. It is also very close to the war memorial, which is of a unique design and is a prominent and attractive feature of local importance and which sits within the grounds of the grade I listed church, which is diagonally opposite the site. Opening the site up to more development than was previously envisaged, with the need for an access road, will change the way the site is developed and is likely to have a greater impact than the previous assessment foresaw. The site would also abut the Moated House Schedule Ancient Monument to the east. The area between the church and the moated house is already populated by housing and buildings relating to Lenton's business, so change will not necessarily be significant. However, as the site sits directly between these two heritage assets and, cumulatively, there is likely to be impact on their setting.</p>	<p><b>X</b></p>	<p>Low</p>	<p>Local</p>	<p>Permanent</p>	<p>Long</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
------------	---------------	------------------	----------------------	-------	------------	----------

<p>1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.</p>	<p>The site is a field edged by drainage ditches. Three of the boundaries to the site are demarked by mature trees and hedges and western boundary is lined with trees protected by tree preservation order. The road frontage to The Avenue is part hedge and part Lincolnshire Post and Rail fence. There is ample scope for biodiversity to be present on the site and this would need to be assessed.</p>	<p><b>?</b></p>	<p>Low</p>	<p>Local</p>	<p>Permanent</p>	<p>Long</p>
<p>2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.</p>	<p>The frontage of the site sits within the form of the village, although there is little depth development present in Friskney. There is strong boundary treatment, meaning that the site would not be prominent in the landscape. To the south of the site lies a group of listed properties: the church (grade I), along with the Old Vicarage and old Sunday School House (both grade II). The church yard cross is also a Scheduled Ancient Monument, although screened from the site by the church. The level of tree cover around these properties (the Old Vicarage is also surrounded by trees covered by a TPO) and the site means that the site is not visible from the listed buildings and vice versa. However, the tree cover to the south of the site is not protected and if this were to be lost, this would open up views to the listed group. The church is viewed in glimpses through the trees and in winter, without leaf cover, it will be more visible. Immediately south of the site are the Anchor Public House and adjacent property which, although not listed, are of historic interest.</p>	<p><b>X</b></p>	<p>Low</p>	<p>Local</p>	<p>Permanent</p>	<p>Long</p>

minimise the effects of, climate change.	and facilities.					
<p>Summary: The site is not in flood risk on the EA hazard maps. The site is a field edged by drainage ditches. Three of the boundaries to the site are demarked by mature trees and hedges and western boundary is lined with trees protected by tree preservation order. The road frontage to The Avenue is part hedge and part Lincolnshire Post and Rail fence. There is ample scope for biodiversity to be present on the site and this would need to be assessed. The frontage of the site sits within the form of the village, although there is little depth development present in Friskney. There is strong boundary treatment, meaning that the site would not be prominent in the landscape. To the south of the site lies a group of listed properties: the church (grade I), along with the Old Vicarage and old Sunday School House (both grade II). The church yard cross is also a Scheduled Ancient Monument, although screened from the site by the church. The level of tree cover around these properties (the Old Vicarage is also surrounded by trees covered by a TPO) and the site means that the site is not visible from the listed buildings and vice versa. However, the tree cover to the south of the site is not protected and if this were to be lost, this would open up views to the listed group. The church is viewed in glimpses through the trees and in winter, without leaf cover, it will be more visible. Immediately south of the site are the Anchor Public House and adjacent property which, although not listed, are of historic interest. The land is grade 2 agricultural land. The site is close to services and facilities, being located close to the centre of the village.</p>

There would not be an impact on the wider landscape because views beyond the site are blocked by the existing house and trees. With regard to the townscape, the site lies outside the main body of the village and is therefore effectively in the open countryside. The existing house has some historic value and its loss would not be supported, therefore any design of development on the site should support the character of the existing building. There is no impact on the historic environment. The site is part brownfield and part greenfield garden. The site is not close to the services and facilities' being some distance away from the core of the village and whilst there is a footpath outside the site the distance to the core would preclude walking.</p>						

## GRAINTHORPE

Site Reference Number: GRA209						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	There are hedgerows on the boundaries of the site, there will be some loss to create an access but landscaping the site could compensate for this.	<b>O</b>	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape to a degree because the land rises but this can be mitigated against by a landscaping scheme and retention of boundary features. It will not impact on the townscape or historic environment.	<b>X</b>	Medium	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in a white flood zone as per the Coastal Flood Hazard Maps	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is half grade 3	<b>X</b>	Medium	Local	Permanent	Long

	and half grade 2 agricultural land					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is linked to the core of the village which is in easy walking distance.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is linked to the core of the village	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including a shop which will encourage walking. Also the open countryside is adjacent to the site which will also encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop which will encourage walking.	✓	Low	Local	Permanent	Long
Summary : The site is located in a sustainable place within easy walking distance to the services and facilities in the village. There may be some loss of biodiversity by the loss of hedging for the creation of an access to the site. The site does not impact on heritage assets and any impact on the wider landscape could be mitigated against by a landscaping scheme.						

**Site Reference Number: GRA210**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	There is very little biodiversity on this site, boundary treatments are very poor, Any planting or landscape scheme will improve the quality and diversity of the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape because it offers wider views of the open countryside in a flat landscape. Development of the site will impact on these views.	X	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	O	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in an orange zone, danger to most on the coastal flood hazard zones	XX	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	O	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land	X	Medium	Local	Permanent	Long
7. Improve accessibility to	Though the site is within walking distance	X	Medium	Local	Permanent	Long

key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	of services and facilities, there is no footpath link on Beirgate nor on Main Road and no opportunity to create one without major infrastructure works.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	Though the site is within walking distance of services and facilities, there is no footpath link on Beirgate nor on Main Road and no opportunity to create one without major infrastructure works.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of the core of the village, which has services and facilities including a shop however, there is no footpath link on Beirgate nor on Main Road and no opportunity to create one without major infrastructure works. The site is adjacent to the open countryside which would encourage walking and cycling for recreational purposes.	<b>O</b>	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop however there is no footpath link on Beirgate nor on Main Road and no opportunity to create one without major infrastructure works. The site also lies in an area of flood risk.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site is located in a sustainable place within easy walking distance to the services and facilities in the village. There may need to be consideration of a footpath along Main Road but there is also access through Chapel Lane and this could provide a footway. The site does lie wholly in flood risk. The site does not impact on heritage assets, however, the site protrudes significantly into the open countryside in a part of the village where there is little development. Some mitigation could be achieved by landscaping but the site would still have a significant landscape impact.

**Site Reference Number: GRA211**

Any Assumptions:

12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Though the site is within walking distance of services and facilities, there is no footpath link on High Street or Main Road with no opportunity to create one without major infrastructure works. It is possible to walk along High Street but there are few street lights. The site is adjacent to the open countryside which would encourage walking and cycling	<b>O</b>	Low	Local	Permanent	Long

13. Positively plan for, and minimise the effects of, climate change.	Though the site is within walking distance of services and facilities, there is no footpath link on High Street or Main Road with no opportunity to create one without major infrastructure works. It is possible to walk along High Street but there are few street lights. The site also lies in an area of flood risk.	<b>X</b>	Medium	Local	Permanent	Long
---	---	----------	--------	-------	-----------	------

Summary: The site is located in a sustainable place within easy walking distance to the services and facilities in the village. However there is no footpath along High Street or Main Road. It is possible to walk along High Street but there are few lights. The site lies to the rear of High Street on land gently rising to the east, development would have some impact on wider views of the open countryside. The site lies in an area of orange flood risk (danger for most) on the coastal flood hazard maps.

<b>Site Reference Number: GRA303</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	There is very little biodiversity on this site, boundary treatments are very poor. Any planting or landscape scheme will improve the quality and diversity of the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will impact on the landscape of the historic environment because it offers middle distance views of listed buildings.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in an orange zone, danger to most and yellow, danger for some on the coastal flood hazard zones	<b>X</b>	Medium	Local	Permanent	Long

5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is 90% grade 3 agricultural land with the rest grade 2.	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities; the shop is adjacent to the site.	✓✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities; the shop is adjacent to the site. However, there are no footways along Buttgate, which will be used to reach most other services in the village. The site is also in a flood risk area.	<b>X</b>	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>0</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities; the shop is adjacent to the site. The site is adjacent to the open countryside which would encourage walking and cycling	✓✓	Low	Local	Permanent	Long

13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of services and facilities, the shop is adjacent to the site, this would encourage walking and cycling. However, the site is in a flood risk area.	✓/X	Low	Local	Permanent	Long
Summary: The site is located in a sustainable place within easy walking distance to the services and facilities in the village. It is adjacent to the shop in the village. Development would have an impact on the historic environment by impacting on views of listed buildings in the middle distance. The site lies in an area of orange flood risk (danger for most) and yellow flood risk (danger for some) on the coastal flood hazard maps.						

<b>Site Reference Number: GRA304</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The frontage of the site is open with mature boundary treatment to the northern boundary. Any planting or landscape scheme will improve the quality and diversity of the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will have some impact on the wider landscape but this can be mitigated against by a landscape scheme.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in an orange zone, danger to most on the coastal flood hazard zones	XX	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None

6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is Grade 3 agricultural land.	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is on the northern edge of the village services and facilities can be reached by walking but it is a fair distance.	<b>O</b>	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is on the northern edge of the village services and facilities can be reached by walking but it is a fair distance. There are not many street lights	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is adjacent to the open countryside which would encourage walking and cycling, though Wragholme Road is quite busy.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is on the northern edge of the village services and facilities can be reached by walking but it is a fair distance. There are not many street lights. The site is in area of flood risk.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site is within orange (danger to most) area on the Environment Agency's Hazard Maps. The site is open in nature along its frontage and set on the northern edge of the village, development would be detached from the main body of the village and perpetuate the linear pattern of the village moving development further away from the centre north westwards. Services and facilities can be reached on foot but it is some distance and there are very few street lights. There would some impact on the wider landscape but a landscape scheme could mitigate this.

**Site Reference Number: GRA305**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a brownfield site the present use being a public house, there is very little biodiversity on the site and development could be landscaped to improve this.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site would have no impact on the areas landscape or the townscape or historic landscape	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is situated in an orange zone, danger to most and yellow zone (danger to some) on the coastal flood hazard zones	✗	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	This site is the present public house which is still in use, its loss would impact on the facilities the village has to offer and lead to a loss of an employment opportunity and business in the village.	✘	High	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	✓	Low	Local	Permanent	Long

of the best agricultural land and greenfield sites.	it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. This site is brownfield.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities, whilst footways are not good, the roads are quiet, there are not many street lights. The site itself is a facility that will be lost if it closes down	<b>X</b>	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities, whilst footways are not good, the roads are quiet, there are not many street lights. The site itself is a facility that will be lost if it closes down, public houses go to support an inclusive and vibrant community. The site is also in a flood hazard area.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is in the centre of the village so its location would encourage walking	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is in the centre of the village so its location would encourage walking. However, the site is in a flood hazard area so does not address climate changes issues in terms of sea level rises.	✓/X	Low	Local	Permanent	Long

Summary: The site is a public house which is still in use, its loss would result in the loss of a facility in the village, a facility that assists in helping a community with its sustainability and inclusivity. The site can access the other facilities in the village, the roads are quiet though street lighting is not good. There is no impact on the wider landscape, townscape or historic environment.

**Site Reference Number: GRA307**

Any Assumptions:

13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of services and facilities. However, pedestrians would have to negotiate the bends on Main Road and there are no footways. The site is within a flood hazard area so does not address climate changes issues in terms of sea level rises.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site lies to the rear of the houses on Wragholme Road and the only access is from Main Road on the double bends over a culverted drain. Any pedestrian access would be difficult because of this. The site forms part of the rural backdrop of the village, though this could be mitigated against. Biodiversity could be improved by a landscape scheme. The site lies in an orange (danger for most) flood zone on the coastal flood zones. There is no impact on the historic environment.

**Site Reference Number: GRA308**

The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is Grade 3 agricultural land.	X	High	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot. However, the site is within a flood hazard area.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot. The site is in an area of flood risk	✗	Medium	Local	Permanent	Long
Summary: The site wraps around an existing house with mature gardens, it has good boundary treatments of mature hedging and any landscaping scheme would assist with biodiversity. The site does not impact on the wider landscape, townscape or historic environment. The site is in an orange zone (danger for all) on the hazard flood maps. There is a footway connection on the roadside side of the site to the village but the site itself sits outside the existing pattern of development.						

## HOGSTHORPE

### Site Reference Number: HOG301

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a Greenfield agricultural site with strong boundary hedgerows particularly on the western and northern sides. The frontage of the site, the northern boundary, has a mature hedge and trees, some of which is covered by a tree preservation order. Access will have to be carefully selected. Any landscaping scheme will improve quality and biodiversity of the site	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site would have limited impact on the wider landscape because it is well screened by mature hedges on all its outward facing boundaries. The site does not impact on the townscape or historic environment.	○	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in an orange zone (danger to most) on the coastal flood hazard maps	XX	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	Permanent	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	X	High	Local	Permanent	Long

of the best agricultural land and greenfield sites.	it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 2 agricultural land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	Though the site is not far from services and facilities it is not connected to the village by a footway and those using the facilities would have to traverse narrow Sea Lane. The road is very narrow and providing a footpath, without removing the mature hedges and protected trees on the site's frontage would be difficult.	<b>X</b>	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	Though the site is not far from services and facilities it is not connected to the village by a footway and those using the facilities would have to traverse narrow Sea Lane. The road is very narrow and providing a footpath, without removing the mature hedges and protected trees on the site's frontage would be difficult.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Though the site is not far from services and facilities it is not connected to the village by a footway and those using the facilities would have to traverse narrow Sea Lane. The road is very narrow and providing a footpath, without removing the mature hedges and protected trees on the site's frontage would be difficult. The site is	<b>O</b>	Low	Local	Permanent	Long

	adjacent to the open countryside which should encourage walking and cycling.					
13. Positively plan for, and minimise the effects of, climate change.	Though the site is not far from services and facilities it is not connected to the village by a footway and those using the facilities would have to traverse narrow Sea Lane. The road is very narrow and providing a footpath, without removing the mature hedges and protected trees on the site's frontage would be difficult. It is adjacent to the countryside this should encourage walking and cycling. The site is in area of flood risk.	<b>X</b>	High	Local	Permanent	Long
Summary: The site lies near to services and facilities but is not connected to them by a footway, so those trying to access those facilities would have to traverse a short portion of narrow Sea Lane. The road is very narrow and providing a footpath, without removing the mature hedges and protected trees on the site's frontage would be difficult. There would be opportunities to enhance existing landscaping on the site which should enhance biodiversity quality. The site does not impact on the townscape or historic environment. The site lies within an orange zone (danger to most) on the coastal flood hazard maps.						

<b>Site Reference Number: HOG303</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a Greenfield paddock with some boundary hedgerows but these are not within the site. The frontage is open. Any landscaping scheme will improve quality and biodiversity of the site	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site would have not have an impact on the wider landscape it is relatively enclosed. The site does not impact on the townscape or historic environment.	<b>O</b>	Low	Local	None	None
3. Protect natural resources from avoidable losses and pollution and minimise the	No impact	<b>O</b>	Low	Local	None	None

impacts of unavoidable losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in an orange zone (danger to most) on the coastal flood hazard maps	<b>XX</b>	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	Permanent	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	Though the site is not far from services and facilities there is no footway in Listoft Lane so those using the site would have to traverse this.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site lies near to services and facilities but there is no footway in Listoft Lane, so those trying to access those facilities would have to traverse a short portion of this Lane. The site lies in a wider landscape so its development would impact on this, any landscaping should enhance biodiversity quality. The site does not impact on the townscape or historic environment. The site lies within a red (danger for all) and an orange zone (danger to most) on the coastal flood hazard maps.

**Site Reference Number: HOG305**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a brownfield site with an existing employment use, there is very little biodiversity on the site and any development incorporating a landscape scheme would improve the position	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site would have little impact on the wider landscape, it is relatively enclosed and the site is already occupied by modern industrial buildings. The site does not impact on the townscape or historic environment. Landscaping would mitigate any of the impact and may improve the landscape.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in an orange zone (danger to most) on the coastal flood hazard maps	XX	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site is an existing employment site and its loss would mean less employment in the village and a loss of jobs	X	High	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	This site is brownfield land so would help to minimise the take up of greenfield land if it was brought forward.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	Though the site is not far from services and facilities there will need to be a footway created to link up with the existing footway at the adjacent site. This is possible.	○	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	Though the site is not far from services and facilities there will need to be a footway created to link up with the existing footway at the adjacent site. This is possible.	○	Low	Local	Permanent	Long
10. Ensure that local housing	There is an identified need for future	✓	Low	Local	Permanent	Long

needs are met.	housing growth in the settlement, which is a large village with a range of services and facilities					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Though the site is not far from services and facilities there will need to be a footway created to link up with the existing footway at the adjacent site. This is possible. The site is adjacent to the open countryside which should encourage walking and cycling.	<b>O</b>	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	Though the site is not far from services and facilities there will need to be a footway created to link up with the existing footway at the adjacent site. This is possible. The site is subject to high flood risk.	<b>X</b>	High	Local	Permanent	Long
Summary: The site lies near to services and facilities but there is no footway, it is possible to create one to link into the adjacent footpath on the adjacent development. The site does not impact on the wider landscape and has very little biodiversity any landscaping should enhance biodiversity quality. The site does not impact on the townscape or historic environment. The site lies within an orange zone (danger to most) on the coastal flood hazard maps.						

<b>Site Reference Number: HOG306</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a Greenfield agricultural site with some boundary hedgerows. Any landscaping scheme will improve quality and biodiversity of the site	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site would have some impact on the wider landscape, the land rises to the north west slightly so the wider landscape beyond the site is not visible, a landscaping scheme would assist in mitigating any impact.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in a flood zone, except a small portion which is in the green and yellow zones of the coastal hazard maps and therefore acceptable for development.	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	Permanent	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities and is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is	✓	Low	Local	Permanent	Long

	a large village with a range of services and facilities					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot; including recreational facilities. The site is also adjacent to the open countryside with a footpath going through the site into the countryside which should encourage walking and cycling.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is connected to the village by a footway on the roadside side of the site and services and facilities can be accessed by foot. There is a footpath going through the site and out into the countryside, this should encourage walking and cycling.	✓	Medium	Local	Permanent	Long
Summary: The site lies near to services and facilities, landscaping should enhance biodiversity quality. There will be an impact on the landscape as the site is on the edge of the village in open countryside. However, a landscaping scheme, supplementing the existing landscaping on site, will help to reduce this impact. The site does not impact on the townscape or historic environment. There is a footpath going across the site and out into the open countryside, this will need to be incorporated into the development and will encourage walking. There is a small amount of flood risk on the site but it falls within the green and yellow zones of the flood hazard maps so is acceptable to develop on.						

<b>Site Reference Number: HOG307</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and godiversity.	The site is a Greenfield agricultural site with little in the way of boundary treatment. Any landscaping or planting would enhance the quality and distinctiveness of the areas biodiversity	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site would have an impact on the wider landscape. Landscaping would mitigate some of the impact and may improve the landscape in this area. However, the site would still protrude significantly into open countryside. The site does not impact on the townscape or historic environment.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in an orange zone (danger to most) on the coastal flood hazard maps, with some parts of the site in the red zone (danger to all).	<b>XX</b>	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. This site is grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is not far from services and facilities. At the northern part of the site, Thames Street/ Sea Lane is very narrow. Forming a link here would require access across the neighbouring sites which has trees protected by a tree preservation order along its frontage which may make a continuous footpath link difficult to achieve. However, access to services and facilities could be gained through the southern part of the site, through existing neighbouring development.	<b>✓</b>	Low	Local	Permanent	Long
8. Increase reuse and	No impact	<b>O</b>	Low	Local	None	None

recycling rates and minimise the production of waste.						
9. Support inclusive, safe and vibrant communities.	Though the site is not far from services and facilities a footway would need to be formed to link into the existing footway network. ## HOLTON LE CLAY

Site Reference Number: HLC42						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a flat playing field with boundaries of mature hedging. Alongside the site is the former railway line which acts as a wildlife corridor and there may be some opportunity for development to enhance some biodiversity on the site through gardens and open space, linking to the former railway line.	○	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a flat playing field with boundaries of mature hedging. The site is reasonably enclosed by its boundaries, there is a public footpath running down the east side but this is enclosed by mature hedging and trees, so there would be limited impact on the landscape. A footpath also runs through the northern part of the site and this would have to be appropriately accommodated. There would be no impact on the townscape or historic environment.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities	The site is a playing field and therefore does not result in the loss of any employment.	○	Low	Local	Permanent	Long

within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a playing field and therefore greenfield.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance from the village centre with an access onto Beech Grove which has a footpath. Development of the site would however involve the loss of a playing field which is a key community facility.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance from the village centre with an access onto Beech Grove which has a footpath. Development of the site would however involve the loss of a playing field which is a key community facility.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance from the village centre with an access onto Beech Grove which has a footpath. Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an agricultural field with a drainage ditch and public footpath cutting through it. The boundaries are made up of intermittent hedgerows with an area to the west divided up as a separate parcel, which still contains some of the hard standing from the former RAF base. There are trees dividing this part of the site off from the rest. Development could make some improvements to biodiversity through gardens and open space and landscaping which will be required as part of any future development.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with a drainage ditch and public footpath cutting through it. The boundaries are made up of intermittent hedgerows with an area to the west divided up as a separate parcel, which still contains some of the hard standing from the former RAF base. There are trees cutting this part of the site off from the rest. The site is very open on the northern boundary and this leads to views across the site to the south and east, development	X	Medium	Local	Permanent	Long

	would impact on these views. Views into the site from the south and west are limited due to landscaping along the A16, although development would be more prominent if it was allowed to come too close to this boundary. The site would be a natural extension to the village, there would be minimal impact on the townscape. There is no impact on the historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	The site involves the loss of 17.7ha of grade 3 agricultural land, however, the majority of sites around Holton le Clay will result in the loss of agricultural land.	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact.	○	Low	Local	None	None

The boundary treatments are mature hedging and trees with drainage ditches running along the south and north boundaries. Development would cause some detriment to the biodiversity, however, at 4.77ha, there will be opportunities through open space and landscaping to offset this.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field. The boundary treatments are mature hedging and trees with drainage ditches running along the south and north boundaries. The site lies on a prominent corner and though the boundaries shield it from impact on the wider views there will be some impact on the landscape because of the sites prominent location. The site will be visible in views from the A16 as boundary treatments are not strong along the western boundary. The site does not impact on the townscape and has no impact on the historic environment.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact.	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is greenfield.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance from the village centre. Forming an access onto Louth Road will be difficult. At the western end of the site are traffic lights, the eastern end of the site is close to an adverse bend and the proximity of the junction with Carmen Crescent will present issues in the central part of the frontage. There is an	✓	Medium	Local	Permanent	Long

	access onto the A16 which is quite a distance from the traffic lights on the junction of the A16 and Louth Road but this may be dangerous for vehicles leaving the site. There is a footpath running along Louth Road on the opposite side from the site, any development would have to form a footpath on the same side as the site. The site would be required to provide green infrastructure to serve the site.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	0	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance from the village centre. Forming an access onto Louth Road will be difficult. At the western end of the site are traffic lights, the eastern end of the site is close to an adverse bend and the proximity of the junction with Carmen Crescent will present issues in the central part of the frontage. There is an access onto the A16 which is quite a distance from the traffic lights on the junction of the A16 and Louth Road but this may be dangerous for vehicles leaving the site. There is a footpath running along Louth Road on the opposite side from the site, any development would have to form a footpath on the same side as the site.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and	The site is within walking distance from the village centre. There is a footpath running	✓	Low	Local	Permanent	Long

infrastructure for "healthy lifestyles"	along Louth Road on the opposite side from the site, any development would have to form a footpath on the same side as the site. The site will be required to provide green infrastructure to serve the site and this may include space to encourage healthy lifestyles.					
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance from the village centre. There is a footpath running along Louth Road on the opposite side from the site, any development would have to form a footpath on the same side as the site. The site will have to provide green infrastructure which may help offset any harm to biodiversity caused by development.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is a grassed field. The boundary treatments are mature hedging and trees with drainage ditches running along the south and north boundaries. Development would cause some detriment to the biodiversity, however, at 4.77ha, there will be opportunities through open space and landscaping to offset this. The site lies on a prominent corner and though the boundaries shield it from impact on the wider views there will be some impact on the landscape because of the sites prominent location. The site will be visible in views from the A16 as boundary treatments are not strong along the western boundary. The site does not impact on the townscape and has no impact on the historic environment. The site is within walking distance from the village centre. Forming an access onto Louth Road will be difficult. At the western end of the site are traffic lights, the eastern end of the site is close to an adverse bend and the proximity of the junction with Carmen Crescent will present issues in the central part of the frontage. There is an access onto the A16 which is quite a distance from the traffic lights on the junction of the A16 and Louth Road but this may be dangerous for vehicles leaving the site. There is a footpath running along Louth Road on the opposite side from the site, any development would have to form a footpath on the same side as the site. Overall the difficulty with the accesses would preclude development of this site. This site has subsequently been granted planning permission.

1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a wood yard with its accompanying storage area and outbuildings. Boundary treatment is hedges and some trees. Although not a large site, there may be opportunities for landscaping could enhance biodiversity	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a wood yard with its accompanying storage area and outbuildings. Boundary treatment is hedges and some trees. The site is enclosed so there is no impact on the wider landscape. The site forms a natural extension to the built environment. There is no impact on the historic environment.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The rear portion of the site is in flood zone 3 with the front section and a portion in the middle out of flood risk.	✗	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site is a working wood yard employing people and its loss would involve the loss of jobs.	✗	High	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is brownfield land.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably near the town centre with footpath access. Given the flood risk on the site any development in this area would be more difficult and it could provide some green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is near the town centre with footpath access. There is already a satisfactory vehicle access into the site . However, approximately half of the site is in flood risk.	✗	Low	Local	Permanent	Long

10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Horncastle has a good range of sport and recreation facilities which are within walking distance of the site.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is near the town centre with footpath access. The site is alongside the River Bain and is in flood risk as a result. Climate change may impact on this, however, a flood alleviation scheme is planned for the River Bain and this will alleviate this situation.	✓	Low	Local	Permanent	Long
<p>Summary: The rear portion of the site is in flood zone 3 with the front section and a portion in the middle out of flood risk; meaning approximately half the site is in flood risk. The site is a wood yard with its accompanying storage area and outbuildings. Boundary treatment is hedges and some trees. The site is enclosed so there is no impact on the wider landscape. The site forms a natural extension to the built environment. There is no impact on the historic environment. As the site is a working wood yard employing people, its loss would involve the loss of jobs. The site is near the town centre with footpath access. There is already a satisfactory vehicle access into the site.</p>

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Horncastle has a good range of sport and recreation facilities and there is an access onto Spilsby Road and with a footpath to the town.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is 1.2km from the town centre, although other services and facilities are closer. The site has an access onto Spilsby Road and there is a footpath into the town.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is agricultural land used as grassland with limited boundary treatment except to the rear and very open along Spilsby Road. The site is very open and slopes gently downwards away from Spilsby Road this reveals wider landscape views to the north, development would impact on these views. The site lies at the edge of the built environment and as an extension to the town relates to the existing pattern of development. There is no impact on the historic environment. The site is 1.3km from the town centres, although other services and facilities are closer, and has an access onto Spilsby Road where there is a footpath to the town.

**Site Reference Number: HOR329**

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity	The site is three field parcels. Boundary treatment is of sparse hedges and trees. The Thunker Drain runs through the middle	✓	Low	Local	Permanent	Long

(native plants and animals) and geodiversity.	of the site and along part of the eastern boundary. Landscaping could enhance biodiversity; the drain should be protected because it will contain wildlife.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is three field parcels. Boundary treatment is sparse hedges and trees. The Thunker Drain runs through the middle of the site. Although the site is reasonably enclosed by its boundary treatment, development would be glimpsed in views from Mareham Road, there are also views to the wider landscape from Mareham Road because the site slopes gently downwards toward the road. The site lies outside the built environment and does not relate to the existing pattern of development. It would only be acceptable if HOR315 and HOR314 were developed. If that were the case then this site is a natural extension for the built environment. There is no impact on the historic environment.	✓	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk apart from the strip of land just around the drain.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to	The site is approx 1.5km from the town	✓	Low	Local	Permanent	Long

key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	centre with a footpath along Mareham Road. The site would be required to provide a comprehensive range of green infrastructure and the area around the Thunker Drain should be protected and could provide a green walkway through the site as part of this provision.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is 1.5km from the town centre with a footpath on Mareham Road. The area around the Thunker Drain should be protected and could provide a green walkway through the site. Along with HOR313, HOR315 and HOR314 the provision of a road from Mareham Road to Spilsby Road would move traffic around the town without having to go through the town centre, this would ease traffic flow issues.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	Horncastle has a good range of sport and recreation facilities, the largest cluster of which lie 1.75km from the site. A footpath on Mareham Road leads into the town and its services and facilities. The area around the Thunker Drain should be protected and could provide a green walkway through the site.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is 1.5km from the town centre with a footpath on Mareham Road leading to the town. The area around the Thunker Drain	✓	Low	Local	Permanent	Long

	<p>should be protected and could provide a green walkway through the site and enhance biodiversity. Along with HOR313, HOR315 and HOR330 the provision of a road from Mareham Road to Spilsby Road would move traffic around the town without having to go through the town centre, this would ease traffic flow issues and cut down journey times for those wishing to leave the town.</p>					
<p>Summary: The site is not in flood risk apart from the strip of land along the Thunker Drain which runs through the middle of the site. The site is three field parcels. Boundary treatment is sparse hedges and trees. Landscaping could enhance biodiversity; the drain should be protected because it will contain wildlife. Although the site is reasonably enclosed by its boundary treatment, development be glimpsed in views from Mareham Road and there are views to the wider landscape from Mareham Road because the site slopes gently downwards toward the road. <p><b>Site Reference Number: Horncastle Employment Land</b></p>						
<p>Any Assumptions:</p> <ul style="list-style-type: none"> <li>.</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
<p>1. Protect and enhance the quality and distinctiveness of the areas biodiversity (native plants and animals) and geodiversity.</p>	<p>The land to the south of Boston Road Industrial Estate is agricultural land in arable production. There are some drainage ditches within the site and the eastern boundary has a hedge line. To the south west of the site is the Horncastle Community Woodland. There may be opportunities here for field margins to be used for biodiversity, however there are unlikely to be significant effects.</p>	<p>✓</p>	<p>Medium</p>	<p>Local</p>	<p>Permanent</p>	<p>Long</p>

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The land to the south of Boston Road Industrial Estate is quite open along its boundaries. As development moves south from the current sites, it will move further into open countryside and be visible in views from the A153 and B1183. With little in the way of existing landscaping or intervening features landscaping will need to be provided with the development to soften its impact, especially as this is the entrance to the town. There is a public rights of way that cross the site and these will be affected by development and will need incorporating into any development.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	Part of the site is on grade 3 agricultural land and part is grade 2, there are no other impacts on natural resources.	<b>X</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in a flood risk area	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	The site would provide increased opportunities for investment in the town. The site will provide for new businesses and allow expansion of existing ones, and allow opportunity for networks of businesses to develop.	✓	Medium	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature. This site is a combination of Grade 2 and 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is located on the southern edge of Horncastle. As an employment site, it is unlikely to provide, or be required to provide, additional green infrastructure. The extension to the current industrial estate would be over 1.5km from the town	<b>X</b>	Medium	Local	Permanent	Long

	centres and, although it is closer to some housing areas, it is further from areas to the north and west of the town. The site is not served by a bus route that passes by at a time convenient for normal working hours. It is possible to walk or cycle to the industrial estate. However, currently, the only dedicated cycle path does not follow a direct route from the majority of the town; this may change if the proposals in the Horncastle Neighbourhood Plan come to fruition.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	There is safe access to the site, being off an existing serviced industrial estate with footways and footway lighting. In providing the opportunity for additional jobs, this also helps towards creating a vibrant community.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	The site makes no contribution to housing need, being an industrial development.	<b>X</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site does not contribute to healthy lifestyles. People may walk or cycle to work but this is a bi-product of the sites' location rather than a positive aim of the proposal.	<b>X</b>	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is located on the southern edge of Horncastle. Although it is possible to walk and cycle to the site, it is some distance from the northern and western parts of the town. There are no dedicated pedestrian routes, aside from roadside footways, or cycle routes (other than the one on the eastern side of the industrial estate). There	<b>X</b>	Low	Local	Permanent	Long

	are no buses that pass the site at a time convenient for normal working hours.					
<p>Summary: An additional area of between 5.5 and 9ha of additional employment land has been identified as being needed over the plan period. There are no options available in the town that would enable brownfield land to come forward to fulfil this need; their being little available brownfield land in the town. This means that the only options available to the Council will be edge of settlement locations on greenfield land. In narrowing down the options further, it is important that the site chosen has readily available and safe access to the Strategic Road Network to enable the movement of goods whilst causing minimum disturbance to residential areas of the town and avoiding, as far as is possible given the geography of Horncastle, the narrow historic streets in the town centre. As Horncastle sits around a cross roads of Strategic roads, this means that options for future employment growth could be located in any of the four directions radiating from the town; north, south, east or northwest. All would be on greenfield land. Any sites immediately to the north and east of the town would be on grade 3 agricultural land, whereas any sites to the west would be on grade 2 land. Land immediately west of the town is quite well landscaped, but would still be likely to have a negative impact on the landscape, given the nature of employment development which tends to be tall and utilitarian in design. The sites to the north and east are more open with less intervening landscaping and they would be visible in views on entering the town. There is also less of a commercial presence in these areas to soften the impact of the development. All of the sites would be on the edge of the town and, although close to some residential areas, would be disconnected from others at the opposite side of the town; but this would be true of any site, given their peripheral nature. To the north of the town, there is no bus service. Land to the east and west is on the route of the Inter Connect 6 bus which has a regular service, and to the south there is a less frequent service but neither of these enable arrival or departure at a time convenient for normal working hours. The site for additional land has been chosen to the south of Horncastle, extending the existing Boston Road Industrial Estate to accommodate additional demand. The scores above show that there are a number of potentially negative outcomes from this choice, which largely relate to its location on greenfield land and its distance from some areas of the town; particularly to the north and west. There are no more advantageous options for additional employment land emerging through the site selection process. Also, the ability for an extension of the existing industrial land to help provide synergy between businesses potentially strengthens the economic outcomes from the development. It is therefore considered that this provides the most suitable site for further employment development at Horncastle.</p>

<b>Site Reference Number: HUT206</b>						
Any Assumptions:						
<ul style="list-style-type: none"> <li>•</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site already has trees and hedgerows as its boundary features, some of the trees on the northern and part of the eastern boundaries are protected by a tree preservation order. Any landscaping scheme will enhance the biodiversity of the site	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will not impact on the wider views of the landscape because it is enclosed already by planting. The site will not impact on the townscape or historic environment.	○	Low	Local	None	None
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	○	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land	✗	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities and there is a footpath link on the opposite side of the road. There is a footpath adjacent to the site to the local church, which then links into the wider footway network.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities' and there is a footpath link on the opposite side of the road. There is a footpath adjacent to the site to the local church, which then links into the wider footway network.	✓	Low	Local	Permanent	Long

10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities' and there is a footpath link on the opposite side of the road. There is a footpath adjacent to the site to the local church, which then links into the wider footway network.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop.	✓	Medium	Local	Permanent	Long
<p>Summary: The site is within walking distance of services and facilities with a footpath link on the opposite side of the road. There is also a footpath adjacent to the site leading to the church and the wider footpath network. It is enclosed by planting including trees and hedgerows. There are tree preservation orders on the northern and part of the eastern boundary, this will not affect access to the site and any landscaping scheme would enhance biodiversity. The site would not impact on the wider landscape, townscape or historic environment.</p>						

<b>Site Reference Number: HUT301</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The rear of the site has hedgerow as the boundary treatment, the front half is used for vehicle storage and may be contaminated. Any clearance and landscaping scheme would enhance the quality of biodiversity.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will not impact on the wider views of the landscape because it is enclosed already by planting. It will however protrude into the open countryside and be out of character with the linear character of this part of the settlement. The site will impact on the townscape but not on the historic environment.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	Part of the site is used for the storage of vehicles, it is not clear if anyone works from the site or its connected to the garage across the road.	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land at the rear though the front half is brownfield	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities' and there is a footpath link.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe	The site is within walking distance of	✓	Low	Local	Permanent	Long

and vibrant communities.	services and facilities' and there is a footpath link.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities' and there is a footpath link.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop.	✓	Medium	Local	Permanent	Long
Summary: The site is within walking distance of services and facilities with a footpath link. The rear of the site has boundary hedging but the front of the site is brownfield land and any landscaping scheme would enhance biodiversity. The site would not impact on the wider landscape but would protrude into the open countryside and be out of character with the linear pattern of this part of the village, so the site would impact on the townscape. The site would not impact on the historic environment.						

<b>Site Reference Number: HUT302</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an agricultural field with hedgerow boundaries and trees along the rear of the houses on Mumby Road. There are historic buildings on part of the site which may have potential for biodiversity but this could be addressed through design and mitigation if development was to proceed. Any landscaping scheme would enhance biodiversity.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	There is no obvious access to this site the only possible one would bypass the listed Huttoft Mill and could have a significant impact on the setting of this group of buildings, which are listed. Development would protrude into the open countryside and be out of character with the linear pattern of the settlement. A landscaping scheme would not mitigate the impact on the listed buildings.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	There appears to be a business on this site which would have to cease to accommodate housing, this would lead to a loss of employment in the village.	<b>X</b>	High	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land and is part brownfield, part greenfield	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities with a footpath link. Part of the site, as submitted, includes the village playing field which would be lost if developed.	<b>✓/X</b>	Low	Local	None	None
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None

9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities' with a footpath link	✓	Low	Local	None	None
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities with a footpath link. However, the site, as promoted, includes the village playing field which would be lost if developed.	✓/X	Low	Local	None	None
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of services and facilities with a footpath link	✓	Low	Local	None	None
<p>Summary: There is no obvious access to this site the only possible one would bypass the listed Huttoft Mill and could have a significant impact on the setting of this group of listed buildings. Development would protrude into the open countryside and be out of character with the linear pattern of the settlement. A landscaping scheme would not mitigate the impact on the listed buildings. A landscaping scheme would enhance biodiversity. The site is near to services and facilities with a footpath link, although part of the site, as submitted, also include the village playing field which would be lost if the site was developed.</p>						

<b>Site Reference Number: HUT304</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an agricultural field with hedgerow boundaries. Any landscaping scheme would enhance biodiversity.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The front part of the site is mounded and elevated above the Alford Road frontage. The northern part of the site slopes down to the north and west. There are views out across the western part of the site and open countryside. The site forms part of the countryside setting to the village meaning development would be particularly intrusive and would not relate well to the existing pattern of development.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is grade 3 agricultural land	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities' but Alford Road is a narrow lane with no footpath link and no opportunity to create one.	<b>X</b>	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe	The site is within walking distance of	<b>X</b>	Medium	Local	Permanent	Long

and vibrant communities.	services and facilities' but Alford Road is a narrow lane with no footpath link and no opportunity to create one.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities' but Alford Road is a narrow lane with no footpath link and no opportunity to create one. The site is adjacent to the countryside so could encourage walking and cycling	✗	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop. There is no footpath link along Alford Road	✗	Medium	Local	Permanent	Long

Summary: The front part of the site is mounded and elevated above the Alford Road frontage. The northern part of the site slopes down to the north and west. There are views out across the western part of the site and open countryside. The site forms part of the countryside setting to the village meaning development would be particularly intrusive and would not relate well to the existing pattern of development. Biodiversity could be enhanced by a landscape scheme. Whilst the site is close to services and facilities' there is no footpath link and no opportunity to provide one.

needs are met.	housing growth in the settlement, which is a large village with a range of services and facilities					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities' and there is a footpath link. There is a footpath adjacent to the site to the local church, which then links into the wider footway network.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of the core of the village, which has services and facilities including a shop.	✓	Medium	Local	Permanent	Long
Summary: The site is within walking distance of services and facilities with a footpath link. There is also a footpath adjacent to the site leading to the church and the wider footpath network. It is enclosed by planting including trees and hedgerows. There are tree preservation orders on the northern boundary, and any landscaping scheme would enhance biodiversity. The site would not impact on the wider landscape, townscape or historic environment.						

## LEGBOURNE

Site Reference Number: LEG001						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has very good boundary features of mature hedging, in the site it is overgrown, and quite wild having been left abandoned for a long period of time, there are also some empty buildings, development could be detrimental to any biodiversity on the site.	<b>X</b>	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The boundary treatment provides an effective screen to the site and it is therefore well screened from the road and wider landscape. There would be no impact on the townscape or historic environment.	<b>O</b>	Low	Local	Permanent	None
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	About 5% of the site is within flood zone 3.	<b>O</b>	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site was in commercial use at some point in the past but it was a long time ago	<b>X</b>	Medium	Local	Permanent	Long

	and it is very overgrown and wild now.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is disconnected from the main body of the village with the nearest footpath 160m from the site on the other side of the main road.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is disconnected from the main body of the village with the nearest footpath 160m from the site on the other side of the main road.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is disconnected from the main body of the village with the nearest footpath 160m from the site on the other side of the main road. Whilst the site is in the open countryside there are no public footpaths near the site and connection to the countryside for walking and cycling would be along the main road.	<b>X</b>	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is disconnected from the main body of the village with the nearest footpath 160m from the site on the other side of the main road.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site is well screened from the road by mature hedgerows it is separated from the main body of the village and lies effectively within the open countryside. There is no footpath connection to the village for 160m and then only on the other side of the road. Part of site was allocated for industrial development in the 1995 local plan, part identified as open space, it however never came forward and there has been no contact or interest from the owner who is unknown. The site is now very overgrown and with the mature hedgerows and old buildings any development may have an impact on the biodiversity on the site. Part of the site is in flood zone 3 but it is only 5%.

**Site Reference Number: LEG009**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has no biodiversity on it, it is a disused commercial site with no boundary treatments, any landscaping of the site would enhance the quality of the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a disused commercial site with an abandoned building on it, there is no boundary treatment and its development, with landscaping would improve the townscape and street scene.	✓	Low	Local	Permanent	None
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	○	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	✓	Low	Local	Permanent	Long

of the best agricultural land and greenfield sites.	this site was in commercial use and is therefore brownfield land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is well connected to the main services and facilities being very near to the centre of the village.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is well connected to the main services and facilities being very near to the centre of the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is well connected to the main services and facilities being very near to the centre of the village so will encourage walking and cycling.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is disconnected from the main body of the village with the nearest footpath 160m from the site on the other side of the main road.	✓	Low	Local	Permanent	Long
Summary: The site is a brownfield site well connected to the services and facilities in the centre of the village. It has no biodiversity on it with no boundary treatment so any redevelopment of the site would not only enhance the biodiversity quality of the area but also improve the townscape and streetscene.						

**Site Reference Number: LEG302**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary features of hedgerows with some trees, there are also some trees within the site. Any development of the site even with landscaping would be detrimental to the existing biodiversity.	<b>X</b>	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site lies within a very well landscaped setting, though there are modern bungalows to the east, the large garden with its hedges and trees enhance the quality and distinctiveness of this part of the village. Development of the site would have a detrimental effect on this townscape and the street scene. The existing property is old and has character and its loss would impact on the historic environment of the village.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	<b>O</b>	Low	Local	None	None

infrastructure including the promotion of sustainable modes of access.						
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is well connected to the main services and facilities being very near to the centre of the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is well connected to the main services and facilities being very near to the centre of the village so will encourage walking and cycling.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is well connected to the main services and facilities being very near to the centre of the village so will encourage walking and cycling.	✓	Low	Local	Permanent	Long
Summary: The site is relatively flat with mature hedging as the boundary treatment. It is well connected to the main services and facilities which are within walking distance. Development of the site would not impact on the wider landscape, townscape or historic environment. The site is not in an area of flood risk, though does suffer from surface water flooding, any development of the site would have to mitigate against this.						

**Site Reference Number: LEG305**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary features of mature hedgerows with some trees; it is relatively flat with a slight slope down from the lane. Any landscaping would enhance the quality of the areas biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site lies within a very well landscaped setting with good boundary features; it is relatively flat but has a slight slope down from the lane which means wider views are seen of the landscape beyond the site. Development of the site would impact on the wider landscape and the rural setting of this part of the village. It would not impact on the townscape or historic environment.	X	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	○	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a Greenfield site	X	High	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is not well connected to the main services and facilities being some distance out of the village. The nearest footpath is at the junction of Manor Park some 324 metres away and Mill Lane is very rural and narrow with no room for a footpath without substantial upgrading.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is not well connected to the main services and facilities being some distance out of the village. The nearest footpath is at the junction of Manor Park some 324 metres away and Mill Lane is very rural and narrow with no room for a footpath without substantial upgrading.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is not well connected to the main services and facilities being some distance out of the village. The nearest footpath is at the junction of Manor Park some 324 metres away and Mill Lane is very rural and narrow with no room for a footpath without substantial upgrading. There is a public footpath running across the site which would connect it to the wider countryside and encourage walking.	<b>X</b>	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is not well connected to the main services and facilities being some distance out of the village. The nearest footpath is at the junction of Manor Park some 324	<b>X</b>	High	Local	Permanent	Long

	metres away and Mill Lane is very rural and narrow with no room for a footpath without substantial upgrading.					
<p>Summary: The site though relatively flat has a slight slope which means the wider landscape is exposed, there is an impact on the views of the wider landscape, and on the character of this part of Mill Lane. The site is some distance from the services and facilities with the nearest footpath being approximately 324m away with little prospect of an upgrade to Mill Lane. The site could encourage walking because there is a well used public footpath running down the middle of it out into the wider countryside, however the footpath would have to be incorporated into the site in a way which did not lose its rural character. The site would not impact on the wider townscape or historic environment.</p>						

<b>Site Reference Number: LEG307</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary treatments of mature trees and hedgerows, in the site it is unkept paddock. Any landscaping would enhance the biodiversity but creating an access would lose some of the boundary treatment.	✓	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site lies within a very well landscaped setting with good boundary features; it is relatively flat and would be well screened by the mature trees and hedgerows along the frontage. It would not impact on the townscape or historic environment.	0	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	0	Low	Local	None	None
5. Promote viable and	No impact	0	Low	Local	None	None

diverse economic growth that supports communities within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a Greenfield site	X	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably well connected to the main services and facilities, it is some distance out of the village but there is a footpath connecting the site to the rest of the village.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is reasonably well connected to the main services and facilities, it is some distance out of the village but there is a footpath connecting the site to the rest of the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is reasonably well connected to the main services and facilities, it is some distance out of the village but there is a footpath connecting the site to the rest of the village.	✓	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably well connected to the main services and facilities, it is some distance out of the village but there is a	✓	Low	Local	Permanent	Long

	footpath connecting the site to the rest of the village.					
<p>Summary: The site has good boundary treatments of mature trees and hedges, it is relatively flat and well screened from impact on the wider landscape. There will be some loss of biodiversity by the creation of an access but given that the site is just grass any other landscaping would balance this out. The site would not impact on the wider townscape or historic environment. The site is reasonably well connected to the services and facilities in the village and there is a footpath to the rest of the village.</p>

Any Assumptions:						
<ul style="list-style-type: none"> <li>•</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary treatments of mature trees and hedgerows, in the site it is agricultural land. Any landscaping would enhance the biodiversity.	✓	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site lies within a very well landscaped setting with good boundary features; it is relatively flat and would be well screened by the mature trees and hedgerows along the frontage. It would not impact on the townscape or historic environment.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	○	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None

6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a Greenfield site	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 340m away, any users of the site would most likely have to use their cars to access the village. The site is very large and would be required to provide green infrastructure as part of the proposal. However, this does not affect the overall negative score for this objective.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 340m away, any users of the site would most likely have to use their cars to access the village.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 340m away, any users of the site would most likely have to use their cars to access the village. The site is very large and would be required to provide green	<b>X</b>	High	Local	Permanent	Long

	infrastructure as part of the proposal. However, this does not affect the overall negative score for this objective.					
13. Positively plan for, and minimise the effects of, climate change.	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 340m away, any users of the site would most likely have to use their cars to access the village.	<b>X</b>	High	Local	Permanent	Long
Summary: The site has good boundary treatments of mature trees and hedges; it is relatively flat and well screened from impact on the wider landscape. The site is presently agricultural use and any landscaping would enhance biodiversity. The site would not impact on the wider townscape or historic environment. The site is disconnected from the main body of the village and is in effect out in the open countryside. The site is very large and would be required to provide green infrastructure as part of the proposal. However, all other services and facilities would be located remotely from the site the nearest footpath is approx 340m away, any user of the site would most likely have to use their car to access the village.

12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 129m away, any users of the site would most likely have to use their cars to access the village.	<b>X</b>	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is disconnected from the main body of the village and is in effect in the open countryside, the nearest footpath is approx 129m away, any users of the site would most likely have to use their cars to access the village.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site has good boundary treatments of mature trees and hedges; it is relatively flat and because of the shape of the site development of it will have some impact on the wider landscape. The site is presently agricultural use and any landscaping would enhance biodiversity. The site would not impact on the wider townscape or historic environment. The site is disconnected from the main body of the village and is in effect out in the open countryside, the nearest footpath is approx 129m away, any user of the site would most likely have to use their car to access the village.

<b>Site Reference Number: LEG314</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary treatments of mature trees and hedgerows. There are already opportunities for biodiversity in these features. Any landscaping would enhance the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site lies within a well landscaped setting with good boundary features; it is relatively flat and because of its enclosed nature would not impact on the wider landscape. It would not impact on the townscape or historic environment.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	○	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed	The District does not have very much brownfield land on which to develop	✗	High	Local	Permanent	Long

land and minimise the loss of the best agricultural land and greenfield sites.	because it is predominately rural in nature; this site is a Greenfield site					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is connected to the main village and there is a footpath to allow access to services and facilities. The site also lies adjacent to the village public house and close to the school.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is connected to the main village and there is a footpath to allow access to services and facilities, including the school which is close by. The site also lies adjacent to the village public house, which may cause problems for the users of the site because of potential conflict between them and the use of the adjacent public house.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is connected to the main village and there is a footpath to allow access to services and facilities. The site also lies adjacent to the village public house and close to the school.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is connected to the main village and there is a footpath to allow access to services and facilities. The site also lies adjacent to the village public house and close to the school.	✓	Low	Local	Permanent	Long

Summary: The site has good boundary treatments of mature trees and hedges; it is relatively flat and because of its location is screened from any impact on the wider landscape. The site is presently a paddock (it was formerly the beer garden to the public house) and any landscaping would enhance biodiversity. The site would not impact on the wider townscape or historic environment. The site is well connected to the village's services and facilities and is adjacent to the village public house and close to the school. There could be a conflict between the sites use for housing and the public house because they would share the same access leading to a loss of parking at the public house and a potential conflict of the two uses; this could have a detrimental effect on community cohesion.

13. Positively plan for, and minimise the effects of, climate change.	It is very close to services and facilities/town centre and there are footpath connections to the town centre. The majority of services and facilities can be accessed on foot and Louth is a public transport hub.	✓	Low	Local	Permanent	Long

Summary; The site is outside flood risk. The site is a private car park surrounded by buildings with no green boundary treatment. There is no impact on the wider landscape. There will be an impact on townscape, as the site fronts onto Kidgate and does lie within the Conservation Area but good design would enhance this as at the present the site is just a car park. It is very close to services and facilities/town centre and there are footpath connections to the town centre. An access already exists onto Kidgate, though the design of existing houses around the site are predominantly terrace and this would most likely mean any acceptable development reflecting the Conservation Area would have no frontage off road parking. A small parking court to the rear could accommodate the sites vehicles.

Access would be via Badminton Way which has footpath connections. There would have to be a buffer zone between any development and the hospital because both uses, residential and hospital could impact on each other, this could be green space.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is a grassed area on the west side of the Louth Hospital within the grounds. It is very open with little screening. There would be no impact on the townscape or historic environment. It is close to services and facilities and 1.75km from the town centre, access would be via Badminton Way which has footpath connections. There would have to be a buffer zone between any development and the hospital because both uses, residential and hospital could impact on each other, this could be green space.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an agricultural field with low hedges for boundaries. Any landscaping within the site would improve biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with low hedges for boundaries. The site will be visible in views from Brackenborough Road, and it slopes up slightly towards the east which will elevate development in these views. There would be some impact on wider views. There would be no impact on the townscape and no impact on the historic environment.	X	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities	No impact	0	Low	Local	None	None

within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	X	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is reasonably close to local services and facilities and 1.5km from the town centre. There is a footpath leading to the town. A site of this size would be expected to provide green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	0	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is reasonably close to local services and facilities and is 1.5km from the town centre. There is a footpath leading to the town. A site of this size would be expected to provide green infrastructure. Access can be created onto Brackenborough Road	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is reasonably close to local services and facilities, including those for sport and recreation. A site if this size would be expected to provide green infrastructure which can add to the activity space in the community. There is a footpath leading to the town.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of,	It is reasonably close to local services and facilities and is 1.5km from the town	✓	Low	Local	Permanent	Long

climate change.	centre. There is a footpath leading to the town.					
-----------------	--	--	--	--	--	--

Summary; The site is not in flood risk. The site is an agricultural field with low hedges for boundaries. The site is screened to a degree from views from Brackenborough Road, though it slopes up slightly towards the east elevating development in views. There would be some impact on wider views. There would be no impact on the townscape and no impact on the historic environment. It is reasonably close to local services and facilities and 1.5km from the town centre. There is a footpath leading to the town. Access can be created onto Brackenborough Road.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site comprises 3 field parcels divided by hedgerows. Site boundaries are also partially defined by hedgerows including a mature hedgerow and established belt along part of the eastern boundary. The rest of the site is very open, especially the largest parcel of land to the south. There are drainage ditches around and through the site. There are opportunities here to provide landscaping which would improve biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site comprises 3 field parcels divided by hedgerows. Site boundaries are also partially defined by hedgerows including a mature hedgerow and established belt along part of the eastern boundary. The rest of the site is very open, especially the largest parcel of land to the south. This site, with its open flat views out to the wider countryside, would impact on the landscape. The site does not sit within the townscape very comfortably and does not form a natural extension to the town moving it closer to Keddington. There is no impact on the historic environment.	X	High	Local	Permanent	Long

3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to local services and facilities, including employment opportunities on the industrial estate. The southern half of the site is 1.5km from the town centre. There is a footway leading to the town on the other side of Keddington Road. The northern half of the site is starting to move out into the countryside and is approximately 2km from the town centre with no footway links for 225m. A site of this size would be required to include a comprehensive green infrastructure provision, including recreation space.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is reasonably close to local services and facilities, including employment opportunities on the industrial estate. The southern half of the site is 1.5km from the town centre. There is a footway leading to the town on the other side of Keddington	✓	Medium	Local	Permanent	Long

	Road. The northern half is starting to move out into the countryside and is approximately 2km from the town centre with no footway links for 225m. Vehicle access would be more appropriate onto Keddington Road because it is nearer the built environment and there is a footpath link. A site of this size would be required to include a comprehensive green infrastructure provision, including recreation space.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is reasonably close to local services and facilities, although, there are few opportunities for recreation in this part of the town. However, a site of this size would be required to include a comprehensive green infrastructure provision, including recreation space.	✓	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably close to local services and facilities, including employment opportunities on the industrial estate. Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity	The site is agricultural land contained and divided by hedgerows except the western boundary which has an open frontage. The	✓	Low	Local	Permanent	Long

(native plants and animals) and geodiversity.	size of the site is such that there will be opportunities to provide landscaping which would improve biodiversity. The public footpath along the eastern boundary of the site should also be suitably incorporated to enable its use as a wildlife corridor.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is agricultural land contained and divided by hedgerows except the western boundary which has an open frontage. The site offers wide views to the north east and east but there are boundary treatments which soften the impact. There would be an impact on the landscape as there are views from Legbourne Road across the majority of the site. The site would also be visible in views from the top of Kenwick hill which gives sweeping view, especially of the southern part of the town, across towards the sea. There is also a public right of way along the eastern edge of the site and the site will be visible to users of this footpath. There would not be an impact on the townscape. There is no impact on the historic environment. Historic England has queried potential medieval remains on the site as part of the June 2016 consultation. A planning application (including part of this site) was refused on appeal in 2015, on grounds not pertaining to archaeology. An archaeological report was submitted with the application and Lincolnshire County Council's Historic Environment Officer responded to the effect that the heritage interest in the site could be adequately safe-guarded by a programme of further archaeological investigation and recording carried out prior to development, secured by an appropriately worded planning condition. Including fieldwalking of areas within the site (where appropriate) and trial trenching leading to an agreed scheme of	<b>X</b>	Medium	Local	Permanent	Long

	final mitigation. The degree of impact is already indicated as negative so no change is needed.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk apart from about 10% at the rear which is in flood zone 3.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural Land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to the services and facilities and is approximately 1.5km from the town centre. The access is going to be onto Legbourne Road. There are no footpath links until you get to the built up section of Legbourne Road but there is room to create one and an opportunity to bring a pedestrian link onto Legbourne Road further to the north where they are already in place. A site of this size would be required to provide a range of green space and open space provision. There is a public right of way along the eastern side of the site which will need to be suitably incorporated into the layout of the site.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	<b>0</b>	Low	Local	None	None

There would not be an impact on the townscape or on the historic environment. Historic England has queried potential medieval remains on the site as part of the June 2016 consultation. A planning application (including part of this site) was refused on appeal in 2015, on grounds not pertaining to archaeology. An archaeological report was submitted with the application and Lincolnshire County Council's Historic Environment Officer responded to the effect that the heritage interest in the site could be adequately safe-guarded by a programme of further archaeological investigation and recording carried out prior to development, secured by an appropriately worded planning condition. Including fieldwalking of areas within the site (where appropriate) and trial trenching leading to an agreed scheme of final mitigation. The site is reasonably close to the services and facilities and 1.5km from town centre. The access is going to be onto Legbourne Road. There are no footpath links until you get to the built up section of Legbourne Road but there is room to create one and there an opportunity to bring a separate pedestrian link onto Legbourne Road further to the north where they are already in place. A site of this size would be required to provide a range of green space, open space and recreation. This could not only support the community, but provide positive benefits from biodiversity, species migration and adaptation. There is a public footpath which runs at the rear of the site, which could encourage walking and provide a wildlife corridor.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with mature trees for boundary treatment along St Marys Lane and the western boundary; these are subject to tree preservation orders. There may be opportunities for landscaping within the site to add to biodiversity, providing the trees were retained.	✓	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field with mature trees for boundary treatment along St Marys Lane and the west boundary. The site lies on the edge of the AONB. It is well screened from St Marys Lane because the trees are set along an embankment, the land rises up from the lane but down from the Louth Bypass. Landscaping treatment along Louth bypass does provide screening by hedging. However, there are gaps in this treatment that means views of the site can be glimpsed from the bypass, particularly as the site rises up towards the bypass. The site may also be visible in views of the spire of St James's Church, which is a particularly important aspect of views into the town. Additional landscaping would be needed to minimise the impact of development on the site. The site lies on the edge of the built environment and providing an access could be found that meant the trees were protected there would be no impact on the townscape. The frontage of the site lies within the Conservation Area, however, good design should protect its setting. There is potential impact on the views of St	X	Medium	Local	Permanent	Long

	James's Spire.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural Land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 1.75km from the town centre, although there are local services and facilities closer to the site. The access is going to be onto Legbourne Road. There are no footpath links until you get to the built up section of Legbourne Road but there is room to create one. There are limited opportunities to provide green infrastructure on site or link in to surrounding.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 1.75km from the town centre, although there are local services and facilities closer to the site. The access is going to be onto Legbourne Road. There are no footpath links until you get to the built up section of Legbourne Road but there is room to create one.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>0</b>	Low	Local	None	None

12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is 1.5km from the nearest sport and recreation facilities.	○	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is approximately 1.75km from the town centre, although there are local services and facilities closer to the site. The access is going to be onto Legbourne Road, there are no footpath links until you get to the built up section of Legbourne Road but there is room to create one.	✓	Medium	Local	Permanent	Long
<p>Summary: The site is not in flood risk. The site is agricultural land, divided into a number of field parcels by managed hedgerows; there is also an intermittent mature hedgerow along Kenwick Rd frontage and a number of drainage ditches crossing the site. The site is unlikely to provide landscaping to significantly add to biodiversity. There is no impact on the historic environment. Historic England has queried potential medieval remains on the site as part of the June 2016 consultation. A planning application (including part of this site) was refused on appeal in 2015, on grounds not pertaining to archaeology. An archaeological report was submitted with the application and Lincolnshire County Council's Historic Environment Officer responded to the effect that the heritage interest in the site could be adequately safe-guarded by a programme of further archaeological investigation and recording carried out prior to development, secured by an appropriately worded planning condition. Including fieldwalking of areas within the site (where appropriate) and trial trenching leading to an agreed scheme of final mitigation. The degree of impact is already indicated as negative so no change is needed. There would not be an impact on the wider landscape as the site has sufficient boundary treatment to break up the development. The site is approximately 1.75km from the town centre, although there are local services and facilities closer to the site. The access is going to be onto Legbourne Road. There are no footpath links until you get to the built up section of Legbourne Road but there is room to create one.</p>

		Impact	of Impact			
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a garden centre with its associated buildings and surrounded by hedges. The whole of the site is covered with buildings or surfacing, so there would be opportunities for landscaping to improve biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a garden centre with its associated buildings. The site is largely enclosed by hedges or other development. There would be no increase in impact on the wider landscape if the site were to be redeveloped from its current use. On its own the site is not suitable because it would in effect be in the open countryside and lie out of context with the existing pattern of the built environment. With the surrounding sites it would be part of an extension to the town. There is no impact on the historic environment.	✓	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	This site is an operational garden centre employing a number of people, its loss would entail the loss of jobs and there is no indication that they are going to relocate within the District.	✗	High	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is brownfield land.	✓	Low	Local	Permanent	Long
7. Improve accessibility to	The site is just under 1km from local	✗	Low	Local	Permanent	Long

key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	services and facilities and just over 2km from the town centre. The footpath connection does not start until the edge of Louth, which is almost 400m away. It is unlikely that a footpath would be provided over the intervening distance as it would be a substantial length to provide. If the site were to be linked to a more extensive development along with neighbouring land, this may be a more positive outcome, as footpaths could be more easily provided and the larger site would be required to provide additional local services. Even in isolation, the site would be required to provide some green infrastructure.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is just under 1km from local services and facilities and just over 2km from the town centre but there is no footpath link until you reach the built up section of Legbourne Road, which is almost 400m away. It is unlikely that a footpath would be provided over the intervening distance as it would be a substantial length to provide. Only by working with the other sites on this side of the road can footpath access be achieved. An access can be formed.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide	The site is 1.8km from the nearest sport	<b>X</b>	Medium	Local	Permanent	Long

the facilities and infrastructure for “healthy lifestyles”	and recreation facilities but there is no footpath link until you reach the built up section of Legbourne Road. Only by working with the other sites on this side of the road can footpath access be achieved. The site would have to provide some green infrastructure as part of any redevelopment but, due to the size of the site, this is unlikely to contribute greatly to healthy lifestyles.					
13. Positively plan for, and minimise the effects of, climate change.	The site is just under 1km from local services and facilities and just over 2km from the town centre but there is no footpath link until you reach the built up section of Legbourne Road. Only by working with the other sites on this side of the road can footpath access be achieved. An access can be formed.	<b>X</b>	Medium	Local	Permanent	Long

Summary; The site is not in flood risk. The site is a garden centre with its associated buildings. The site is enclosed by development and hedges and there would be no additional impact on the wider landscape if the site were to be redeveloped. On its own the site is not suitable because it would in effect be in the open countryside and lie out of context with the existing pattern of the built environment. With the surrounding sites it would be part of an extension to the town. There is no impact on the historic environment. This site is an operational garden centre employing a number of people, its loss would entail the loss of jobs and there is no indication that they are going to relocate within the District. The site is just under 1km from local services and facilities and just over 2km from the town centre but there is no footpath link until you reach the built up section of Legbourne Road. Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is part of a golf course, with clubhouse and open fairways and associated landscaping. Half of the site is covered by a tree preservation order and trees will add to the space for wildlife. Golf courses provide some opportunities for biodiversity, although they are clearly managed for a different use and the greens and fairways would largely be used for species to migrate rather than habitat. The change to housing, albeit low density and with large gardens, is unlikely to reap any significant improvements for biodiversity.	<b>O</b>	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is part of a golf course, with clubhouse and open fairways and associated landscaping. Although, being a golf course, it is an artificially created landscape, part of the sites is within the AONB and the remainder of the site abuts its boundary and hence contributes to its setting. There are trees which would act as screening to the site, so reducing its impact on the wider landscape. Development in this area is out of context with the existing built environment being in effect in the	<b>X</b>	Medium	Local	Permanent	Long

	open countryside. There is no impact on the historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is mainly Grade 3 agricultural land, although there are small elements of brownfield land with the club house and facilities.	✗	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to services and facilities and the town centre with footpath links. It is also close to Hubbards Hills and Westgate Fields. Any loss of green infrastructure and sport and recreation facilities would have to be compensated for.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	○	Low	Local	None	None

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is 1.6km from local sport and recreation facilities and there is a footpath connection along Eastfield Road. There is a public footpath on the opposite side of the road linking into a wider footpath network which could encourage walking. A site of	✓	Low	Local	Permanent	Long

	this size would be required to provide a comprehensive range of green infrastructure which will support healthy lifestyles.					
13. Positively plan for, and minimise the effects of, climate change.	The site is 1.7km from the town centre, although closer to some local services and facilities, but it is starting to move out into the open countryside, there is a footpath connection along Eastfield Road. A vehicle access can be formed via Eastfield Road. A site of this size would be required to provide a comprehensive range of green infrastructure which will support healthy lifestyles and biodiversity.	✓	Low	Local	Permanent	Long
<p>Summary; The site is not in flood risk. The site is agricultural land with mature hedges and trees for boundaries; Monk's Dyke runs along the southern boundary of the site. The land is quite flat and enclosed by its boundary treatments, so would not have an impact on the wider landscape. However, a public footpath runs along the eastern boundary and the site will be highly visible from here. The site does not form a natural extension to the built environment, even if the adjacent site to the west were to be developed, this site in its entirety would protrude out into the open countryside south eastwards. Reducing the size of the site so it would in line with LO326 would still not improve the way the site relates to the built environment, development would start to string out along Eastfield Road and become less well related to the town. The boundary treatment along Eastfield Road is intermittent and the site would be visible in views along Eastfield Road. There is no impact on the historic environment. The site is 1.7km from the town centre although it is closer to local services and facilities, but it is starting to move out into the open countryside; there is a footpath connection along Eastfield Road. A vehicle access can be formed via Eastfield Road. A site of this size would be required to provide a comprehensive range of green infrastructure which will support healthy lifestyles and biodiversity. There is a public footpath on the opposite side of the road linking into a wider footpath network which could encourage walking.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a field next to Louth Canal and with the River Lud flowing through it flanked by a number of trees. The site is likely to contain biodiversity, the River itself will certainly act as a wildlife corridor and this would need to be assessed.	<b>?</b>	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is fields next to the canal and is undulating with views across it in the short distance of trees and gives the appearance of grassed meadowland. It only has low hedgerows along its boundaries with Eastfield Road and Cowslip Lane. Development of the site would impact on these short distance views. The site lies outside the built up environment and is in effect in the open countryside, it forms part of the green entrance into Louth along Eastfield Road and forms a meadowland backdrop to the canal, though disused now it does have some historical context. The site also has a public right of way running through it, alongside the canal and it would be hard to accommodate this in a way that retained its rural character.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is in flood risk, as the River Lud runs through the site.	<b>X</b>	Medium	Local	Permanent	Long

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is mainly Grade 3 agricultural land.	<b>X</b>	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 1.75km from the majority of services and facilities and the town centre. There is a footpath on the opposite side of the road. There is a footpath running through the site that aids access to the countryside but this would have to be accommodated in a way that retains its rural character.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is still approximately 1.75km from the majority of services and facilities and the town centre. There is a footpath on the opposite side of the road. An access can be formed onto Eastfield Road.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is 2km from sport and recreation facilities. There is a public footpath running down the rear of the site and another on the opposite side of the road, this could	✓	Low	Local	Permanent	Long

	encourage walking.					
13. Positively plan for, and minimise the effects of, climate change.	The site is still approximately 1.75km from the majority of services and facilities and the town centre. There is a footpath on the opposite side of the road. An access can be formed onto Eastfield Road. The River Lud runs through the site and it has a meadowland feel to it and it is possible the site may contain biodiversity. The River itself will certainly act as a wildlife corridor.	?	Low	Local	Permanent	Long

Summary: The site is fields next to the canal and the River Lud flows through it; the site is in an area of flood risk. The site is undulating with views across it in the short distance of trees. It only has low hedgerows along Eastfield Road and Cowslip Lane boundaries and gives the appearance of grassed meadowland. Development of the site would impact on these short distance views and on the rural character of this part of Louth. The site lies outside the built up environment and is in effect in the open countryside, it forms part of the green entrance into Louth along Eastfield Road. This site forms a meadowland backdrop to the canal, though disused now it does have some historical context. The site is likely to contain biodiversity and the River Lud will act as a wildlife corridor. The site is approximately 1.75km from the majority of services and facilities and the town centre; with a footpath on the opposite side of the road. An access can be formed onto Eastfield Road. There is a public footpath running down alongside the canal and another on the opposite side of the road, this could encourage walking, although the footpath within the site would have to be accommodated in a way that retained its rural character.

The site is too small to enable biodiversity to be enhanced, however, retention of the trees would enable that already on site to be retained.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is the site of some county council offices which appear to still be in use, there are trees along the frontage with general landscaping. There is no impact on the wider landscape because the site is enclosed and is already part of the built form. The site lies within the built up area of the town so there is no impact on the townscape. The site is close to a listed building but is unlikely to affect its setting.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and	No impact	0	Low	Local	None	None

pollution and minimise the impacts of unavoidable losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site appears to be still used for employment by the county council, ceasing its use could reduce the number of jobs within the area, though there is no timetable for this.	X	Low	Local	Permanent	Long
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is classed as brownfield land.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site lies within the built up area of Louth and is reasonably close to services and facilities, there are footpath connections to the main town and other facilities.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	0	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site lies within the built up area of Louth and is reasonably close to services and facilities, there are footpath connections to the main town and other facilities. There is already a vehicle access to the site which could be used, however, the access is shared with Louth Fire Station, which has recently been rebuilt and safe means of access for vehicles and pedestrians would ensure if this site were to be redeveloped.	?	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and	✓	Low	Local	Permanent	Long

	facilities.					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site lies within the built up area of Louth and is reasonably close to services and facilities, there are footpath connections to the main town and other facilities.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site lies within the built up area of Louth and is reasonably close to services and facilities, there are footpath connections to the main town and other facilities.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is the site of some county council offices which appear to still be in use, there are trees along the frontage with general landscaping. The site is too small to enable biodiversity to be enhanced, however, retention of the trees would enable that already on site to be retained. There is no impact on the wider landscape because the site is enclosed. The site lies within the built up area of the town so there is no impact on the townscape. It is reasonably close to services and facilities, there are footpath connections to the main town and other facilities. There is already a vehicle access to the site which could be used. However, the access is shared with Louth Fire Station, which has recently been rebuilt and safe means of access for vehicles and pedestrians would ensure if this site were to be redeveloped. The site appears to be still used for employment by the county council, ceasing its use could reduce the number of jobs within the area, though there is no timetable for this.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an agricultural field with hedges and mature trees for its boundary treatment. There are opportunities for landscaping within the site to enhance biodiversity, but this unlikely to be a significant enhancement.	○	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with hedges and mature trees for its boundary treatment. The boundary treatment means the site is enclosed and does not impact on wider views out of Louth. However, the boundary to Alvingham Road is a low hedge and on leaving Louth, the site will be prominent in view. The site is detached from the main town and is in effect in the open countryside. There is no impact on the historic environment.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is detached from the town with no footpath connection along Alvingham Road, which is quite narrow at this point. The site is too detached to adequately create a footpath connection. The site would be required to provide some green infrastructure.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impacts	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe	The site is detached from the town with no	<b>X</b>	High	Local	Permanent	Long

and vibrant communities.	footpath connection along Alvingham Road, which is quite narrow at this point. The site is too detached to adequately create a footpath connection.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is detached from the town with no footpath connection along Alvingham Road, which is quite narrow at this point. The site is too detached to adequately create a footpath connection.	X	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is detached from the town with no footpath connection along Alvingham Road, which is quite narrow at this point. The site is too detached to adequately create a footpath connection.	X	High	Local	Permanent	Long
Summary; The site is not in flood risk. The site is an agricultural field with hedges and mature trees for its boundary treatment. The boundary treatment means the site is enclosed and does not impact on wider views, although the low hedges along Alvingham Road mean that it would be highly visible in views on leaving Louth. The site is detached from the main town and is in effect in the open countryside. There is no impact on the historic environment. The site is detached from the town with no footpath connection along Alvingham Road, which is quite narrow at this point. The site is too detached to adequately create a footpath connection.

**Site Reference Number: Louth Employment Land – Direction of Growth**

Any Assumptions:

- The assessment assumes that any ensuing development will progress from Nottingham Road, where there is an existing access road that can serve the development. Access from another part of the industrial estate may bring forward a different piece of land, however, the overall assessment is unlikely to change significantly.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas biodiversity (native plants and animals) and geodiversity.	The land to the north of Fairfield Industrial Estate is agricultural land in arable production. These are not likely to be of significant value for biodiversity. However, the land to the north of Nottingham Road has mature hedges to the eastern, western and southern boundaries which may provide wildlife corridors. This field, at approximately 6.6ha, is less than the 8.6ha required, so will mean extending beyond the field boundaries into adjacent fields. To the west of the site is the former railway line which was a Site of Nature Conservation Importance. While the site has lost its local designation, it still provides a strong, well hedged, wildlife corridor and this should be retained in any development. As the development is for employment land, and therefore will not provide gardens and is unlikely to provide open space, there may well be an impact on biodiversity through the development, and potentially, depending on the end users, through its	<b>X</b>	High	Local	Permanent	Long

	operation.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The land to the north of Nottingham Road has mature hedges to the eastern, western and southern boundaries. To the west of the site is the former railway line which provides a strong hedge line and this should be retained in any development. Development here will be screened in the main views. However, this field, at approximately 6.6ha, is less than the 8.6ha required and this will mean extending beyond the field boundaries into adjacent fields to the north east; fields in this area are quite open and would extend the development into open countryside and would be visible in views from Brackenborough Road; although these will be at a distance, viewed along with other industrial development and could be mitigated by landscaping and design. To the west lies the Lincolnshire Wolds Area of Outstanding Natural Beauty (AONB). The site is 880m from its boundary, a public right of way runs along a lower ridge line of the AONB with views to the east. However, intervening landscaping to would reduce visibility across the site and the trees along the footpath are protected by a Tree Preservation Order (TPO). There is no impact on the historic environment.	✓	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	The site is on grade 3 agricultural land, there are no other impacts on natural resources.	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in a flood risk area	✓	Low	Local	None	None
5. Promote viable and	The site would provide increased	✓	Medium	Local	Permanent	Long

diverse economic growth that supports communities within the district.	opportunities for investment in the town. The site will provide for new businesses and allow expansion of existing ones, and allow opportunity for networks of businesses to develop.					
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is located on the northern edge of Louth. As an employment site, it is unlikely to provide, or be required to provide, additional green infrastructure. For employees working at the industrial estate, or customers wishing to access businesses on it, although a bus routes passed close to the industrial estate, there are no bus stops available. This is something that could be negotiated with the service provider but, despite the current size of the industrial estate, is not already available.	<b>X</b>	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	There is safe access to the site, being off an existing serviced industrial estate with footways and footway lighting. In providing the opportunity for additional jobs, this also helps towards creating a vibrant community.	<b>✓</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	The site makes no contribution to housing need, being an industrial development.	<b>X</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide	The site does not contribute to healthy	<b>X</b>	Low	Local	Permanent	Long

the facilities and infrastructure for “healthy lifestyles”	lifestyles. People may walk or cycle to work but this is a bi-product of the sites’ location rather than a positive aim of the proposal.					
13. Positively plan for, and minimise the effects of, climate change.	The site is located on the northern edge of Louth. Although it is possible to walk and cycle to the site, it is some distance from the southern side of the town and there are no dedicated pedestrian routes (beyond roadside footways) or cycle routes. A bus route passes close to the site but there are no convenient bus stops, although this could be negotiated with the bus company.	<b>X</b>	Low	Local	Permanent	Long
<p>Summary: Land for an additional 8.6ha of employment land will be needed over the plan period. There are no options available in the town that would enable brownfield land to come forward to fulfil this need; there being little available brownfield land in the town. This means that the only options available to the Council will be edge of settlement locations on greenfield land. In narrowing down the options further, it is important that the site chosen has readily available and safe access to the Strategic Road Network to enable the movement of goods whilst causing minimum disturbance to residential areas of the town and avoiding, where possible, the narrow historic streets in the town centre. This would preclude development to the east of Louth. To the west of Louth lies the Lincolnshire Wolds Area of Outstanding Natural Beauty (AONB) and development further west of the existing built area of the development risks harming this protected landscape or its setting. This leaves two main options for a future direction of growth: extending the town’s existing industrial estate on the north of the town; or creating a new area of employment land to the south of the town where there is also convenient access to the A16. The direction of growth for additional land has been chosen to the north of Louth, extending Fairfield Industrial Estate to accommodate additional demand. The scores above show that there are some negative outcomes from this choice, which largely relate to its location on greenfield land and its distance from some areas of the town; particularly to the south. A scoring for the site to the south would receive a similar scoring, with negative and neutral scores as highlighted above. However, in addition, a site to the south would also receive a negative score for landscape impact as, depending on the exact siting, it would be more visible in views from Kenwick Hill and Kenwick Road. There is also less of a commercial presence in this area to soften the impact of the development. Also, the ability for an extension of the existing industrial land to help provide synergy between businesses potentially strengthens the economic outcomes from the development. It is therefore considered that this part of Louth provides the most suitable direction of growth for further employment development.</p>						

## MANBY AND GRIMOLDBY

### Site Reference Number: MAN003

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has mature trees and hedgerows for its boundary treatment and there is a blanket tree preservation order on the site, any development would impact on the biodiversity of this site as it would involve some degradation of what is already there.	<b>X</b>	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed paddock set within mature boundary features which obscure most of the inner site. Development of the site would inevitably open up the site to views of development and involve the small loss of some of the boundary treatment to widen the access the impact would be wider on the townscape rather than views of the landscape. This is a very wooded rural part of the village defined by its treed lined roads and areas of wooded landscape. There is no impact on the historic environment, the setting of the listed church opposite would be unaffected providing the trees remained.	<b>X</b>	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	<b>✓</b>	Low	Local	None	None

Summary: The site is not in flood risk. It is grassed paddock surrounded by mature trees and hedgerows. There is no impact on the townscape environment or wider landscape views. There could be a small impact on the views of the listed church but this is somewhat mitigated against by the mature boundary treatments of the site. The site is close to services and amenities but there is no footpath connection, the nearest one being some 55m away on the main road, the vehicle access would be difficult and given the narrow rural aspect of the lane could compromise the safety of road users.						

<b>Site Reference Number: MAN223</b>						
Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has mature trees and hedgerows for its boundary treatment, it is very open and is used for agricultural and the keeping of intensive livestock. The site was previously less intensively used and had a diversity of wildlife; changes to the use of the site may have had an impact on this. A strong landscaping scheme within the site	<b>?</b>	Low	Local	Permanent	Long

	would enhance the biodiversity of the site.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is very open because of its size even though it does have mature trees and hedges for its boundary treatment, there are gaps which enable views across the sites in places. Development of the site would impact on wider views of the countryside from various locations and impact on the rural setting of the village. The site would not impact on the townscape or historic environment.	<b>X</b>	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land. Although the site was a former airfield, the runways have been dug up and only part of the perimeter track remains, so the majority of the site now has no trace of its former brownfield elements.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The closest part of the site is over 500 metres from the services and facilities in the village but as you move out of the village these get further away. A footpath exists as far as the entrance of the site but is on the other side of the road and it would be expected that one should be created on	✓	Low	Local	Permanent	Long

	the same side as the site. Given the size of the site it would be expected to provide significant amounts of green infrastructure.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The closest part of the site is over 500 metres from the services and facilities in the village but as you move out of the village these get further away. A footpath exists as far as the entrance of the site but is on the other side of the road and it would be expected that one should be created on the same side as the site. Given the size of the site it would be expected to provide significant amounts of green infrastructure and include some additional community benefits.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The closest part of the site is over 500 metres from the services and facilities in the village but as you move out of the village these get further away. A footpath is on the other side of the road and it would be expected that one should be created on the same side as the site. Given the size of the site it would be expected to provide significant amounts of green infrastructure and some community benefits. There is a public bridleway within the site, and this could be extended to provide additional opportunities for walking and outdoor	✓	Low	Local	Permanent	Long

	activities.					
13. Positively plan for, and minimise the effects of, climate change.	The closest part of the site is over 500 metres from the services and facilities in the village but as you move out of the village these get further away. A footpath is on the other side of the road and it would be expected that one should be created on the same side as the site. Given the size of the site it would be expected to provide significant amounts of green infrastructure.	✓	Low	Local	Permanent	Long
Summary: The site is not in flood risk. It is close to services and facilities but the footpath is on the other side of the road and, given its size, there would need to be a footpath on the same side as the site. The size of the site would mean it would have to provide green infrastructure and open space and also other community benefits. The site is so large that despite its mature boundary treatment its development would impact on wider views of the landscape from various vantage points including the rural setting of the village. The site would not impact on the townscape or historic environment.

Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has some mature trees (some of which are covered by tree preservation order) and hedgerows for its boundary treatment. It is open in nature but has not been subject to development or intensive agriculture so could possess some biodiversity, however, additional landscaping could enhance the biodiversity of the site.	?	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is open in nature even though it does have some mature trees and hedges for its boundary treatment. Development of the site would impact on wider views of the countryside from the dwellings on Tinkle Street and along Whitegate Lane the adjacent track that leads into the open	X	Low	Local	Permanent	Long

	countryside. The site would impact on the townscape in this part of the village which is rural in nature as it moves out into the countryside, the properties here tend to be more linear in nature and this would be backland development. The site does not impact on the historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site approximately 1km from the majority of services in the village (shop, school, village hall), a footpath exists on the opposite side of the road.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 1km from the majority of services in the village (shop, school, village hall), a footpath exists on the opposite side of the road.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is	✓	Low	Local	Permanent	Long

	a large village with a range of services and facilities.					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 1km from the majority of services in the village (shop, school, village hall), a footpath exists on the opposite side of the road.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is approximately 1km from the majority of services in the village (shop, school, village hall), a footpath is on the opposite side of the road.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. It is approximately 1km from the majority of services in the village (shop, school, village hall) with a footpath is on the opposite side of the road. Despite some boundary treatment, because of its open nature, the site would impact on wider views of the landscape to a degree. Any landscaping would enhance biodiversity. The site would impact on the townscape in this part of the village as it moves into the open countryside where the village is more rural in nature and takes a linear form; this backland development would be out of context with this. The site would not impact on the historic environment.

and vibrant communities.	facilities in the village, but there are no footpaths either along Mill Lane or Eastfield Lane with little prospect of developing them due to the narrowness of the carriageway. Vehicles movements on and off the site could compromise the safety of road users because of the narrowness of both lanes					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village, but there are no footpaths either along Mill Lane or Eastfield Lane with little prospect of developing them due to the narrowness of the carriageway.	✗	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village, but there are no footpaths either along Mill Lane or Eastfield Lane with little prospect of developing them due to the narrowness of the carriageway.	✗	Medium	Local	Permanent	Long
<p>Summary: The site is not in flood risk. It is close to services and facilities but there are no footpaths either along Mill Lane or Eastfield Lane and their narrow rural nature could compromise the safety of road users. The site because of its open nature despite some boundary treatment would impact on wider views of the landscape to a degree, especially if the boundary was removed along Mill Lane. The degree of biodiversity in this paddock is unknown, therefore it is unknown if further landscaping could enhance biodiversity. The site would impact on the townscape in this part of the village as it is more rural in nature and takes a linear form; this backland development would be out of context with this. The site would not impact on the historic environment.</p>						

**Site Reference Number: MAN305**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact		Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a mixture of grassed areas at the front and a disused area used for recycling. There is mature landscaping along the frontage which forms a good boundary treatment with the B1200. The rest of the site is used by LCC as their highway depot. As there would be a conflict between residential use and employment use of the site with LCC highway lorries going in and out of the site, there would therefore have to be a separate vehicle and pedestrian access to the site. This would erode the front boundary and lead to a loss of biodiversity. Any further landscaping within the site would enhance biodiversity through the rest of the site.	✓		Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is quite contained in from views from the street because the front part of the site has mature boundary treatment of trees and hedges. Development of this site would not impact on wider views of the landscape. Development in the southern part of the site may impact on the setting of the listed highways depot building, Linx House and Centurion House as the boundary treatment in these areas is sparse. The degree of impact will depend on the design of any proposals.	✓	?	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0		Low	Local	None	None
4. Avoid the risk of flooding	The site is not in flood risk	✓		Low	Local	None	None

(where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	The site is currently in commercial use, however, it appears to be underused and there may be capacity in the remainder of the site to accommodate any displaced uses.	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site was a recycling site is therefore brownfield land.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village including the school and doctors. There is a footpath on the other side of the road from the site.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village including the school and doctors. There is a footpath on the other side of the road from the site. The rest of the site is used by LCC as their highway depot and there would be a conflict between residential use and employment use of the site with LCC highway lorries going in and out of the site. There would therefore have to be a separate vehicle and pedestrian access to the site. This would create three heavily trafficked accesses within just over 100 metres which would need careful assessment. There could also be noise issues from the depot use of the site, especially as it is used for the storage and distribution of road grit in the winter.	<b>X</b>	Medium	Local	Permanent	Long

10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village including the school and doctors. ---	---	---	--------	-------	-----------	------

Summary: The site is not in flood risk. It is 1km from the local shop and post office and 1.5km from the other services and facilities. There is a footpath that goes most of the way into the village, but there is no footpath from the access onto Church Lane which becomes very narrow alongside the site. The site is open in nature and, despite some boundary treatment, would impact on wider views of the landscape from Church Lane. Any landscaping would enhance biodiversity and lessen its landscape impact. The site would not impact on the townscape or historic environment.

<b>Site Reference Number: MAN313</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has very good mature trees and hedgerows for its boundary treatment. The site has not been used for intensive agriculture and is likely to host a variety of types of wildlife. There will be some loss of hedgerows in creating accesses and in clearing areas for the development. Additional landscaping within the site will offset any loss of the biodiversity of the site.	○	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is has very good mature trees and hedges for its boundary treatment. Development of the site would not impact on wider views of the countryside because of its boundary treatment. There will be some impact on the townscape with the removal of trees and hedges as this is a very well treed and rural part of the village and adds to the rural setting of the village. The site may impact on the historic	✘	Medium	Local	Permanent	Long

	environment being adjacent to the listed church, the boundary treatment would have to be retained and enhanced.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village and there is a footpath on the other side of the road to connect to the village centre.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village and there is a footpath on the other side of the road to connect to the village centre.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village and there is a footpath on the other side of the road to connect to the village centre. The site is near to the open countryside which could encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village and there is a footpath on the other side of the road to connect to the village centre.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. It is close to services and facilities and there is a footpath on the other side of the road to connect to the village centre. The site has very good mature boundary treatment and would not impact on wider views of the landscape. Any landscaping would compensate for any loss of biodiversity through the development of the site. The site would impact on the townscape because this is a rural part of the village leading out into the open countryside and this site forms part of that setting. The site could impact on the historic environment being next to the listed church, the boundary treatment would have to be retained to protect the churches rural setting.

**Site Reference Number: MAN314**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has quite poor boundary treatment and is at present an open field for agriculture. Landscaping would enhance the biodiversity of the site.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is has quite poor boundary treatment and is an open field prominent within views across from the village and also visible in view from Manby Middlegate. Development of the site would impact on these views and landscaping could not mitigate against this. The site is also slightly convex, with a raised elevation in the centre of the site which will increase its prominence. The site would not impact on the historic environment. There would be some impact on the townscape but this is in the main the centre of the two villages so further development would be expected to be part of the townscape.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is very close to the services and facilities in the village with the post office, shop, doctor's surgery and school within easy walking distance. There is a footpath on the other side of Carlton road to connect to the village centre and one could be created on the side of the site. The site	✓	Low	Local	Permanent	Long

	could also provide a village green to help define the centre of the two villages.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is very close to the services and facilities in the village with the post office, shop, doctor's surgery and school within easy walking distance. There is a footpath on the other side of Carlton road to connect to the village centre and one could be created on the side of the site. The site could also provide a village green to help define the centre of the two villages.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is very close to the services and facilities in the village with the post office, shop, doctor's surgery and school within easy walking distance. There is a footpath on the other side of Carlton road to connect to the village centre and one could be created on the side of the site. climate change.	and doctors, there is a footpath along the main road connecting the site. The site does however rely on the front part being developed otherwise it is landlocked.					
-----------------	--	--	--	--	--	--

Summary: The site is not in flood risk. It is close to services and facilities including the doctors and the school there is a footpath connecting to the road leading to the village centre but the site does rely on the front part of the site coming forward otherwise it is landlocked, there is an access through both sites shown on the details of the planning application in 2011 for the front part of the site, with no obvious ransom strip, both areas were in the same ownership in 2011. The site is screened from the road by the fact that the front part of the site has planning permission and is going to be developed and it would not impact on the wider landscape. The site would not impact on the townscape or historic environment.

Summary: The site is not in flood risk. It is not that close to services and facilities, Middlesykes Lane is very rural and narrow with the nearest footpath some 247m away on the main road. The site is very open in nature and development would impact on the wider views of the landscape to the south and on the listed building the Old Hall to the east of the site. Landscaping could enhance biodiversity.						

<b>Site Reference Number: MAN330</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is made up of redundant RAF hangers, there are mature trees within the site and some landscaping. The demolition of these and redevelopment of the site to incorporate the mature trees with additional landscaping would enhance the biodiversity of the site. Any biodiversity within the hangers themselves could be relocated or catered for in the new development.	✓	Low	Local	Permanent	Long

<p>2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.</p>	<p>The site is very open and the buildings on it very tall, industrial and stand out in the landscape. The demolition of them with landscaping of the site would create a less dominant urban character and be a positive contribution to the landscape. The site would not impact on the townscape, however, there may be an impact on the historic environment due to the proximity of the listed accommodation block on the adjacent former air base. The boundary treatment in this area is quite sparse and will need careful consideration, however, the impact is not likely to be significant.</p>	<p>✓</p>	<p>Low</p>	<p>Local</p>	<p>Permanent</p>	<p>Long</p>
<p>3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.</p>	<p>No impact</p>	<p>0</p>	<p>Low</p>	<p>Local</p>	<p>None</p>	<p>None</p>

Also, there are no footpaths in Manby Park and this site is heavily trafficked with commercial vehicles and cars visiting the various commercial activities there. The site would have to provide green space as a buffer to some of the employment uses on Manby Park and the airfield.</p>					
--	--	--	--	--	--	--

Summary: The site is not in flood risk. It is close to services and facilities including the doctors and the school but there is no direct pedestrian link on to Manby Middlegate and alternative routes will extend the distance to walk to access services and facilities, particularly the doctors, school and village hall. There is the potential for the creation of pedestrian and cycle access through Manby Park to link up with the village, however, there are no footpaths in Manby Park and this site is heavily trafficked with commercial vehicles and cars visiting the various commercial activities there. The site would have to provide green infrastructure and/or open space as a buffer to some of the adjacent employment uses on Manby Park and the airfield. The site is a brownfield site and presently has redundant RAF hangers on it and is very open to wider views as you travel up the B1200 towards the village; the buildings on it are very tall and industrial in character, the demolition of them with landscaping of the site would lessen the impact and, if well designed, could be a positive contribution to the landscape and setting of the village. The site would not impact on the townscape, however, there may be an impact on the historic environment as the site is close to listed buildings on the airfield and the design will have to respect their setting.

<p>Summary: The site is not in flood risk, The site is close to the services and facilities in the village including the school and doctors, there is a footpath leading to the centre of the village. The site lies within the village itself so there are no wider views of the landscape to be compromised. The site would impact on the townscape of the village because it lies on a prominent corner with its mature trees for boundaries it forms a wooded rural setting for this part of the village and a green setting for the large detached house whose gardens it forms. There may be historic environment impacts, as the house could be considered as a non-designated heritage asset.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a former petrol filling station with a garage building on it and hard standing at the front. Landscaping would enhance biodiversity on the site	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a former petrol filling station with a garage building on it and hard standing at the front. The buildings on the site are no of significant character. Development of the site would improve the townscape; there would be no impact on the wider landscape because the building on the site already obscures any views. There is no impact on the historic environment.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss	The District does not have very much brownfield land on which to develop because it is predominately rural in nature;	✓	Low	Local	Permanent	Long

of the best agricultural land and greenfield sites.	this site is brownfield land.					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to services and facilities and there is a footpath so it is well connected. A vehicle access is available as the site was used as a petrol filling station.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is reasonably close to services and facilities and there is a footpath so it is well connected. A vehicle access is available as the site was used as a petrol filling station.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is reasonably close to services and facilities, including those for sport and recreation. There is a footpath so it is well connected.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably close to services and facilities and there is a footpath so it is well connected. A vehicle access is available as the site was used as a petrol filling station.	✓	Low	Local	Permanent	Long
Summary: The site is not in flood risk. The site was a petrol filling station with a garage building on it and hard standing at the front. Landscaping would enhance biodiversity on the site. Development of the site would improve the townscape; there would be no impact on the wider landscape because the site is within the settlement. There is no impact on the historic environment. The site is reasonably close to services and facilities and there is a footpath so it is well connected. A vehicle access is available as the site was used as a petrol filling station.

Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is field with development to two sides, limited boundary treatment to the south and the eastern boundary is made up of hedging. The site would require landscaping and this could enhance biodiversity on the site, although this would not be significant.	✓	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is field with development to two sides, limited boundary treatment to the south and the eastern boundary is made up of hedging. Development of the site would not impact on the townscape. There is potential for a minor impact on the wider landscape as the southern part of the site would be visible in views when entering the village from the east along the A155. There would also be a minor impact on the historic environment as this view also contains the listed mill. However, both these issues could be resolved through layout and landscaping.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site contains a current business use which would be lost if the site were to be developed.	✗	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature. Approximately 80% of this site Grade 2 agricultural land, the other 20% is occupied by a business use incorporating a building and hard standing.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is reasonably close to services and facilities. The access would be off Chapel Lane which is narrow and rural with no prospect of the provision of a footpath. Therefore the closeness of the site to services is negated by the lack of	✗	Medium	Local	Permanent	Long

	connectivity.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is reasonably close to services and facilities. The access would be off Chapel Lane which is narrow and rural with no prospect of the provision of a footpath. Therefore the closeness of the site to services is negated by the lack of connectivity. The access would not be suitable as a vehicle access for housing development though it is used at present to service an existing business.	<b>X</b>	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is reasonably close to services and facilities, including those for sport and recreation. The access would be off Chapel Lane which is narrow and rural with no prospect of the provision of a footpath. Therefore the closeness of the site to services is negated by the lack of connectivity.	<b>X</b>	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably close to services and facilities. The access appears to be off Chapel Lane which is narrow and rural with no prospect of the provision of a footpath. Therefore the closeness of the site to services is negated by the lack of connectivity.	<b>X</b>	Medium	Local	Permanent	Long

Summary: The site is not in flood risk. The site is a field with development to two sides, and an area of brownfield land to the south of the site. There is limited boundary treatment to the south and the eastern boundary which is made up of hedging. Development of the site would not impact on the townscape. There is potential for a minor impact on the wider landscape because the southern part of the site would be visible in views when entering the village from the east along the A155. There would also be a slight impact on the historic environment as this view also contains the listed mill. However, both these issues could be resolved through layout and landscaping. The site is reasonably close to services and facilities. The access appears to be off Chapel Lane which is narrow and rural with no prospect of the provision of a footpath. Therefore the closeness of the site to services is negated by the lack of connectivity. The access would not be suitable as a vehicle access because of the narrowness of Chapel Lane and it is on a bend in the lane, though it is used at present to service an existing business.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals)	The site is an agricultural field with quite open boundaries. The site is quite small and although landscaping will be needed to minimise the impact, there are limited	✓	Low	Local	Permanent	Long

and geodiversity.	opportunities to enhance biodiversity on the site.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with quite open boundaries. Wider views are blocked by trees and development, although the site will be visible in views from the north due to the open boundaries. The site does not relate that well to the existing pattern of development. There is no impact on the historic environment.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 2 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to services and facilities and there is a footpath on the other side of the road which is narrow leading back into the village. The site will be required to provide some green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities and there is a footpath on the other side of the road which is narrow leading back into	<b>X</b>	High	Local	Permanent	Long

	the village. The access to the site is inadequate being a narrow field access between two bungalows, located at a meeting of three lanes; the use of the access for the development of the site would have a detrimental effect on the occupiers of these properties.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities and is opposite to the playing fields. There is a footpath on the other side of the road which is narrow leading back into the village.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities and there is a footpath on the other side of the road which is narrow leading back into the village.	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk. The site is an agricultural field with quite open boundaries. ## MARSHCHAPEL

<b>Site Reference Number: MAR217</b>						
Any Assumptions:						
<ul style="list-style-type: none"> <li>•</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has very little in the way of boundary treatments on it. There are buildings on the frontage of the site but these will be demolished if the site is developed. Any landscaping would enhance biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is relatively flat with little boundary treatment; any development of it would impact on the wider landscape. The site would not impact on the townscape or historic environment.	X	High	Local	None	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The north of the site is in the red and orange zones of the EA flood hazard maps, the rest is in green and yellow.	✓	Low	Local	Permanent	Long

5. Promote viable and diverse economic growth that supports communities within the district.	No impact	0		Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 1 agricultural land (three quarters of it towards the east) and Grade 2 agricultural land.	X		High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village, a vehicle access can be provided onto the main by making up the farm access to the south east of the site which also runs alongside MAR304 and MAR300; although this is very narrow along the eastern length, especially if it is serving three sites. Pedestrian and cycle access could be provided onto Mill Lane, Vehicular access may have to be considered along Mill Lane if the upgraded farm track is not of sufficient standard, however, Mill Lane is narrow, with no pavements and providing safe pedestrian access along the road will be difficult as the land along Mill Lane is outside the ownership of the site. Mill Lane is also a public right of way and this would need to be accommodated within the access. The positive score relates to the proximity of the site to services and facilities but the outcome for the access part of the Sustainability Objective will depend on the detail of the proposal.	✓	?	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	0		Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village a vehicle access can be provided by making up the farm access to the south east of the site which also runs alongside MAR304 and MAR300; although	✓	?	Low	Local	Permanent	Long

	<p>this is very narrow along the eastern length, especially if it is serving three sites. A pedestrian and cycle access could be provided onto Mill Lane. Vehicular access may have to be considered along Mill Lane if the upgraded farm track is not of sufficient standard, however, Mill Lane is narrow, with no pavements. Providing safe pedestrian access along the road will be difficult as the land along Mill Lane is outside the ownership of the site. Mill Lane is also a public right of way and this would need to be accommodated within the access. Mill Lane is already heavily trafficked at the western end due to the commercial activities close to the junction with Sea Dyke Way, the increase in traffic from the development, which could accommodate up to 34 additional dwellings, will add to the amount of traffic on Mill Lane and potential conflict between vehicles and pedestrians. The access arrangements for the site will also have to take account of the need for farm vehicles to access the land to the east. The outcome for the inclusive and vibrant part of the Sustainability Objective is positive due to the location of the site. However, the outcome for the safe part of the objective will depend on the detail of the proposal.</p>						
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long	
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None	
12. Encourage and provide	The site is close to the services and	✓	Low	Local	Permanent	Long	

<p>the facilities and infrastructure for “healthy lifestyles”</p>	<p>facilities in the village a vehicle access could be provided by making up the farm access to the south east of the site which also runs alongside MAR304 and MAR300; although this is very narrow along the eastern length, especially if it is serving three sites. A pedestrian and cycle access can be provided onto Mill Lane. Vehicular access may have to be considered along Mill Lane if the upgraded farm track is not of sufficient standard. A public right of way runs alongside the site through Mill Lane and out into the open countryside, this needs to be accommodated within the access arrangements for the site and should encourage walking and cycling.</p>					
<p>13. Positively plan for, and minimise the effects of, climate change.</p>	<p>The site is close to the services and facilities in the village access could be provided by making up the farm access to the south east of the site which also runs alongside MAR304 and MAR300; although this is very narrow along the eastern length, especially if it is serving three sites. A pedestrian and cycle access can be provided onto Mill Lane. <p>Summary: The site is free from flood risk apart from the northern edge which lies in the red (danger for all) and orange (danger for most) areas on the EA flood hazard maps. The site has poor boundary treatments and any landscaping would improve biodiversity, its development would however impact on the wider landscape as it is a flat site with wider views to the east of the village. The site is close to services and facilities in the village including the school. Vehicular access arrangements to the site are uncertain at the moment. A vehicle access could be provided by utilising the farm track that runs down the side of MAR304 and MAR300; although this is very narrow along the eastern length, especially if it is serving three sites and it would need to be certain that this route could accommodate the additional development. A pedestrian and cycle access could be provided onto Mill Lane, which is a public right of way leading out into the open countryside. However, if Mill Lane is required to provide vehicular access, there will a number of constraints that will need to be overcome to establish a site that addresses all aspects of the sustainability objectives.</p>

**Site Reference Number: MAR300**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has very little in the way of boundary treatments on it, however, there are some trees within the site. There are also a number of agricultural buildings on the site, which may house some biodiversity, however, these would be lost as they are not suitable for conversion. Any additional landscaping would enhance biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is relatively flat there are agricultural buildings on it which block any wider views of the landscape; however, these would be lost as they are not suitable for conversion. From the north, the site will be visible but will form part of an already developed area of the village. The site is visible across the countryside in views from footpath number 23. Trees within the site help to lessen the impact of the majority of the site in views from the south, however the south eastern part of the site will be visible. Landscaping the site could improve the aspect of the site. The site would not impact on the townscape or historic environment.	✓	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts	The site is mainly outside the flood risk area, apart from a small section of the north part of the site near the access. It is	✓	Low	Local	Permanent	Long

of flooding where it cannot be avoided.	in the yellow and green zones on the EA flood hazard maps.					
5. Promote viable and diverse economic growth that supports communities within the district.	The site is currently in use as an agricultural use and it is uncertain if the business can continue with the loss of the site.	?	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature. Half of this site has agricultural buildings on it with the rest being grassed field which is Grade 2 agricultural land.	X	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village, a vehicle access can be provided onto the main road by making up the farm access which runs alongside the site and out onto the main road. There is a pavement on the west side of Sea Dyke Way that leads to the services and facilities in the village.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village, a vehicle access can be provided onto the main road by making up the farm access which runs alongside the site and out onto the main road. There is a pavement on the west side of Sea Dyke Way that leads to the services and facilities in the village.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village, a vehicle access can be provided onto the main road by making up the farm access which runs alongside the site and out onto the main road. There is a pavement on the west side of Sea Dyke Way that leads to the services and facilities in the village.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village, a vehicle access can be provided onto the main road by making up the farm access which runs alongside the site and out onto the main road. There is a pavement on the west side of Sea Dyke Way that leads to the services and facilities in the village.	✓	Low	Local	Permanent	Long
Summary: The site is free from flood risk apart from a section in the north near the access which lies in the orange zone (danger for most) on the EA flood hazard maps. The site has poor boundary treatments apart from some trees within the site and any landscaping would improve biodiversity. Large agricultural buildings on the site currently blocking views to the south of the village, however these will be lost with the development of the site. The site will be visible in views from the east and the south and additional landscaping will help minimise the impact. The site is close to services and facilities in the village including the school, a vehicle access could be provided by utilising the farm track that runs down the side of site out onto the main road. There is a pavement on the west side of Sea Dyke Way that leads to the services and facilities in the village.

## NORTH THORESBY

<b>Site Reference Number: NTH203</b>						
Any Assumptions:						
<ul style="list-style-type: none"> <li>•</li> </ul>						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas’ biodiversity (native plants and animals) and geodiversity.	The site is a plant nursery with reasonable boundary treatment lying to the south of Ludborough Road. There are opportunities for biodiversity in the hedges around the site. On balance the replacement of the structures associated with the nursery business with houses would have little impact on biodiversity and there is not sufficient space to enhance planting on site that it would increase opportunities for biodiversity.	<b>0</b>	Low	Local	Permanent	Long

2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a plant nursery with reasonable boundary treatment lying to the south of Ludborough Road. The site itself is fairly enclosed and development would not impact on the wider landscape. There is an impact on the townscape because the site effectively juts out into the open countryside and would be backland development in a predominantly linear part of the village. There is no impact on the historic environment.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site is currently an operational business. Redevelopment of the site would require the business to close or move elsewhere.	<b>X</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a plant nursery with associated structures and therefore brownfield.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is approximately 800m from services and facilities, with no footpath on Ludborough Road for 190m and then it starts on the opposite side of the road. Ludborough Road also does not have street lighting. There is a public footpath running across the northern boundary of the site which comes out further up Ludborough Road to the village but it still leaves a gap with no footpath and no prospect of providing one.	<b>X</b>	High	Local	Permanent	Long

8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 800m from services and facilities' with no footpath on Ludborough Road for 190m and then it starts on the opposite side of the road, Ludborough Road also does not have street lighting. There is a public footpath running across the northern boundary of the site which comes out further up Ludborough Road to the village but it still leaves a gap with no footpath and no prospect of providing one. The vehicle access to the site is down a long narrow track between two houses, whilst its already the access for the nursery, potentially housing could be more traffic movements and would be detrimental to the occupiers of the two properties because it would need widening to accommodate more vehicles.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

The site is a grassed field and agricultural land with hedges as its boundary. There is a beck running along the southern boundary of the site. Landscaping with in the site itself would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is grassed field and agricultural land to the south of Station Road, views of the site are well screened by existing development along Station Road so there would be no impact on the wider landscape. There are trees protected by tree preservation order at the entrance to the site which, although outside the site, may be affected by the access. The treed frontages along Station Road are an importance aspect its character. There access to the site is opposite a grade II listed building, but the impact on its setting is not likely to be significant.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the	No impact	○	Low	Local	None	None

impacts of unavoidable losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk apart from the very rear from the Black Leg Drain	✓	Medium	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is a Grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is near the eastern edge of the village but still within the built up part of the village, it however protrudes into the open countryside from a narrow access off Station Road. The main body of the site is approximately 1km from services and facilities, there is a footpath leading to the centre on the opposite side of the road. The site is in excess of 5 hectares and would be required to provide green infrastructure as part of the development.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is near the eastern edge of the village but still within the built up part of the village, it however protrudes into the open countryside from a narrow access off Station Road which cannot be widened. The main body of the site is approximately 1km from services and facilities there is a footpath leading to the centre on the opposite side of the road.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is	✓	Low	Local	Permanent	Long

	a large village with a range of services and facilities.					
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is near the eastern edge of the village but still within the built up part of the village, it however protrudes into the open countryside from a narrow access off Station Road. The main body of the site is approximately 1km from services and facilities. There is a footpath leading to the centre but it is on the opposite side of the road. The site is in excess of 5 hectares and would be required to provide green infrastructure as part of the development.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is near the eastern edge of the village but still within the built up part of the village, it however protrudes into the open countryside from a narrow access off Station Road. The main body of the site is approximately 1km from services and facilities. There is a footpath leading to the centre but it is on the other side of the road. The site is close to two potential wildlife corridors, and well constructed landscaping within the site could help with species migration,	✓	Low	Local	Permanent	Long
<p>Summary: There is a very small area of flood risk to the south of the site but the majority is not in flood risk. The site is grassed field and agricultural land to the south of Station Road; views of the site are well screened by existing development along Station Road so there would be no impact on the wider landscape. There are trees protected by tree preservation order at the access to the site which may be affected by the development, treed frontages are an important element of the character of this part of the village. The entrance to the site is opposite a listed property but there is unlikely to be significant impact. The site is near the eastern edge of the village but still within the built up part of the village, it however protrudes into the open countryside from a narrow access off Station Road which cannot be widened. The main body of the site is approximately 1km from services and facilities' there is a footpath leading to the centre but it is on the opposite side of the road.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is agricultural land running alongside the A16 and the south of the High Street. Its boundary treatment is hedges and trees. Landscaping within the site itself would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is agricultural land running alongside the A16 and the south of the High Street. Its boundary treatment is hedges and trees. The site is very open from the A16 and the development would have a significant impact in view from the west towards the village. Views of the landscape from the village are somewhat blocked by the existing development although the site will be highly visible to immediate neighbours and obstruct their view of the	X	Medium	Local	Permanent	Long

	<p>wider landscape. There would not be an impact on the townscape. There would be no impact on the historic environment. Historic England raised the impact on the grade II* listed church and grade II farmhouse (which respectively lie approximately 435m and 235m north of the site). The site has been reassessed. The setting of Walnut Cottage grade II and 67m to the east of the sites) is not affected due to the southerly setting of the building and the impact from the west is already impacted by the intervening modern terrace. The main setting of the Thatched Cottage/ The Farmhouse is the square and north of the building, therefore this site, which lies to the south, has no impact on the setting. The church is in quite an elevated position but is not prominent in views into or out of the site. Due to the settlement form and intervening trees and hedges, the setting of the church is experienced more in relation to Church Lane and Stanholme Lane. Incremental development here has already impacted on the setting of the church. There are views of the Lincolnshire Wolds on the western edge of this site and development may impact on historic Wolds/Marsh setting when looking down from higher elevations, but this can be ameliorated by design and use of materials.</p>					
<p>3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.</p>	<p>No impact</p>	<p>0</p>	<p>Low</p>	<p>Local</p>	<p>None</p>	<p>None</p>

promotion of sustainable modes of access.	also does not have street lighting. Sport and recreation facilities are either more distant or are more directly accessed along the A16, which has no footways, lighting and is subject to fast flowing traffic.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is over 800m services and facilities with no footpath on Ludborough Road for more than 200m and then it starts on the opposite side of the road, Ludborough Road also does not have street lighting.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>0</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is over 800m from services and facilities with no footpath on Ludborough Road for more than 200m and then it starts on the opposite side of the road, Ludborough Road also does not have street lighting. Sport and recreation facilities are either more distant or are more directly accessed along the A16, which has no footways, lighting and is subject to fast flowing traffic.	<b>X</b>	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is over 800m from services and facilities with no footpath on Ludborough Road for more than 200m and then it starts on the opposite side of the road, Ludborough Road also does not have street lighting.	<b>X</b>	High	Local	Permanent	Long

Summary: The site is not in flood risk. The site is a grassed open field lying on the corner of the A16 and Ludborough Road. Boundary treatment is quite poor made up of low hedges except along the southern and eastern boundaries. The sites itself is open from the A16 and as you turn into Ludborough Road the site will be highly visible. Views of the wider landscape from the east are blocked by the boundary treatment along the southern and eastern boundaries. There is an impact on the townscape because the site effectively sits in the open countryside and does not have a relationship with the wider built up settlement. There is no impact on the historic environment. It is over 800m from services and facilities with no footpath on Ludborough Road for more than 200m and then it starts on the opposite side of the road, Ludborough Road also does not have street lighting.

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site was a nursery with greenhouses/ poly tunnels with reasonable boundary treatment lying off the A16. The site has now become disused. There is a drain along the northern boundary and a wooded area also to the north, which may be host to a variety of species and landscaping could enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site was a nursery with greenhouses/ poly tunnels. The site itself is fairly enclosed, however, the boundary to the A16 is fairly open and the site would be very visible from the A16, however, it would not impact on the wider landscape. There is an impact on the townscape because the site effectively is in the open countryside with no connection to the settlement. There would be no impact on the historic environment.	X	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding	The site is not in flood risk	✓	Low	Local	Permanent	Long

(where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact, the site's former commercial use has ceased.	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is greenhouses and therefore brownfield. However, the structures on site are starting to degrade and the site is slowly returning to nature.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is not close to services (being 1.2km from the majority of services in the village) and the only possible access is off the A16 which then would not effectively link up the village. There is a public right of way running past the site to the village but it is still along way from services and facilities.	✗	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	It is not close to services (being 1.2km from the majority of services in the village) and the only a possible access is off the A16 which then would not effectively link up the village. There is a footpath running past the site to the village but it is still along way from services and facilities.	✗	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is not close to services (being 1.2km from the majority of services in the village) and the only a possible access is off the A16 which then would not effectively link up the village. There is a footpath running past the site to the village and out into the wider countryside, which could facilitate walking, but it is still along way from services and facilities.	<b>X</b>	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is not close to services (being 1.2km from the majority of services in the village) and the only a possible access is off the A16 which then would not effectively link up the village. 	from the village, there is no footpath link until the other side of the heritage railway line and then it is on the opposite side of the road, this would be development in the open countryside.					
13. Positively plan for, and minimise the effects of, climate change.	The main services and facilities in the village are over 1km away. The site is completely detached from the village, there is no footpath link until the other side of the heritage railway line and then it is on the opposite side of the road, this would be development in the open countryside.	<b>X</b>	High	Local	Permanent	Long
<p>Summary : The southern third of the site is in flood zone two, although the remainder of the site is not in flood risk. The site is an agricultural field with open boundary treatment on the east and south, a sparse hedge line along the northern edge and some boundary treatment on the west, including trees protected by tree preservation order. There would be an impact on the wider landscape because the site allows views out to the south and is very open as you move in towards the village. There would be an impact on the townscape because the site is out in the open countryside and completely detached from the village. There would also be an impact on the historic environment in respect of the heritage railway to the west of the site. The site is over 1km away from services and facilities and completely detached from the village. There is no footpath link until the other side of the disused railway line and then it is on the opposite side of the road; this would be development in the open countryside.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a reasonably flat grassed field with hedging along Hardings Lane, a post and rail fence to the south and west boundaries, the post and rail fence along the north boundary is supplemented by a brick wall. There are a few small trees in the site with some trees to the west of the site which would have to remain within the site. The site is less than a hectare in size and has not been intensively farmed. As a	<b>X</b>	Low	Local	Permanent	Long

	result the site could already be host to biodiversity so it is unlikely that development of the site would enhance biodiversity.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The development of the site will not impact on the wider views of the landscape, it is reasonably enclosed; views across to the south are blocked by a garden wall and house located in Scremby Road. The site will not impact on the townscape or historic environment.	○	Low	Local	None	None
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. The site is predominantly grade 2 agricultural land with a small portion at the east end being grade 3.	✗	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities including the school. There is a footpath link once you enter Scremby Road. There is a public right of way which runs across the site and links into a network which extends out into the open countryside.	✓	Low	Local	Permanent	Long

8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities including the school. There is a footpath link once you enter Scremby Road. There is a public footpath which runs across the site and links into a network which extends out into the open countryside. An access can be formed onto Hardings Lane but it will involve the loss of some of the hedge and the lane is very narrow without street lighting. However, the crossroads of Scremby Road, with its footpath and street lighting are close to the north east corner of the site.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities including the school. There is a footpath link once you enter Scremby Road. The site is small and would not be able to add to facilities for healthy lifestyles and there are no recreation facilities in the village. However, there is a public footpath which runs across the site and links into a network which extends out into the open countryside.	✓	Medium	Local	Permanent	Long

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has a variety of open boundaries, hedgerows and mature trees. There are drains along the northern and western boundaries, as well as one running through the centre of the site and these could be host to wildlife. Otherwise, the site is largely featureless and any landscaping, including green infrastructure required with development, would enhance biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is flat with a variety of open boundaries, hedgerows and mature trees. The properties along the A16 block views of the wider landscape, there is a view of the listed windmill as you enter the village from the north and development would have to be designed to protect this. The development would however be highly visible in view when approaching the village from the north. The site would not impact	X	Medium	Local	None	Long

	on the townscape. Overall there will be some impact.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 2 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in the village, there are a number of opportunities for vehicle and pedestrian accesses from the site, Millers Gate and onto the A16 from two potential points (at least one of which has been confirmed by adjoining landowner) and there are footpaths along the main road. This site is large enough to provide some open space/green infrastructure.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in the village, there are a number of opportunities for vehicle and pedestrian accesses from the site, Millers Gate and onto the A16 from two potential points (at least one of which has been confirmed by adjoining landowner) and there are	✓	Low	Local	Permanent	Long

	footpaths along the main road. This site is large enough to provide some open space/green infrastructure.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in the village, there are a number of opportunities for vehicle and pedestrian accesses from the site, Millers Gate and onto the A16 from two potential points (at least one of which has been confirmed by adjoining landowner) and there are footpaths along the main road. This site is large enough to provide some open space/green infrastructure. It is also adjacent to Sibsey Playing Fields, although there is currently no access to the agricultural land.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in the village, there are a number of opportunities for vehicle and pedestrian accesses from the site, Millers Gate and onto the A16 from two potential points (at least one of which has been confirmed by adjoining landowner) and there are footpaths along the main road. This site is large enough to provide some open space/green infrastructure.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is flat with a variety of open boundaries, hedgerows and mature trees. The properties along the A16 block views of the wider landscape, there is a view of the listed windmill as you enter the village from the north and development would have to be designed to protect this. The site would not impact on the townscape, however it would be very visible in view entering Sibsey from the north. Overall though there will be some impact. The site is close to the services and facilities in the village, there are a number of opportunities for vehicle and pedestrian accesses from the site, Millers Gate and onto the A16 from two potential points (at least one of which has been confirmed by adjoining landowner) and there are footpaths along the main road. This site is large enough to provide some open space/green infrastructure.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is agricultural fields with good boundary treatment along the A16 frontage but poor along its boundaries with the countryside. There are number of drains within the site that could host wildlife but otherwise the site is largely featureless. Landscaping within the site itself, including the provision of green infrastructure, would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is agricultural fields with good boundary treatment along the A16 frontage but poor along its boundaries with the countryside. There would be an impact on the wider landscape because the site allows views from Church Walk out to the north and east, though these lie at the end of a cul de sac so not open to wider public views. Also along the open parts of the A16 there are views to the east and development on the site would be highly visible. The site would also be very visible in views into Sibsey when approaching from the east. There would not be an impact on the townscape because the site lies within an area which would form a natural	X	Medium	Local	Permanent	Long

	<p>extension to the village. There would be some impact on the historic environment. The adjacent Sibsey House and Rhoades Mill to the north are both listed and careful design would need to mitigate against this. Historic England raised the potential impact on heritage assets, including Sibsey House and Sibsey Trader Mill, which are both listed buildings, in the June 2016 consultation. Rhoades Mill is also close to the site. The site has been reassessed. Sibsey Trader Mill is not visible from the site (it is approx. 750m away) due to a line of trees. However, when travelling east away from the site the Trader Mill materializes into view and impacts the setting. Sibsey House and Coach House to the west of the site are only impacts to the south, as the northern and eastern settings are already impacted by mode rousing. The entrance to the site, which is to the left of Sibsey House, is narrow, tree clearance will need to be undertaken to create a suitable entrance, this will have significant impact on the setting. Rhoades Mill setting is impacted by the site to the east. All impacts can be offset with good design that allows development to blend within its surroundings and strategic open spaces with good tress planting.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is an open agricultural field. There also is a deep drainage ditch running across the southern boundary and smaller one along the Station Road frontage, these will contain biodiversity. Otherwise the site is largely featureless and landscaping within the site itself would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is flat with open wide views across it from the north and west through which the houses on Station Road and the church can be seen. The site was identified as important in the Sibsey Design guide and there would be an impact on the townscape because the site lies on the edge of the village and forms part of its countryside setting and entrance to the village from the south, this is emphasised by the open boundaries. There would be slight impact on the historic environment due to view towards the church but this is distant and could be mitigated.	X	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	✓	High	Local	Permanent	Long
5. Promote viable and diverse economic growth	No impact	0	Low	Local	None	None

that supports communities within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 2 agricultural land.	X	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to services and facilities with a footpath to the centre of the village. Given the sites size, it would have to provide green space/open space.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	0	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities with a footpath to the centre of the village. Access can be achieved onto Station Road.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities with a footpath to the centre of the village. Some open space will be required as part of the development.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities with a footpath to the centre of the village and close to bus stops to access the regular bus service to Boston.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is very open agricultural field. It has a drainage ditch along the southern boundary and a smaller one along Station Road, these will contain biodiversity. There are wide views across the site from the south and west through which can be seen the houses on Station Road and the church. The site was identified in the Sibsey Design Guide as of importance to the village and there would be an impact on the townscape because the site lies on the edge of the village and forms part of its countryside setting and the entrance to the village from the south, this is emphasised by the open boundaries. There would be a slight impact on the historic environment as the church can be seen in views across the site, but this can be mitigated. The site is close to services and facilities with a footpath to the centre of the village and close to bus stops. Given the site's size, development will be required to provide green space/open space. Access can be achieved onto Station Road.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a dwelling, barn, listed converted windmill, stables, workshop and menage. The western portion of the site is quite enclosed with boundary treatments of hedges and trees. The site is adjacent to a network of drainage ditches which will host biodiversity. Elsewhere, there are opportunities to enhance biodiversity with landscaping within the site itself.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a dwelling, barn, listed converted windmill, stables, workshop and menage. The site is enclosed by dwellings along the A16 and boundary treatment, there would be very limited impact in views of the wider landscape. However, the eastern part of the site would impact in views from Pymoor Lane to the north, where the football pitches are, as there is little intervening landscaping. There would be some impact on the townscape because the site lies in a part of the village with linear development, this site stretches out to the east, which on its own would be out of context with the existing pattern of development. There would be an impact on the historic environment, as development will have an impact on the setting of the listed former mill.	X	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable	No impact	0	Low	Local	None	None

losses and pollution.						
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is outside the flood hazard area.	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is 50% in Grade 2 agricultural land.	✗	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is relatively close to services and facilities with a footpath to the centre of the village. If the whole of the site were to be developed, some green space/open space would have to be provided and this would be better located in the eastern part of the site to reduce landscape impact.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is relatively close to services and facilities with a footpath to the centre of the village. Access can be achieved onto the A16 but it is not satisfactory being only a narrow access which at present serves one dwelling, there is no room to widen the access and its intensification of use would impact on the amenities of the two properties either side.	✗	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities with a footpath to the centre of the village. If the whole of the site were to be developed, some green space would be required and this would be better located in the eastern part of the site to reduce landscape impact.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities with a footpath to the centre of the village. Any development should retain the drainage ditches around the site which facilitate species migration.	✓	Low	Local	Permanent	Long

Summary: The site is outside the flood hazard areas. The site is a dwelling, barn, listed converted windmill, stables, workshop and menage. The site is enclosed by dwellings along the A16 and boundary treatment, there would be very limited impact on the wider landscape from the A16, however the site would impact on the landscape in views from Pymoor Lane where the village football pitches are located. There would be some impact on the townscape because the site lies in a part of the village with linear development, this site stretches out to the east and on its own would be out of context with the existing pattern of development. There would be an impact on the historic environment; development will have to take care with regard the setting and views of the windmill from the A16. The site is relatively close to services and facilities with a footpath to the centre of the village. Access can be achieved onto the A16 but it is not satisfactory being only a narrow access which at present serves one dwelling, there is no room to widen the access and its intensification of use would impact on the amenities of the two properties either side.

	A16 but it is not satisfactory being only a narrow access which at present serves one dwelling, there is no room to widen the access and its intensification of use would impact on the amenities of the two properties either side.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities with a footpath to the centre of the village.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities with a footpath to the centre of the village.	✓	Low	Local	Permanent	Long
<p>Summary: The site is not in flood risk. The site is the rear portion of garden and is quite enclosed with mature boundary treatments of hedges and trees to the rear; the garden also has a large pond in it which will contain biodiversity. Given the size of the pond and its potential to encourage wildlife from the surrounding land, development would impact the quality of biodiversity. The site would not impact on the wider landscape, townscape or historic environment. The site is close to services and facilities with a footpath to the centre of the village. Access can be achieved onto the A16 but it is not satisfactory being only a narrow access which at present serves one dwelling, there is no room to widen the access and its intensification of use would impact on the amenities of the two properties either side.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity	The site is an industrial area. There is little in the way of landscaping. The site lies adjacent to the railway line, which may	✓	Low	Local	Permanent	Long

(native plants and animals) and geodiversity.	form a wildlife corridor and, as a buffer zone would have to be provided, this could be used to enhance biodiversity on site.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an industrial area. It has trees for a boundary feature along Station Road and this does screen the site partially. There are limited impacts on the wider landscape. Development of the site would improve the street scene because at present it is quite industrial in appearance, though it would have an impact on the townscape because it is disconnected from the main body of the village by the railway line, which forms a natural urban break with the countryside. There would be no impact on the historic environment.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is outside the flood hazard areas.	✓	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	The site has been used for industry in the past (plant and machine hire) and there are few opportunities for employment premises in the villages. Its locations, alongside the railway line, means that the impact of the development will be reduced. If the site is taken by housing, it will remove the possibility of an alternative business use on the site.	<b>X</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is site has been used for commercial purposes and is brownfield land.	✓	Low	Local	Permanent	Long

7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is a kilometre from services and facilities. There is pedestrian provision, though the footpath to the centre of the village does not begin until the other side of the railway line. This site would have to provide a buffer to the railway line so would have to provide some green space/planted open space.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is a kilometre from services and facilities. There is a footpath to the centre of the village, though the footpath does not start until the other side of the railway line. The roadway across the railway is a manned crossing at present.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None

Any Assumptions: •						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration

1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with mature boundary treatments of hedges and trees, and a small group of trees within the site; there are a couple of large ponds to the north of the site which could rely on the grassed fields of the site. Landscaping could enhance biodiversity as long as development does not harm any wildlife using the ponds.	✓	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field with mature boundary treatments of hedges and trees and a small group of trees within the site. There would be no impact on the wider landscape because the site is well screened from public viewing places. On its own the site would not relate to the existing built up area and would create a narrow fringe of development extending into the open countryside. There is no impact on the historic environment. Historic England questioned the impact on heritage assets (e.g. potential medieval field system and setting of the conservation area) in the June 2016 consultation. The site has been reassessed. No records appear on the Historic Environment Record for the western half of the site, but the eastern half is recorded as medieval field system associated with Old Spilsby Deserted Medieval Village; this will require further investigation so has been recorded as uncertain as the area has been heavily farmed and it is unclear what remains. There is not considered to be any impact on the setting of Spilsby Conservation Area.	?	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding	The site is not in flood risk	✓	Low	Local	Permanent	Long

(where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to services and facilities as it leads off from the centre of the town. On its own it has no suitable vehicular access and would not be unable to connect to the centre of the town, only a pedestrian access could be provided. By bringing the site forward in conjunction with SPY303, SPY304, SPY305 and SPY306 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. The site would be required to provide green infrastructure.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>0</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities as it leads off from the centre of the town. On its own it has no suitable vehicular access and would not be unable to connect to the centre of the town, only a pedestrian access could be provided. By bringing the site forward in conjunction with SPY303, SPY304, SPY305 and SPY306 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would	✓	Low	Local	Permanent	Long

	link directly to the town centre.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities as it leads off from the centre of the town. On its own it has no suitable vehicular access and would not be unable to connect to the centre of the town, only a pedestrian access could be provided. By bringing the site forward in conjunction with SPY303, SPY304, SPY305 and SPY306 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. There is a public right of way leading out into the open countryside through a nearby car park this could encourage walking.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities as it leads off from the centre of the town. On its own it has no suitable vehicular access and would not be unable to connect to the centre of the town, only a pedestrian access could be provided. By bringing the site forward in conjunction with SPY303, SPY304, SPY305 and SPY306 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. Linking these sites together could provide greater collective opportunities for greenspace, biodiversity and species adaptation and	✓	Low	Local	Permanent	Long

migration.					
<p>Summary; The site is not in flood risk. The site is a grassed field with mature boundary treatments of hedges and trees, a small group of trees within the site and there are a couple of large ponds to the north of the site which could rely on the grassed fields of the site. Landscaping could enhance biodiversity as long as development would not harm any wildlife using the ponds. There would be no impact on the wider landscape because the site is well screened from public viewing places. On its own the site would not relate to the existing built up area and would create a narrow fringe of development extending into the open countryside. There is no impact on the historic environment. Historic England questioned the impact on heritage assets (e.g. potential medieval field system and setting of the conservation area) in the June 2016 consultation. The site has been reassessed. No records appear on the Historic Environment Record for the western half of the site, but the eastern half is recorded as medieval field system associated with Old Spilsby Deserted Medieval Village; this will require further investigation so has been recorded as uncertain as the area has been heavily farmed and it is unclear what remains. There is not considered to be any impact on the setting of Spilsby Conservation Area. The site is close to services and facilities leading off from the centre of the town. On its own it has no suitable vehicular access and would not be unable to connect to the centre of the town, only a pedestrian access could be provided. By bringing the site forward in conjunction with SPY303, SPY304, SPY305 and SPY306 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. There is a public right of way leading out into the open countryside through a nearby car park this could encourage walking. Linking these sites together could provide greater collective opportunities for greenspace, biodiversity and species adaptation and migration. However, there would potentially be a greater cumulative impact in respect of landscape impact.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is house and garden. To the rear is a grassed field with good mature boundary treatment of hedges and trees. There are a series of large ponds to the north of the site which could have biodiversity which are symbiotic to the grassed field. The area around the pond closest to the site is well treed, and covered by a tree preservation order. There is also a tree lined public footpath along the western boundary of the site which link to the pond. Although the site itself is unlikely to contain a high level of biodiversity in its own right, has the potential to impact on species using the adjoining wildlife corridors. The potential impact would depend on how this site was	?	Medium	Local	Permanent	Long

	developed.					
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is house and garden. There is a single storey building on the site which would have to be demolished along with the house to gain access. There is no impact on the wider landscape because the site is enclosed by the properties along Ashby Road. There is a public footpath along the western boundary of the site, but this is tree lined and development would be read against a backdrop of existing built development so impact could be managed. There is some impact on the townscape because the site has single story dwelling on it and this with the little single storey building on the adjacent site, and neighbouring house, forms an a part of the historic streetscape in this part of the settlement.	<b>X</b>	Medium	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is part of an agricultural field with boundary treatments of hedges and trees along a section to the south, although little in the way of features within the site. A drainage ditch runs along part of the eastern boundary which may provide opportunity for wildlife. As the site is the eastern most site, and has a weak eastern boundary treatment, additional landscaping would be needed here and this could enhance biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is an agricultural field with boundary treatment of hedges and trees. There would be some impact on the wider landscape; the land is quite screened from wider views because it slopes upwards towards the north, though development may break the skyline. A public right of way also runs along the southern boundary so development would be prominent in views from this footpath. On its own the site is a field in the open countryside and would not relate to the existing built up area and would extend into the open countryside. There would be no impact on the historic environment. However, Historic England questioned the impact on heritage assets (e.g. potential medieval field system and setting of the conservation area) in the June 2016 consultation. The site has been reassessed. The site is recorded as medieval field system associated with Old Spilsby Deserted Medieval Village; this will require further investigation as the area has	X	High	Local	Permanent	Long

	been heavily farmed and it is unclear what remains. The degree of impact as been recorded as uncertain There is considered to be no impact on the setting of the church or conservation area.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>0</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>0</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is detached from the town being in the open countryside, there is no access to the site. By bringing the site forward in conjunction with SPY301, SPY303, SPY304 and SPY305 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. A site of this size could provide some green space/open space. It could also be an option to bring all the sites on the east forward with a vehicle link connection between Ashby Road and the B1195, relieving traffic pressure from the town centre. There is a public footpath running adjacent to the site along the south	✓	High	Local	Permanent	Long

	boundary which leads out to the open countryside this could encourage walking.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is detached from the town being in the open countryside, there is no access to the site. By bringing the site forward in conjunction with SPY301, SPY303, SPY304 and SPY305 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. A site of this size could provide some green space/open space. It could also be an option to bring all the sites on the east forward with a vehicle link connection between Ashby Road and the B1195, relieving traffic pressure from the town centre.	✓	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a town with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is detached from the town being in the open countryside, there is no access to the site. By bringing the site forward in conjunction with SPY301, SPY303, SPY304 and SPY305 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. A site of this size could provide some green	✓	High	Local	Permanent	Long

	space/open space. It could also be an option to bring all the sites on the east forward with a vehicle link connection between Ashby Road and the B1195, relieving traffic pressure from the town centre.					
13. Positively plan for, and minimise the effects of, climate change.	The site is detached from the town being in the open countryside, there is no access to the site. By bringing the site forward in conjunction with SPY301, SPY303, SPY304 and SPY305 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. A site of this size could provide some green space/open space. It could also be an option to bring all the sites on the east forward with a vehicle link connection between Ashby Road and the B1195, relieving traffic pressure from the town centre. Linking these sites together could provide greater collective opportunities for greenspace, biodiversity and species adaptation and migration.	✓	High	Local	Permanent	Long

Summary: The site is not in flood risk. The site is an agricultural field with broken boundary treatments of hedges and trees and a drainage ditch along part of the western boundary. There would be some impact on the wider landscape; the land is quite screened from wider views because it slopes upwards towards the north, though development may break the skyline and this part of the site does not have strong boundary treatment. On its own the site is a field in the open countryside and would not relate to the existing built up area and would extend into the open countryside. There would be no impact on the historic environment. However, Historic England questioned the impact on heritage assets (e.g. potential medieval field system and setting of the conservation area) in the June 2016 consultation. The site has been reassessed. The site is recorded as medieval field system associated with Old Spilsby Deserted Medieval Village; this will require further investigation as the area has been heavily farmed and it is unclear what remains. The degree of impact as been recorded as uncertain There is considered to be no impact on the setting of the church or conservation area. The site is detached from the town being in the open countryside, there is no access to the site. By bringing the site forward in conjunction with SPY301, SPY303, SPY304 and SPY305 it could form an urban extension scheme which could mirror development in Lady Franklin Drive/Woodland View opposite which would link directly to the town centre. A site of this size could provide some green space/open space. It could also be an option to bring all the sites on the east forward with a vehicle link connection between Ashby Road and the B1195, relieving traffic pressure from the town centre. Linking these sites together could provide greater collective opportunities for greenspace, biodiversity and species adaptation and migration. However, there would potentially be a greater cumulative impact in terms of landscape impact.

**Site Reference Number: SPY310**

## Any Assumptions:

- The site will come forward as a phased development which will extend beyond the lifetime of the Plan.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	This large site is comprised of a number of agricultural fields interspersed with some hedgerows and watercourses, these features may act as wildlife corridors, however, they are not extensive with most of the site being open. There is also a pond on site. The scale of the proposal will allow for opportunity in providing for biodiversity.	✓	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is of large scale, creating a significant extension to Spilsby. Ashby Road and Halton Road run along the northern and southern edges of the site and then deviate tangentially away from the site. The site is visible in views from both roads, although this is interrupted by hedgerows around the site, and the nature of the site's topography, that will break up some of the views. However, the site is quite open in places so there will be an impact on the wider landscape which would require structural landscaping to mitigate.	X	High	Local	Permanent	Medium
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact.	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk.	○	Low	Local	None	None
5. Promote viable and diverse economic growth	No impact.	○	Low	Local	None	None

that supports communities within the district.						
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Grade 3 agricultural land.	X	Medium	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The western boundary of the site is close to the town centre, with the furthest points of the site being a little over 700m away. Pedestrian links can be created from the site directly into the town centre and the associated services and facilities. The site can link to existing footways along Halton Road and Ashby Road. A site of this size would be required to include a comprehensive green infrastructure provision, including recreation space. There are also public rights of way crossing the site which could be incorporated into sustainable access and green infrastructure provision.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact.	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The western boundary of the site is close to the town centre, with the furthest points of the site being a little over 700m away. Pedestrian links can be created from the site directly into the town centre and the associated services and facilities. The site can link to existing footways along Halton Road and Ashby Road. A site of this size would be required to include a comprehensive green infrastructure provision, including recreation space. Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has good boundary features of hedgerow and trees, any landscaping would enhance the quality of the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The boundary treatment provides a green edge to the site, this does go in some way to minimise the impact on the wider landscape, supplementing this planting with additional landscaping would go some way to mitigate any impact further. However, the site is disconnected from the main body of the village and therefore would in effect be development in the open countryside. There would be no impact on the townscape or historic environment.	X	Medium	Local	Permanent	Long

3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; it is therefore inevitable that a large proportion of sites to be considered will be on Greenfield land. This site is grade 2 agricultural land, as is the whole settlement.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is separated from the village which lies to the south, there is sporadic development in this part of the village. Though the site is within walking distance of services and facilities, and there is a footpath on the opposite side of the road, it would mean pedestrians having to cross a fast flowing road which currently has a 60mph speed limit. There is potential to create a footpath on the same side of the road, but this would be 225m in length and the intervening land is not in the same ownership.	<b>X</b>	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is separated from the village which lies to the south, there is sporadic development in this part of the village.	<b>X</b>	Medium	Local	Permanent	Long

	Though the site is within walking distance of services and facilities, and there is a footpath on the opposite side of the road, it would mean pedestrians having to cross a fast flowing road which currently has a 60mph speed limit. There is potential to create a footpath on the same side of the road, but this would be 225m in length and the intervening land is not in the same ownership.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is separated from the village which lies to the south, there is sporadic development in this part of the village. Though the site is within walking distance of services and facilities, and there is a footpath on the opposite side of the road, it would mean pedestrians having to cross a fast flowing road which currently has a 60mph speed limit. There is potential to create a footpath on the same side of the road, but this would be 225m in length and the intervening land is not in the same ownership. The site is in the countryside so it would encourage walking and cycling.	✗	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is separated from the village which lies to the south, there is sporadic development in this part of the village. Though the site is within walking distance of services and facilities, and there on the opposite side of the road, it would mean pedestrians having to cross a fast flowing	✗	Medium	Local	Permanent	Long

	road which currently has a 60mph speed limit. There is potential to create a footpath on the same side of the road, but this would be 225m in length and the intervening land is not in the same ownership..					
--	--	--	--	--	--	--

Summary: There are good boundary features made up of hedgerows and some mature trees. The site is situated to the north of the village where housing becomes sporadic along the A16. There is a footpath link to services and facilities on the opposite side of the road, but it would mean pedestrians having to cross a fast flowing road which currently has a 60mph speed limit. There is potential to create a footpath on the same side of the road, but this would be 225m in length and the intervening land is not in the same ownership. Because of the distance out of the village sporadic nature of development along this part of the A16, the site is unrelated to the existing pattern of development and development would in effect be a discordant feature in the open countryside.

12. Encourage and provide the facilities and infrastructure for “healthy lifestyles”	The site is within walking distance of services and facilities with a footpath on the opposite side of Main Road. The site on the edge of the village, close to the open countryside, so this would encourage walking and cycling.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is within walking distance of services and facilities with a footpath on the opposite side of Main Road.	✓	Low	Local	Permanent	Long
Summary: The site is bounded by mature hedgerows and trees with a hedge row running across the middle of it, any additional planting would enhance biodiversity quality. The site is within walking distance of services and facilities and there is a footpath on the opposite side of Main Road. Because the site is reasonably enclosed with a good green edge, this would minimise the impact on the wider landscape, supplementing this planting with additional landscaping would mitigate any impact further.						

**Site Reference Number: STK313**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has some boundary features of hedgerow and trees, any landscaping would enhance the quality of the biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The boundary treatment provides an adequate feature, this could be supplemented by additional planting which encloses the site and prevents it having an impact on the wider landscape. There would be no impact on the townscape or historic environment.	○	Low	Local	None	None
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in an area of flood risk	✓	Low	Local	None	None
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is garden land for an existing house.	✗	Low	Local	None	None
7. Improve accessibility to key services, facilities	The site is close to services and facilities and can be linked by the existing footpath	✓	Low	Local	Permanent	Long

amenities and green infrastructure including the promotion of sustainable modes of access.	network on the same side of the A16.					
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities and can be linked by the existing footpath network on the same side of the A16.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities and can be linked by the existing footpath network on the same side of the A16.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities and can be linked by the existing footpath network on the same side of the A16.	✓	Low	Local	Permanent	Long
Summary: The site lies close to services and facilities and can be linked by a footpath on the same side of the A16. The site is enclosed with some boundary treatment, so its impact on the wider landscape is minimised, additional planting will minimise its impact further and enhance biodiversity quality. The site is a rear garden of an existing dwelling. The site does not impact on the townscape or historic environment.						

**Site Reference Number: STK314 and STK315**

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is bounded by mature hedgerows and trees though the frontage is open. Any additional landscaping would enhance the quality of biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is reasonably enclosed with a good green edge, this would minimise the impact on the wider landscape, supplementing this planting with additional landscaping would mitigate any impact further as would only allocating development to the extent of the rear boundary of the adjacent brownfield site	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None

use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	brownfield land on which to develop because it is predominately rural in nature; this site is agricultural at present					
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is disconnected from the main body of the village with no clear access except down the narrow West Fen Lane which would need major widening and upgrading, this would be difficult because the West Fen Drain runs down the side of it.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is disconnected from the main body of the village with no clear access except down the narrow West Fen Lane which would need major widening and upgrading, this would be difficult because the West Fen Drain runs down the side of it.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is disconnected from the main body of the village with no clear access except down the narrow West Fen Lane which would need major widening and upgrading; this would be difficult because the West Fen Drain runs down the side of it. There are two public footpaths which run through the site, this could encourage walking.	<b>X</b>	Medium	Local	Permanent	Long
13. Positively plan for, and minimise the effects of,	The site is disconnected from the main body of the village with no clear access	<b>X</b>	High	Local	Permanent	Long

climate change.	except down the narrow West Fen Lane which would need major widening and upgrading, this would be difficult because the West Fen Drain runs down the side of it.					
Summary: The site lies outside the village and can only be accessed from West Fen Lane, a narrow rural lane with little possibility of widening. The boundary treatments are poor, supplementing them would enhance biodiversity but the site would still have an impact on the wider landscape and affect the rural character of the village. The site does not impact on the townscape or historic environment.						

<b>Site Reference Number: STK319</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site does not have that much boundary treatment; there are mature trees along the frontage with some hedgerows. Any landscaping scheme would enhance the quality of biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The boundary treatment to the frontage of the site is very strong, however, the boundary treatment is not very good on the remainder of the site. Supplementing this planting with additional landscaping would mitigate any impact further as would only allocating development to the extent of the rear boundary of the adjacent brownfield site. There would be no impact on the townscape or historic environment.	○	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is not in an area of flood risk	✓	Low	Local	None	None

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	0	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is brownfield being a mixture of green open space, buildings and storage.	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is within walking distance of services and facilities with a footpath on the opposite side of Main Road.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	0	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is within walking distance of services and facilities with a footpath on the opposite side of Main Road.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is within walking distance of services and facilities with a footpath on the opposite side of Main Road. 	leading into the open countryside. The site is in a flood risk area.					
<p>Summary: The site is reasonably close to services and facilities but there is no footpath link on West Fen Lane. The site does not have landscape features, and is alongside West Fen Drain so there may be some biodiversity interest, any additional planting could enhance biodiversity. The site does impact on the wider landscape because it stretches out into the open countryside and any planting would not minimise the impact. The site would also impact on the rural character of this part of the village. The site would not impact on the townscape or historic environment. The site is in a flood risk area.</p>						

## TETFORD

<b>Site Reference Number: TEF302</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a mixture of factory, offices, shop, storage yard, housing and plant nursery. Landscaping would enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a mixture of factory, offices, shop, storage yard, housing and plant nursery. The site is within the Lincolnshire Wolds Area of Outstanding Natural Beauty, but because of the existing houses along South Road and the boundary treatment along the eastern boundary and the fact that the site is relatively flat, development would not impact on wider views of the landscape. However, there is a public right of way running along the southern boundary of the site and the site is likely to be prominent in views from the here. The degree of impact will depend on the scheme put forward. There is no impact on the townscape or historic environment.	?	Low	Local	Permanent	Long
3. Protect natural resources from avoidable losses and	No impact	0	Low	Local	None	None

pollution and minimise the impacts of unavoidable losses and pollution.							
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long	
5. Promote viable and diverse economic growth that supports communities within the district.	The site is currently in commercial operation being the single largest employer in Tetford and providing the potential for jobs in the local community. Even if the current operators were seeking to relocate, if the site is redeveloped for housing, it would remove the possibility of an alternative business taking on the premises.	X	Low	Local	None	None	
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site (the nursery part) is Grade 3 agricultural land. However, part of the site is previously used.	X	✓	Low	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	It is close to services and facilities with a footpath on the opposite side of the road, there is room to form a footpath on the side of the site. However, much of Tetford does not have the benefit of footpaths, with its character being predominantly that of quite rural lanes. At 2 hectares, the site would be expected to provide some green infrastructure, although this would be small scale.	✓	Low	Local	Permanent	Long	
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None	
9. Support inclusive, safe and vibrant communities.	It is close to services and facilities with a footpath on the opposite side of the road. However, much of Tetford does not have the benefit of footpaths, with its character being predominantly that of quite rural	✓	Low	Local	Permanent	Long	

	lanes.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities relative to its size.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	It is close to services and facilities with a footpath on the opposite side of the road. However, much of Tetford does not have the benefit of footpaths, with its character being predominantly that of quite rural lanes. At 2 hectares, the site would be expected to provide some green infrastructure, although this would be small scale. The site is not far from the open countryside and there are a number of public footpaths to encourage walking.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	It is close to services and facilities with a footpath on the opposite side of the road. However, much of Tetford does not have the benefit of footpaths, with its character being predominantly that of quite rural lanes.	✓	Low	Local	Permanent	Long
<p>Summary; The site is not in flood risk. The site is a mixture of factory, offices, shop, storage yard, housing and plant nursery. Although located within the Lincolnshire Wolds Area of Outstanding Natural Beauty, because of the existing houses along South Road and the boundary treatment along the eastern boundary and the fact that the site is relatively flat development would not impact on wider views of the landscape. There is no impact on the townscape or historic environment. Loss of the site would involve loss of the single largest employer within the village, in an area where employment is not readily available. It is close to services and facilities with a footpath on the opposite side of the road. The site is not far from the open countryside and there are a number of public footpaths to encourage walking,</p>

The site is on the edge of the village but with development to the east and south. It is approximately 800m to the centre of the village and there is a footpath link from the site into the village. The site is not large enough to provide significant areas of green infrastructure, but the flood risk issues affecting the site could enable some amenity areas to be provided.	✓	Medium	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is approximately 800m to the centre of the village and there is a footpath link from the site into the village.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is approximately 800m from the centre of the village with a footpath link to the centre to enable access to sport and recreation facilities.	✓	Medium	Local	Permanent	Long

13. Positively plan for, and minimise the effects of, climate change.	The site is approximately 800m from the centre of the village with a footpath link to the centre to enable access to services and facilities. There is space within the site to address flood risk issues.	✓	Medium	Local	Permanent	Long
Summary: The site is partially in the red and orange zones on the EA flood hazard maps, this includes the access to the site and if development were to proceed, the area of the site suitable for development would be very small. The site is an agricultural field with hedges along the most boundaries. It is approximately 800m from the centre of the village, although further from some facilities, and with a footpath link to enable pedestrian access to services and facilities. The site sits within a flat landscape but is well screened from wider views by intervening development and landscaping. There is no impact on the historic environment.						

<b>Site Reference Number: TNY309</b>						
Any Assumptions:

	environment conducive to walking. There may be some impact on the residential houses by the use of the access though it is presently used for agricultural vehicles. There is a public right of way running into the village along the west boundary of the site.					
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is detached from the main body of the village and is somewhat isolated. It is accessed down a lane which runs past some residential houses. The lane accesses out onto a narrow lane with no footpath for over 500m or lighting over much of this distance which would not offer an environment conducive to walking. There may be some impact on the residential houses by the use of the access though it is presently used for agricultural vehicles. There is a public right of way running into the village along the west boundary of the site which could encourage walking to access services and facilities including those for recreation.	✗	High	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is detached from the main body of the village and is somewhat isolated. The site accesses out onto a narrow lane with no footpath for over 500m or lighting over much of this distance which would not offer an environment conducive to walking. There is a public right of way running into the village along the west boundary of the	✗	High	Local	Permanent	Long

	site which can facilitate access to services and facilities in the village.					
<p>Summary: The site is not in flood risk. The site is comprised of farm buildings with grassed areas to the rear, the boundaries are mature hedges and trees. To the south is a large pond, the grassed areas may house biodiversity included that relating to the pond and adjacent ponds connected to the caravan site. Biodiversity may also be in the buildings so development may impact on biodiversity. The site is detached from the village and well screened so there would be no impact on the townscape. The site is well enclosed by hedging and trees so there would be no impact on the landscape. There is no impact on the historic environment. The site is detached from the main body of the village and is somewhat isolated. It is accessed down a lane which runs past some residential houses. The lane accesses out onto a narrow lane with no footpath for over 500m or lighting over much of this distance which would not offer an environment conducive to walking. There may be some impact on the residential houses by the use of the access though it is presently used for agricultural vehicles. There is a public right of way running into the village along the west boundary of the site.</p>

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is largely an agricultural field with some buildings on the eastern side of the site and boundaries of hedges. Biodiversity would be improved through a landscaping scheme.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is largely an agricultural field with some buildings on the eastern side of the site and boundaries of hedges. The site is in the open countryside. There would be an impact on the landscape on views to the north. There is no impact on the historic environment.	X	High	Local	Permanent	Long
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	0	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot	The site is not in flood risk	✓	Low	Local	Permanent	Long

be avoided.						
5. Promote viable and diverse economic growth that supports communities within the district.	The site is predominantly an agricultural field at Grade 3. However, there are buildings on site which are used by local businesses.	<b>X</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature. This site is predominantly an agricultural field at Grade 3, although there are buildings on a small part of the site.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access	The site is in the open countryside with no footpath to the village for 350m. An access could be provided but it would not link the site to the village to create the links to services and facilities.	<b>X</b>	High	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is in the open countryside with no footpath to the village for 350m. An access could be provided but it would not safe access to the village to help support the local community.	<b>X</b>	High	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	<b>✓</b>	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	<b>O</b>	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is in the open countryside with no footpath to the village for 350m. An access could be provided but it would not provide a safe link the site to enable occupants to be active and access services and facilities,	<b>X</b>	High	Local	Permanent	Long

	including those for sport and recreation, in the village.					
13. Positively plan for, and minimise the effects of, climate change.	The site is in the open countryside with no footpath to the village for 350m. An access could be provided but it would not link site to the village and would not be conducive to walking.	<b>X</b>	High	Local	Permanent	Long
Summary: The site is not in flood risk. The site is predominantly an agricultural field with boundaries of hedges. However, there are buildings on a small part of the site which are used by local businesses. Biodiversity would be improved through a landscaping scheme. The site is in the open countryside, the site does not form a natural extension to the village. There is no footpath for 350m so access to the village would not be conducive for pedestrians to use support services and facilities. There would be an impact on the landscape on views to the north. There is no impact on the historic environment.

5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is agricultural land with part of it the old railway sidings.	○	Low	Local	None	None
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to the services and facilities in Wainfleet and is connected to them with footpaths along Barton Road and Station Road.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to the services and facilities in Wainfleet and is connected to them with footpaths along Barton Road and Station Road.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	The site is close to the services and facilities in Wainfleet and is connected to them with footpaths along Barton Road and Station Road.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to the services and facilities in Wainfleet and is connected to them with footpaths along Barton Road and Station Road. There is a public footpath running from Station Road through the site	✓	Low	Local	Permanent	Long

	out into the open countryside which would encourage walking.					
13. Positively plan for, and minimise the effects of, climate change.	The site is close to the services and facilities in Wainfleet and is connected to them with footpaths along Barton Road and Station Road.	✓	Low	Local	Permanent	Long
<p>Summary: The site is in flood zones 2 and 3 tidal flood risk but is outside the flood hazard areas. It is a mixture of agricultural land and former railway sidings. The boundary treatments are a mixture of hedges and mature trees and so the site would not impact on the wider landscape. Mature planting within the site provide good opportunities for biodiversity and these should be retained in the layout of any future development; additional planning will help supplement this. Access is through footpaths along Barton Road and Station Road and the site is close to services and facilities. Historic England has raised the issue of the impact on heritage assets (e.g. the former Salem Bridge Brewery site and nearby Listed Buildings and their settings). The site has been reassessed and there is considered to be significant impact on the setting of Bateman's Brewery and buildings, the church opposite and the Wainfleet Conservation Area.</p>

10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is connected to the services and facilities in the village with a footpath along Matt Pitts Lane. Matt Pitts Lane leads out into the open countryside and this could encourage walking and cycling	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is connected to the services and facilities in the village with a footpath along Matt Pitts Lane.	✓	Low	Local	Permanent	Long
Summary: Around half the site is in tidal flood risk including a small area which is the access area and a strip running down the boundary to the south, however, this is outside the flood hazard areas. The site has little in the way of boundary features and any landscaping would enhance biodiversity. It is flat and development of it would impact to a degree on views to the wider countryside and views back to the village from the public footpath south of the site. The site is close to services and facilities in the village and is connected by a footpath along Mat Pitts Lane. Mats Pitts Lane leads to the open countryside which could encourage walking and cycling.						

<b>Site Reference Number: WAI404</b>						
Any Assumptions:						
•						
Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site has mainly hedgerow for its boundary treatment. Half the site is a caravan site the other half a grassed field. Any landscaping would enhance biodiversity.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is relatively flat with mature trees along the east which minimises its impact in views from Croft Lane and sits as a backdrop to the site thus views to the open countryside from the west are obscured. The western boundary is low hedges which do little to reduce the impact of the development. The site would not impact on	✓	Medium	Local	Permanent	Long

	the townscape and historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is in flood zones 3 and 2, tidal and fluvial flood risk.	<b>X</b>	High	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	<b>O</b>	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is agricultural land.	<b>X</b>	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is on the edge of the village away from the services and facilities of the village, there is a footpath beginning on the corner of Spilsby Road.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	<b>O</b>	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is on the edge of the village away from the services and facilities of the village, there is a footpath beginning on the corner of Spilsby Road.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is on the edge of the village a way from the services and facilities of the village, there is a footpath beginning on the corner of Spilsby Road.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is on the edge of the village a way from the services and facilities of the village, there is a footpath beginning on the corner of Spilsby Road.	✓	Low	Local	Permanent	Long

Summary: The site is flood zones 2 and 3 tidal and fluvial flood risk. The site is flat and a mixture of a caravan site and grassland. The trees on the eastern boundary provide a backdrop to the site which minimises the impact on views of the wider landscape and the impact of the development from Croft Lane. The impact from Spilsby Road will be greater. The site is quite a long way from the services and facilities' of the village, in effect being in the open countryside but there is a footpath leading into the village.

The site can be accessed from Tattershall Road. The site would be required to provide green infrastructure, including some recreation provision.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is reasonably close to services and facilities; there is a footpath connection on the opposite side of the road to the site leading to the centre of the village. The site can be accessed from Tattershall Road. There will be opportunities through the landscaping to strengthen links to the	✓	Low	Local	Permanent	Long

	adjacent woodland and watercourse to help species migration and adaptation.					
<p>Summary: The site is not in flood risk apart from the northern edge which is in flood zone 2. The site is agricultural land with a combination of woodland, a water course and school playing field to the north. The other boundary treatments are made up of hedges, although the eastern part of the site is a subdivision of a larger field and there is no boundary treatment in this area. Development would not impact on the wider landscape because of the site's boundary treatment. The site lies on the edge of the built environment, as well as woodland there is a school playing field to the north and the site sits comfortably alongside this. There would be no impact on the historic environment. Historic England raised the potential for impact on the heritage assets, namely the Conservation Area and its setting. The site has been reassessed and it is considered that there is no impact on the setting of the Conservation Area. By linking to the woodland and the watercourse and additional green infrastructure as required on a site of this size, landscaping may enhance biodiversity on the site. The green infrastructure can also provide recreation opportunities. The site is reasonably close to services and facilities; there is a footpath connection on the opposite side of the road to the site leading to the centre of the village. The site can be accessed from Tattershall Road.</p>

9. Support inclusive, safe and vibrant communities.	The site is moving away from services and facilities and is some distance from the centre of the village; there is a footpath connection on Witham Road leading to the centre of the village and a regular bus service along Witham Road. There is already an access into the site which is adequate.	✓	Medium	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long
11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is moving away from services and facilities and is some distance from the centre of the village; there is a footpath connection on Witham Road leading to the centre of the village and a regular bus service along Witham Road. On the opposite side of the road is a public footpath and the site is adjacent to the river Witham which could encourage walking and cycling and other recreational activities.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is moving away from services and facilities and is some distance from the centre of the village; there is a footpath connection on Witham Road leading to the centre of the village and a regular bus	?	Medium	Local	Permanent	Long

	service runs along Witham Road. There is already an access into the site which is adequate. The potential for existing biodiversity on site and the possible impact development of the site would need further assessment.					
<p>Summary: The rear of the site is in flood zone 2. The site comprises disused railway siding of the dismantled Lincoln - Boston railway. There is a drainage ditch at the rear of the site and it runs adjacent to the river Witham, the site is overgrown with trees, bushes and patches of grassland; Landscaping may enhance biodiversity on the site, though the site is very near the river and wildlife may use it in association with the river, also its overgrown nature most likely provides a habitat for plants and animals. Development would impact on the wider landscape because the site is viewed from across the river and provides a green backdrop to both the river the listed building and railway platform which lies on the boundary of the site. The site lies on the edge of the built environment but because of the river and its rural setting it does not sit comfortably within the existing pattern of development. There would be an impact on the historic environment because of the listed building the site helps to set this railway associated building in its context and provides a green backdrop for it. The site is moving away from services and facilities and is some distance from the centre of the village; there is a footpath connection on Witham Road leading to the centre of the village and a regular bus service runs along Witham Road. There is already an access into the site which is adequate. On the opposite side of the road is a public footpath and the site is adjacent to the river Witham which could encourage walking and cycling and other recreational activities.</p>

Any Assumptions:

- 

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is part of the golf course with a Site of Nature Conservation Importance (SNCI) to the south and TPOs to the west and south along the boundary with Manor Road, there are also some trees within the site, the site has a parkland feel to it. As the site is only a strip of frontage, there is unlikely to be much opportunity to enhance biodiversity.	○	Medium	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is part of the golf course with a SNCI to the south and TPOs to the west and south along the boundary with Manor Road, there are also some trees within the site; the site has a parkland feel to it. Development would impact on the wider landscape because, although there are trees along the southern boundary, development would still be very visible under the canopy. There are public rights of way along the southern boundary and to the north of the site around Coal Pit Wood. Although there are intervening trees, again it is likely that the site will be visible below the canopy. The site also would be highly	✘	High	Local	Permanent	Long

	visible to users of the golf course, as there is no boundary treatment to the north, and this would alter the character of this part of the course for users. The site lies on the south of Manor Road which has very little development and is very woody and rural the site would not form a natural extension to the built environment and would be out of context with the surrounding environment. The loss of any of the front boundary trees would be detrimental to the Woodhall Spa Conservation Area, which the site sites adjacent to, and add to the urbanisation of the street scene. The site lies on the edge of the Woodhall Spa Conservation Area, good design would ensure there would be no impact on the historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	<b>O</b>	Low	Local	None	None

-----------------	--	--	--	--	--	--

Summary: The site is not in flood risk. The site is part of the golf course with an SNCI to the south and TPOs to the west and south along the boundary with Manor Road, there are also some trees within the site, the site has a parkland feel to it. The site is only a frontage strip and it is unlikely the site would significantly enhance biodiversity. Development would impact on the wider landscape because although there are trees along the southern boundary, development would still be very visible under the canopy. There are public rights of way along the southern boundary and to the north of the site around Coal Pit Wood. Although there are intervening trees, again it is likely that the site will be visible below the canopy. The site also would be highly visible to users of the golf course, as there is no boundary treatment to the north, and this would alter the character of this part of the course for users.. The site lies on the south of Manor Road which has very little development and is very woody and rural the site would not form a natural extension to the built environment and would be out of context with the surrounding environment. The loss of any of the front boundary trees would be detrimental to the Woodhall Spa Conservation Area and add to the urbanisation of the street scene. The site lies on the edge of the Woodhall Spa Conservation Area, good design would ensure there would be no impact on the historic environment. The site is reasonably close to services and facilities but there is no access into it without removing some of the TPO front boundary trees which would be detrimental to the street scene and the Conservation Area. The roads surrounding the area are narrow rural lanes with no footpath connections and no room to create them without significant impact on the rural character of the area.

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is a grassed field with hedges for its boundary treatment and trees along the northern boundary. Landscaping may enhance biodiversity on the site.	✓	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field with hedges for its boundary treatment and trees along the northern boundary; development would not impact on the wider landscape, the site is well screened by development along Bardney Road and will be screened to the rear by development on the industrial estate. The site forms a natural extension to the built environment, planning permission has been granted for housing to the north and this site fits in with the proposed pattern of development. If the site is not accessed via WRA309 the access will have to be via the demolition of an existing property on Bardney Road. This	✓	Low	Local	Permanent	Long

	area has no significant historical value, there would be no impact on the historic environment.					
3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Greenfield grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to services and facilities, to which there is a footpath. Access can be either through WRA309 or via the demolition of an existing property on Bardney Road; both are acceptable.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities, to which there is a footpath. Access can be either through WRA309 or via the demolition of an existing property on Bardney Road; both are acceptable.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	○	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for “healthy lifestyles”	The site is close to services and facilities, to which there is a footpath. Access can be either through WRA309 or via the demolition of an existing property on Bardney Road; both are acceptable.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities, to which there is a footpath. Access can be either through WRA309 or via the demolition of an existing property on Bardney Road; both are acceptable.	✓	Low	Local	Permanent	Long

Objectives	Likely Impact	Degree of Impact	Likelihood of Impact	Scale	Permanence	Duration
1. Protect and enhance the quality and distinctiveness of the areas' biodiversity (native plants and animals) and geodiversity.	The site is part a grassed field with open boundaries to the east and south, there are some trees and hedges on the northern boundary. The built environment forms the western boundary. As the site has not been disturbed for many years, it is unclear what the current level of biodiversity is on site. Due to the size of the site, there may be few opportunities for landscaping to enhance biodiversity on the site.	<b>?</b>	Low	Local	Permanent	Long
2. Protect and enhance the quality and distinctiveness of the area's landscapes, townscapes and historic environment.	The site is a grassed field with open boundaries to the east and south, there are some trees and hedges on the northern boundary. The built environment forms the western boundary; development would impact on the wider landscape, because there are views of the ancient monument from potential access points into the site. Two public rights of way cross the site and development will be prominent in views from these footpaths and will significantly alter their character. The lack of boundary treatment along this eastern boundary exacerbates the potential wider impact. The site does form a natural extension to the built environment and does fit in with the existing pattern of the village but it lies adjacent to and within the setting of the manorial complex ancient monument and bringing development nearer this encroaching on its surrounding green space would cause significant harm to the historic environment.	<b>XX</b>	High	Local	Permanent	Long

3. Protect natural resources from avoidable losses and pollution and minimise the impacts of unavoidable losses and pollution.	No impact	○	Low	Local	None	None
4. Avoid the risk of flooding (where possible) and fully mitigate against the impacts of flooding where it cannot be avoided.	The site is not in flood risk	✓	Low	Local	Permanent	Long
5. Promote viable and diverse economic growth that supports communities within the district.	No impact	○	Low	Local	None	None
6. Prioritise appropriate re-use of previously developed land and minimise the loss of the best agricultural land and greenfield sites.	The District does not have very much brownfield land on which to develop because it is predominately rural in nature; this site is Greenfield grade 3 agricultural land.	✗	High	Local	Permanent	Long
7. Improve accessibility to key services, facilities amenities and green infrastructure including the promotion of sustainable modes of access.	The site is close to services and facilities, there are potential access points into the site from existing development to the west, all these have footpath links.	✓	Low	Local	Permanent	Long
8. Increase reuse and recycling rates and minimise the production of waste.	No impact	○	Low	Local	None	None
9. Support inclusive, safe and vibrant communities.	The site is close to services and facilities, there are potential access points into the site from existing development to the west, all these have footpath links.	✓	Low	Local	Permanent	Long
10. Ensure that local housing needs are met.	There is an identified need for future housing growth in the settlement, which is a large village with a range of services and facilities.	✓	Low	Local	Permanent	Long

11. Increase energy efficiency and ensure appropriate sustainable design, construction and operation of new developments.	No impact	0	Low	Local	None	None
12. Encourage and provide the facilities and infrastructure for "healthy lifestyles"	The site is close to services and facilities, there are potential access points into the site from existing development to the west, all these have footpath links. There are public footpaths crossing the site.	✓	Low	Local	Permanent	Long
13. Positively plan for, and minimise the effects of, climate change.	The site is close to services and facilities, there are potential access points into the site from existing development to the west, all these have footpath links.	✓	Low	Local	Permanent	Long

Summary: The site is not in flood risk. The site is a grassed field with open boundaries to the east and south, there are some trees and hedges on the northern boundary. As the site has not been disturbed for many years, it is unclear what the current level of biodiversity is on site. Due to the size of the site, there may be few opportunities for landscaping to enhance biodiversity. The built environment forms the western boundary; development would impact on the wider landscape, because there are views of the ancient monument from potential access points into the site. Two public rights of way cross the site and development will be prominent in views from these footpaths and will significantly alter their character. The lack of boundary treatment along this eastern boundary exacerbates the potential wider impact. The site does form a natural extension to the built environment and does fit in with the existing pattern of the village but it lies adjacent to and within the setting of the manorial complex ancient monument and bringing development nearer this encroaching on its surrounding green space would cause significant harm to the historic environment. The site is close to services and facilities, there are potential access points into the site from existing development to the west, all these have footpath links. There are public footpaths crossing the site.
